

ENTERING STUDENT RESPONSES

If there's a need to enter, or modify student responses, this can be done at the "Enter/Edit" option under the "Administration" tab:

Select the appropriate "View" option, and click the "Find Students" button that's located just under the "View" field:

Mark entries directly into the grid if desired:

Or select a different option to "Enter Responses by Column," "by Student," or "Grid" by making the selection.

Disregard the Date Taken field, since this should populate once student responses are placed.

The Grid option allows the user to input scores using a drop-down.
