

# MODIFYING THE DASHBOARD

After logging into Illuminate, users arrive at their dashboard. This dashboard can be customized to a limited degree by adding, removing, or reordering widgets.

The screenshot shows a dashboard with several widgets. A red arrow points to the 'Add Widgets' button in the top left. Another red arrow points to the control icons (up arrow, pencil, X) in the grey title bar of the 'Favorites' widget. A third red arrow points to the control icons in the title bar of the 'Demographic Distribution' widget. A fourth red arrow points to the control icons in the title bar of the 'Year-To-Year Rollover Counts' widget.

To remove, rename, minimize a widget, click on the X (to remove), pencil (to rename), or up arrow (to minimize) located in the grey bar that contains the title. You can also drag the title bar to relocate a widget:

This screenshot shows the same dashboard as above, but with a red oval highlighting the control icons (up arrow, pencil, X) in the title bar of the 'Year-To-Year Rollover Counts' widget. A red arrow points down from the text above to this oval. The 'Year-To-Year Rollover Counts' widget is also highlighted with a dashed yellow border.

| Dataset    | 2014 | 2015          |
|------------|------|---------------|
| Enrollment | 96%  | 31,267 29,724 |
| Roster     | 98%  | 30,078 29,408 |
| User       | 98%  | 1,387 1,424   |
