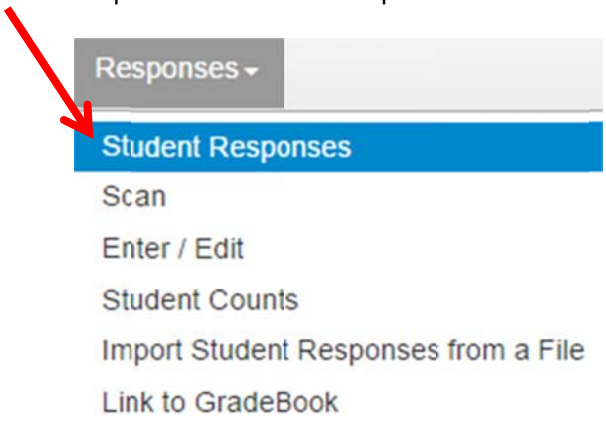
PRINTING STUDENT CONSTRUCTED RESPONSES

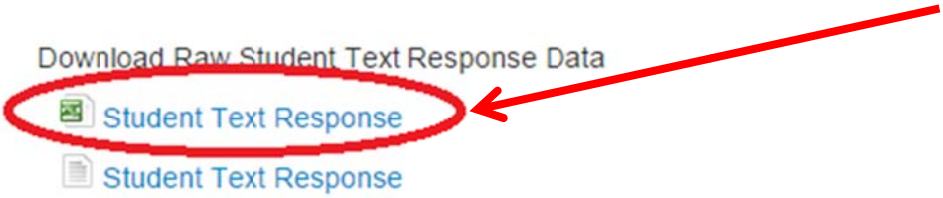
The student constructed responses (essays) can be exported to Excel, and the Excel document can then be modified for easier readability.

First find the test from among the list of tests, and click on the title to take you to the overview screen:

At the overview screen, select "Student Responses" from the "Responses" tab:



If Excel is the desired format, select the Excel option under the "Download Raw Student Text Response Data" section:



All text responses will be reflected in an Excel document, from which column and row sizes can be modified for easier reading:
