Chapter 1: Executive Summary

The Visalia Unified School District is a school district serving the general vicinity of the City of Visalia in Tulare County, California. The District serves students in grades kindergarten through twelve.

Enrollment in grades TK-12 for the current school year (2022/23) was 28,893 students at the time of the official enrollment census taken in the fall. Many schools are operating close to maximum capacity, and some schools are over design capacity and rely on portables to temporarily accommodate students. Projects are being planned and developed to provide additional space.

Residential development is projected to add 3,486 new housing units in the next five years. This pace is based on recent activity and matches the anticipated units used in the demographics study. There were 750 new housing units built in 2022 within the District boundaries.

Applying the methodology prescribed by State law for Level 2 Fees (see next section for a more detailed discussion), this School Facilities Needs Analysis finds the Visalia Unified School District is justified in levying a fee of **\$5.50 per square foot** on residential development subject to the fee. This is an increase of \$0.71 over the current Level 1 rate of \$4.79 per square foot for residential units. The SAB (State Allocation Board) approved an inflation adjustment for school construction of 9.3% compared to last year.

Expected revenues from development fees in the next five years are projected to be \$30.6 million. This fee will provide up to one-half of the cost of needed school projects, with the other half expected to be provided by the State building program and other local sources. Additional District funds may be required to supplement these fees to provide for the actual construction costs of school projects.

Chapter 2: Context and Legal Requirements

This document, the Visalia Unified School District's School Facilities Needs Analysis, exists to fulfill a statutory requirement established by the California Government Code. A school district must prepare or have prepared a School Facilities Needs Analysis (SFNA) as a prerequisite to imposing "Alternate" fees on new housing to provide funding for additional school facilities needed to accommodate students anticipated from new homes.

The SFNA is not used to justify other forms of fees or mitigation agreements, and is not a facilities plan or financing study for the school district. Its purpose is narrowly defined and this document should be used only to fulfill statutory requirements for the stated fees.

A. History and Context of SB 50 School Facility Fees

Senate Bill 50 (SB 50)¹ was passed during the 1998 session of the California Legislature as a comprehensive restructuring of the state's school facility construction and funding process. Parts of the legislation became effective when the state's voters approved Proposition 1-A, a \$9.2 billion school and university construction/modernization bond².

SB 50 also changed the legal process whereby builders of new homes could be required to pay for new or expanded schools to serve the new homes. A spectrum of local ordinances, policies, and requirements were largely replaced with a statewide, three-tier system. In this new system, tiers or levels are:

Level 1: similar to 1986 fee structure, now \$4.79 per sq. foot³

Level 2: up to 50% of the State allowed cost for construction and sites, if the school district meets specified eligibility tests⁴ (assumes State pays other 50% of cost.)

Level 3: same as Level 2, but includes State's 50% share only when the State declares it is out of funds for new construction⁵

Level 2 Fees are new grants of authority to school districts, but are counterbalanced by a firm prohibition on other local fees and other requirements on housing developments. Level 2 Fees are referred to by the Legislation as "Alternate" fees.

A significant change with the current fee program is the local school district's ability, if it meets the eligibility tests, to impose a Level 2 fee without involving the city or county having control of land use approvals within the school district.

¹ Chapter 407, Statutes of 1998

² Statewide Proposition 1-A, November 3, 1998

³ Rate effective February 23, 2022

⁴ See Calif. Government Code Section 65995.5

⁵ Level 3 fees are currently not allowed

Many other changes to the school building process occurred with the passage of SB 50 and Proposition 1-A. This report focuses only on fees, but these changes should be viewed in the context of the amended system.

B. Legal Requirements to Impose Alternate Fees

For a school district to impose Level 2 Fees, it must meet a number of eligibility tests specified in SB 50. The Visalia Unified School District has satisfied these requirements.

1. Apply for New Construction funding to establish a baseline capacity

The Visalia Unified School District has submitted its documents to OPSC for new construction and has had its eligibility baseline established. The District has applications in process and will apply for new construction funding as projects arise.

2. Be eligible for New Construction funding

The Visalia Unified School District has been determined by the Office of Public School Construction and the State Allocation Board to be eligible for new construction funding.

3. Satisfy two of the four following tests:

- a. Have substantial enrollment⁶ on Multi-Track calendar
- b. General Obligation bond in past four years with at least 50% yes vote
- c. Have issued debt or incurred obligations used for capital outlay equal to 15% of district's bonding capacity⁷
- d. Use relocatable (portable) classrooms for at least 20% of the district's total classrooms.

⁶ Generally defined as 30% of the District's K-6 enrollment; special rules for 9-12 districts.

⁷ If the debt includes landowner-voted Mello Roos debt approved after 11/4/98, then the threshold level is 30% rather than 15%.

The Visalia Unified School District satisfies at least two of these four tests:

- (b) The District passed Measure A – a \$105.3 million local bond on November 6, 2018.*
- (c) The existing capital facility debt is over 15% of the bonding capacity. The bonding capacity is \$390,498,978 and the debt is \$125,797,981 for a debt ratio of 32.21%. The debt includes bonds and COP's as shown in the appendix.*
- (d) There are 320 portable classrooms of the total 1,265 classrooms in the District (includes Denton Elementary) for a ratio of 25.3%. This count does not include the temporary rented portables. See appendix for classroom inventory.*

4. Prepare a School Facilities Needs Analysis.

The Visalia Unified School District caused this School Facilities Needs Analysis to be prepared for review and adoption by the School Board.

5. Follow the procedures and process identified in State law.

The Visalia Unified School District will follow the adoption process and procedures as specified in State law.

Chapter 3: Data Used in Analysis

This Chapter presents the data used to calculate the fee. Chapter 4 contains the actual calculation. Many of these data elements are prescribed in State law and are presented as required.

Data elements to be reviewed include:

- A. Pupil-per-Home yield rates**
- B. Housing projection for the next five years**
- C. Enrollment from new homes built in the next five years**
- D. Available capacity in existing schools**
- E. Grant amount per pupil**
- F. Site Acquisition and Site Development allowances**

A. Pupil-per-Home Yield Rates

SB 50 prescribed how pupil-per-home yield rates are to be calculated for a SFNA. The method is to identify homes built in the past five years that are similar to homes expected to be built in the projection period (the next five years).

The Student Yield Rates are to be calculated separately for elementary, junior high, and high school students.

The homes built in the District during the past five years was matched with the data base of students currently enrolled to determine these yield factors. The addresses for the housing units were compared to the student data for 2022/23. The method was to identify as many new homes built within the five-year window that could be mapped in the GIS program. The permits were pulled at least 6 months prior to the date of the student data collection (October 2022) to ensure they could be occupied.

Data is presented as required by grade level group. Two housing types have been shown, Single Family (attached and detached) and Multi Family. Multi Family represent the townhouse and apartment units.

Pupil-per-Home yield results:

	TK-6	7-8	9-12	Total
SF	0.2563	0.0742	0.1490	0.4795
MF	0.1551	0.0449	0.0496	0.2495
Combined	0.2137	0.0620	0.1073	0.3830

B. Housing Projection for Next Five Years

As required by SB 50, new housing units have been projected for the next five years. Data from city and county planners have been used to make the projection shown below along with a review of the historic construction rates.

**New Residential Units in the Next Five Years
(2023/24 through 2027/28)**

Dwelling Type	<u>5 Year Total</u>
Single Family	2,022
Multi Family	1,464
Total	3,486

These projections are estimates and precise numbers in a given year may vary from the table, however the total for the five year period reflects plans approved and in process.

A review of the historic permits pulled for new residential units indicated the average size new housing unit has averaged 2,019 square feet for single family units and 1,017 square feet for multi-family units. These numbers will be used for the average size of the new housing units over the next five years.

C. Enrollment from New Housing in Five Years

Multiplying the number of new homes by the pupil-per-home yield rate gives the expected number of pupils from the new homes to be built in the next five years. This approach, which is prescribed in State law, has certain limitations: first, the yield rate is likely to be lower as new homes typically have fewer students soon after construction than will be seen after the neighborhood is established; and second, the five year window minimizes the need for intermediate and high school facilities which often need more than five years of enrollment growth to require a full size facility. As a result, the formula under SB 50 generally understates a school district's long term need.

SB 50 allows a five year projection to be utilized to determine the number of projected students from new residential development. Using this methodology, the District has projected the number of new housing units for the next five years and multiplied by the yield factors to determine the number of students to be projected from new housing.

**Visalia Unified School District
New Students Projected by Grade Level
For Development Through 2028**

Grade Level	Student Yields for New Residential Dev.	Students Projected
Single Family		2022 Units
TK-6	0.2563	518
7-8	0.0742	150
9-12	0.1490	301
Total	0.4795	969
Multi Family		1464 Units
TK-6	0.1551	227
7-8	0.0449	66
9-12	0.0496	73
Subtotal	0.2495	366
All Development		3486 Units
TK-6	0.2137	745
7-8	0.0620	216
9-12	0.1073	374
Totals	0.3830	1,335

A total of 1,335 students are projected to be generated by new housing units over the next five years.

D. Capacity and Space Available for Students from New Residential Units

As calculated by the State's prescribed methodology on form SAB 50-02 and then adjusting for the projects constructed and funded since the baseline was established, a total of 28,982 spaces exist in the District's schools as shown in the following chart.

Visalia Unified School District Capacity of Existing Facilities						
		<u>TK-6</u>	<u>7-8</u>	<u>9-12</u>	<u>SDC</u>	<u>TOTAL</u>
SB50 Baseline Capacity (SAB 50-02):		10,075	3,051	4,995	91	18,212
School Projects	Project #	Capacity Added/Grants Funded				
El Diamante High	1			2,000		2,000
Elbow Creek	2	190				190
Mountain View	3	186				186
Royal Oaks	4	184				184
Four Creeks Elem	5	725			13	738
Oak Grove Elem	8	750			13	763

Shannon Ranch Elem	26	700				700
VTEC	27			10		10
Redwood High	28			337		337
Ridgeview Middle	29		839		9	848
Riverway Elem	30	675				675
Denton Elem	31	675				675
Totals for Completed Projects		5,784	1,455	2,662	140	10,041
Other District Funded Projects:				729		729
Grand Totals		15,859	4,506	8,386	231	28,982

Project 31, Denton Elem was just funded by the State Allocation Board in December 2021 and is included in the District capacity. The District is now in line for funding for project 32 at Sequoia High which is currently on the acknowledged list.

The District's total enrollment for the current year 2022/23 is 28,893 which is a total of 89 less than the total capacity of 28,982.

Visalia Unified School District
Space Available in Existing Facilities

Grade Level	Current Enrollment	Capacity per SB 50	Space Available
	[1]	[2]	
TK-6	14,941	15,859	918
7-8	4,386	4,506	120
9-12	9,277	8,386	(891)
SDC	289	231	(58)
Total	28,893	28,982	89

[1] Based on October enrollment of 22/23 school year.

[2] Based on SB 50 methodology of capacity calculation.

This table illustrates the comparison of the current enrollment to the District capacity.

Although these calculations show potential space available for the elementary and middle school grades, the total shows a net space available of 89 seats.

The government code states: 65995.6 (b) (2) Identify and consider the extent to which projected enrollment growth may be accommodated by excess capacity in existing facilities.

The potential space available in the elementary and middle school grades shown above is not available to house students generated from new development. Since the district has 25.3% of its capacity in portable classrooms, these spaces are temporary and are not adequate for housing future enrollment. The baseline capacity included 88 portables at the elementary schools which is equal to 2,200 seats which is more than the 918 seats available. The baseline capacity also included 32 portables at the middle schools which is equal to 864 seats which is more than the 120 seats available. These inadequate seats in the capacity more than account for the potential space shown in the table above for the elementary and middle school grades.

In addition, the areas of future new development in the district are occurring in locations where the existing schools are overcrowded. The following schools are currently or projected to be over capacity even when including the owned portables: Annie R Mitchell, Cottonwood Creek, Denton, Oak Grove, Riverway, Ridgeview Middle and Redwood High. The largest impacts of future development in the next six years will be at the following schools: Annie R Mitchell Elementary, Riverway Elementary, Denton

Elementary and Ridgeview Middle. As indicated, these schools do not have space for additional students.

The impacts of new development have resulted in the need to lease temporary portables. The District has 29 leased portable at its elementary schools, 4 at its TK-8 schools, 4 at its middle schools and 26 at its high schools. This also illustrates the District is impacted at all of the grade levels and there is a need for additional facilities to house all students from new development.

Therefore, the District has determined that there is only 89 seats available to house students from new development in the existing facilities. As a result, 1,246 of the 1,335 students projected from new development will need to be housed in new facilities and will be used to calculate the allowable Level 2 Fees.

E. State Construction Grant Amount for Unhoused Pupils from New Housing

When calculating the Level 2 Fees, the number of projected unhoused students is multiplied by the State's new construction grant amount. Those amounts which are shown below are updated annually by the State Allocation Board each January.

State Grant Allowance for New School Projects				
<u>Grade Level</u>	<u>Base Grant</u>	<u>Fire Alarms</u>	<u>Fire Sprinklers</u>	<u>Total</u>
TK-6	\$15,983	\$19	\$268	\$16,270
7-8	\$16,904	\$25	\$319	\$17,248
9-12	\$21,509	\$43	\$331	\$21,883
SDC	\$30,036	\$57	\$567	\$30,660

The following chart assumes that 1% of the new student population generated from new housing units will consist of special education students. This is equal to the current ratio of students who are enrolled in special day classes.

Allowable Grant Costs for Projected Unhoused Students			
<u>Grade Level</u>	<u>Unhoused Students</u>	<u>Per-Pupil Grant Allowance</u>	<u>Total Grant Cost</u>
TK-6	649	\$16,270	\$10,559,230
7-8	214	\$17,248	\$3,691,072
9-12	370	\$21,883	\$8,096,710
SDC	13	\$30,660	\$398,580
TOTALS	1,246		\$22,745,592

The cost per student amounts include State funded allowances for required fire alarm and sprinkler requirements for new school projects as of January 2023.

F. Site Acquisition and Site Development Grant Allowance

1. Eligible Site Acquisition Costs

When calculating the Level 2 Fees, the grant totals listed above are added to half the estimated site acquisition costs that are projected for the next five years, and eligible site development costs. The following table shows the total acres needed based on the CDE (California Department of Education) standards for site sizes.

Site Needs Average Size Schools			Projected Unhoused <u>Students</u>	Equivalent Sites <u>Needed</u>	Site Acres <u>Needed</u>
	<u>Acres</u>	<u>Students</u>			
Elementary	10	600	649	1.082	10.82
Middle	20	800	214	0.268	5.35
High	40	1500	370	0.247	9.87
				TOTAL	26.04

For purposes of calculating the Level 2 fee, the District will need 26.04 acres of additional land. The site costs are based on acquisition at \$115,175 per acre for sites useable for school purposes based on Department of Education standards. This per acre value is based on the average price for property currently on the market within the district.

2. Eligible Site Development Costs

SB 50 allows the inclusion of site development costs in the fee calculation. These costs are limited to one half of the actual or estimated service site improvements, off site improvements and utility costs which would be allowed by the State Allocation Board. These improvements can include applicable drainage, utility and road improvements. In addition, the SAB has a grant that provides for general site development costs which is based on a per acre value in addition to a percentage of the projects pupil grant allowance (see Grants on page 10).

The development costs were derived from historical project costs funded by the State. The average amounts totaled \$343,921 for elementary, \$323,561 for junior high and \$377,310 for high schools. The total need is for 26.04 acres developed at a cost of \$9,176,326. The 50% eligible site development costs that can be included in the Level 2 computation totals \$6,424,265 and includes the allowance for general site development costs of \$1,836,102. The following figure summarizes the site acquisition and development costs.

COST OF SITES NEEDED

	Acres Needed	Land Cost/Acre	Land Cost	Development Cost/Acre	Dev. Cost	Total Site Needs
Elementary	10.82	\$115,175	\$1,246,198	\$343,921	\$3,721,225	\$4,967,423
Middle	5.35	\$115,175	\$616,189	\$323,561	\$1,731,051	\$2,347,240
High	9.87	\$115,175	\$1,136,781	\$377,310	\$3,724,050	\$4,860,831
Totals	26.04		\$2,999,168		\$9,176,326	\$12,175,494

50% portion: \$1,499,584 \$4,588,163

General Site Development

	Acres	Allowance/ Acre	Base Cost	% Allowance	Added Cost	Total Cost
Elementary	10.82	\$26,016	\$281,493	6%	\$633,554	\$915,047
Middle	5.35	\$26,016	\$139,186	6%	\$221,464	\$360,650
High	9.87	\$26,016	\$256,778	3.75%	\$303,627	\$560,405
Totals	26.04					\$1,836,102

Total 50% Site Development Costs: \$6,424,265
Total 50% Land & Development Costs: \$7,923,849

The “Added Cost” column was determined by multiplying the percentage allowance by the total student grants for each grade shown on page 10.

G. Projects to be Financed with Level 2 Fees

Fees collected in the next five years will be spent on known and future school construction projects. Projects may include but are not limited to the following:

- 1. New school facilities**
- 2. Land for new schools**
- 3. Additional land needed at existing schools**
- 4. New classrooms at existing schools**
- 5. Additional support facilities at existing campuses to accommodate increased enrollments**
- 6. Portables used for interim housing needs**

The District may use the fees to make the annual COP payments due to previous projects that have been financed. As provided by State law, fees may be used for the reasonable administrative costs of collecting the fees, and for legal and other costs of justifying and imposing the fees.

Chapter 4: Calculation of Level 2 Fee

This Chapter applies the data identified above and calculates the fee justified. The process follows requirements of SB 50 as enacted in the Government Code and Education Code.

After figuring the aggregate projected costs, the total was divided by the number of projected square footage of the new residential units to derive the per square foot assessment amount. Based on these calculations, the Level 2 fee within the Visalia Unified School District for the next 12 months is calculated to be **\$5.50** per square foot, for residential units.

Visalia Unified School District SB 50 Level 2 Developer Impact Fee Determination

Grade Level	Base Need			Land Acquisition & Site Development			Total Need
	Unhoused Students	Cost per Student	Total Cost	Land Acquisition	Site Development	Total Land & Site Dev.	
		[1]		[2]	[3]	[4]	
TK-6	649	\$16,270	\$10,559,230	\$623,099	\$2,775,660	\$3,398,759	\$13,957,989
7-8	214	\$17,248	\$3,691,072	\$308,094	\$1,226,175	\$1,534,270	\$5,225,342
9-12	370	\$21,883	\$8,096,710	\$568,391	\$2,422,430	\$2,990,820	\$11,087,530
SDC	13	\$30,660	\$398,580	\$0	\$0	\$0	\$398,580
Totals	1,246		\$22,745,592	\$1,499,584	\$6,424,265	\$7,923,849	\$30,669,441

New Housing Unit Area

Unit Type	Number of Units	Area per Unit	Total Area	Grades TK-12 Amount:	Level 2 Fee \$ /Sq. Ft.
Single Family	2,022	2,019	4,082,418		\$5.50
Multi Family	1,464	1,017	1,488,888		
Totals	3,486		5,571,306		

[1] Cost per student per SB 50 allowance for new construction projects.

[2] Equals one half of the estimated land acquisition costs.

[3] Equals one half of the estimated site development costs including general site development costs.

[4] Total cost assumes 26.04 acres to be acquired.

The grant amounts shown include the amounts allowed by OPSC for fire alarms and sprinklers as of January 2023.

A. Reduce Cost by Other Available Funds, Including Owned Sites

SB 50 requires that the cost of serving students from new housing be reduced by other available local funds. The Visalia Unified School District potentially has several such sources of funds.

1. Fees on Senior Housing and Commercial/ Industrial Projects

Fees collected on senior housing and commercial or industrial development projects must be used to reduce the Level 2 fee amount, unless the fees are committed to other projects.

The District has applied these revenues to pay the lease/rental cost of portable classrooms that provide space for students from existing housing that accommodates workers in the senior housing projects or commercial/ industrial projects. By entering into such lease agreements, the Governing Board has not dedicated these funds to facilities necessitated by new residential construction subject to Alternate fees⁸.

2. Redevelopment Pass-Thru and Other Agreements

As with the preceding paragraph, the limited funds received from Redevelopment and similar agreements are used to provide capacity for enrollment growth from existing homes plus improvements to schools not related to new housing development. These funds are not available to reduce the cost of providing facilities for students from new residential projects.

3. Voter Approved Bond Measure

The District passed a \$105.3 million local bond in November 2018. The proceeds from that bond will be used for needed modernization projects. The Districts master plan identified a total need of \$221 million in modernization needs. Therefore, no local bond funds are available to offset costs identified in this report for students projected from new housing units.

4. Surplus Property

The District does not have any land or school sites which have been declared surplus and can be used to reduce the costs of facility needs identified in this report.

Based on the preceding four paragraphs, there are no local funds available to reduce costs to accommodate students from future new residential development.

⁸ See Government Code Section 65995.5 (c)(2) and 65995.5 (f).

B. Collection of Level 3 Fees if State Funds for the New Construction Program Are Not Available.

The Visalia Unified School District has the option of levying a fee approximately two times⁹ that shown above in the event state funds for new construction are not available, as provided by Government Code Section 65995.7.

The Level 3 fee is calculated by the preceding methodology to be:

Level 3 Fee Calculation

	<u>Amount</u>
Total Facility Needs based on 50% allowance:	\$30,669,441
Total Facility Needs based on 100% allowance:	\$61,338,882
Local Funds Available:	\$0
Net Facility Needs due to residential development:	\$61,338,882
Area of projected residential units:	5,571,306
Level 3 Fee per square foot:	\$11.01

Level 3 fees greater than the Level 2 amount may need to be reimbursed if an agreement is established and State funds subsequently become available.

In certain cases, builders and buyers of qualifying affordable housing, may be eligible for State reimbursement of the difference between Level 2 and Level 3 fees.

In the case where the SAB declares it is out of funds for new construction projects, the District would need to take action in order to be able to collect Level 3 fees.

⁹ This amount is approximate due to the formula imposed by statute.

Chapter 5: Nexus Between Fees and Projects Subject to Fees

California law allows school districts that have demonstrated a need for new or expanded school facilities to assess a fee on each building permit issued within its territory¹⁰. The fee can only be used to offset the capital cost needed to serve students from projects subject to the fee. (A small amount may be used for administering the fee program.) Other means of funding school building projects are available, and many residential developments provide funding for new or expanded schools by arrangements not based on this statutory authority.

A. Procedural Requirements for School Facility Fees

Before levying any fee, a school district or other public agency must show a connection between the fee and the project or activity that must pay the fee, and further must show that the fees will be used to alleviate a cost or burden caused by that development activity. Statutory and case law is clear that fees may not be used to address general or unrelated needs of the public agency. These justification requirements are sometimes known as the "Nexus tests" or "AB 1600" criteria. A nexus test demonstrates the linkage or closeness of the fee and its use to the activity causing the need. AB 1600 is shorthand for the procedural requirements found in the Government Code to levy any fee on a development project in California.¹¹.

Later sections of this chapter will address each of the statutory tests and evaluate whether School Facility Fees at the adjusted rate meet the necessary legal requirements. The facts and analyses in this document are presented for use by the governing board of this school district when making the findings needed to adopt a resolution levying a fee.

B. Background and Current Conditions in the District

The Visalia Unified School District has experienced housing development over the past ten years and anticipates additional impacts will result from continuing development of new homes, as discussed earlier in this report. Earlier sections have discussed school expansion and construction projects to accommodate students from the new homes.

Combining the preceding factors has established a cost to accommodate new students from residential developments of \$11.01 per square foot, the local one-half share of which is **\$5.50** per square foot. Fees under other statutes apply to commercial and senior housing projects.

¹⁰ See Calif. Education Code Section 17620, *et seq.* and Government Code Section 65995, *et seq.*

¹¹ See Govt. Code Section 66000, *et seq.*, also known as the Mitigation Fee Act. (Assembly Bill 1600 was the law that codified and reorganized these requirements.)

C. Specific Criteria for Levy of School Facility Fees

Various specific criteria must be satisfied to impose Level 2 School Facility Fees. The following discussion will show that the proposed Alternate fees meet these criteria.

1. Purpose of the Fee: Government Code Section 66001(a)(1)

School Facility Fees may be levied "for the purpose of funding the construction or reconstruction of school facilities"¹². Fees may not be used for regular maintenance, routine repair, inspection or removal of asbestos containing materials, or purposes of deferred maintenance, as defined¹³.

Level 2 School Facility Fees shall be used by this school district for the construction of school facilities at existing and future campuses. Specific uses and examples were listed in Chapter 3.

2. Uses to Which the Fee will be Put: Section 66001(a)(2)

Specific uses may include but are not limited to: the design of new construction projects, acquisition of land, construction of new permanent buildings, placement of modular classrooms on a short term or long term basis, modernization and/or reconstruction projects, necessary permit and plan checking fees, testing and inspection costs, necessary furnishing and equipment, and related costs of construction projects. In addition, fees will be used for the lease of interim school facilities pending availability of newly constructed, modernized or reconstructed facilities. Fees may be used for the legal and administrative costs of establishing and administering the fee program and for planning needed new schools to serve growth areas.

Facilities that may be affected include those projects listed in Chapter 3 and all existing properties owned by the District and future sites to be acquired for school purposes.

In addition, Government Code Section 65995.5 (f) requires that "A fee, charge, dedication, or other requirement . . . shall be expended solely on the school facilities identified in the needs analysis as being attributable to projected enrollment growth from the construction of new residential units." This requirement is met by tracking the use of the fees in a specific accounting fund and is made public through an annual report to the school board that documents the use of such fees.

¹² Educ. Code 17620(a)(1)

¹³ Educ. Code 17620(a)(3)

3. Reasonable Relationship Between Use of Fee and Type of Project on Which Fee is Levied: Section 66001(a)(3)

For residential projects, the relationship of new homes to public school enrollment is demonstrated by the students living in the new homes. Yield data from recently built housing in the District confirms this relationship. Housing projects that prohibit occupancy by school age children typically are exempt from Level 2 Fees¹⁴.

4. Reasonable Relationship Between the Need for the Public Facility and Type of Project: Section 66001(a)(4)

This section will show: (1) that additional school facilities are needed to accommodate students from projects subject to the fee, (2) the school facility construction/reconstruction projects identified are reasonable given the need created by the projects subject to the fee, and (3) that no other funding source is available or expected which will preclude the need for fees on new development projects.

a. Need for additional school facilities

Enrollment projections show that existing facilities will continue to be needed to serve existing students and enrollment other than from new development. There is insufficient space available for students from residential development without planning, designing, and constructing additional school facilities.

b. Reasonableness of the Identified Projects

The number of students expected clearly indicates the need for new school facilities. The District has considered and rejected temporary measures such as long-term use of temporary classrooms at existing schools, converting schools to a multi-track calendar, and other means of avoiding construction that will adversely affect the existing students and the community.

c. Alternative Funding for the Identified Projects

Other funding sources are not available or reasonably expected for the projects needed to accommodate students from new housing. Current balances in the fee fund are pledged to current projects or paying off earlier expansion, modernization, improvement, or other projects. Other funding sources are required to meet existing non-development related facility needs, including modernization/renovation of existing schools,

¹⁴ Generally, this requires a specific deed restriction.

replacement of existing portable classrooms, or other needs of the school district.

5. Reasonable Relationship Between Amount of Fee and Cost of Facility Attributable to Development Paying Fee: Section 66001(b)

This test requires that the public agency show two relationships: (1) that the amount of the fee is properly based on the portion of the needed facility that is attributable to new development, and (2) that the amount of the expected fees from new development be feasible to have the needed project financed and built.

a. Amount attributable to residential development

Preceding discussion has shown that new school facilities are needed to serve students expected from future new homes. The financial analysis is based on costs per pupil so that total costs may be prorated or allocated between new development and any other causes.

b. Feasibility of funding project

The cost of needed new facilities to serve students is greater than may be funded by fees alone. The school district will seek additional funding or reductions in cost from all sources. It is anticipated that bond funds, state funds, existing agreements with builders, other local funds, and future state reimbursement will provide sufficient funding to build the needed school projects. Funding, including borrowing based on fees expected more than five years in the future, may be used to allow projects to begin construction to better meet student housing needs.

6. Fees collected for projects more than five years in future: Section 66001(d)

It is not expected that any fees will remain unspent and held for projects more than five years after collection. School district staff will monitor requirements of this section through their annual reports on fees collected and spent.

7. Fees that are conditions of approval: Section 66005(a)

This section requires that fees imposed as a condition of approval of a development or a development project not exceed the "estimated reasonable cost of providing the service or facility for which the fee or exaction is imposed". Fees levied for school facility purposes by this school district are based on the actual cost of needed facilities and will not exceed the estimated reasonable cost of the facilities for which they are imposed.

8. Time of payment of School Facility Fees: Section 66007

School Facility Fees for this school district will be collected either prior to issuance of a building permit or upon issuance of the certificate of occupancy. An account has been established, ongoing appropriations have been made of funds for planning, design, or construction of needed facilities, and a proposed construction schedule or plan has been adopted. Except as modified by other documentation of the school district, the construction schedule for the needed school facilities identified in this plan will be within the next five years.

9. Exemption for project to replace damaged buildings due to a Natural Disaster: Govt. Section 66011 and Education Code Section 17626

This school district will not levy fees on projects statutorily exempt as replacements for structures damaged or destroyed by a natural disaster as determined by the Governor.

10. Fees on Commercial, Industrial, and Agricultural Projects: Education Code Sections 17621, 17622

This section does not apply as Level 2 Fees are not imposed on commercial, industrial, or agricultural construction projects.

D. Notice of Change and Time of Implementation

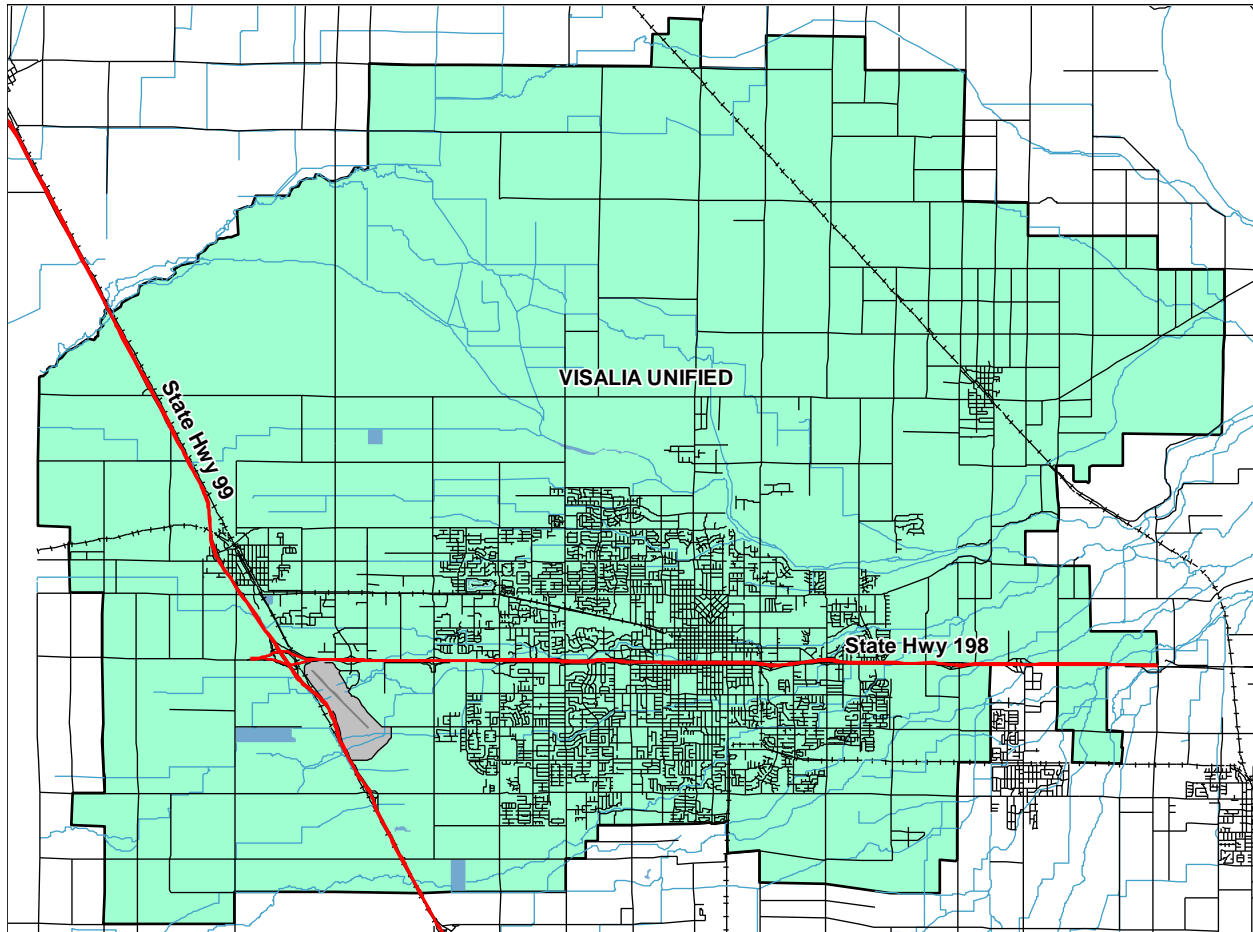

Following action of the governing board to adopt a resolution establishing rates for Level 2 Fees, staff will transmit a copy of the resolution and a map of the District's boundaries to the planning/building departments of the county and all cities which are served by the District informing those agencies of the revised amounts and the effective date of the new fees. The effective date of the fees shall be immediately upon action of the Governing Board¹⁵.

E. Conclusion

Compliance with the preceding nexus requirements establishes that the Visalia Unified School District is eligible to impose these fees authorized by State law. The following map shows the geographic area for which the District is authorized to collect these fees.

¹⁵ See Government Code Section 65995.6(f).

F. District Map

Chapter 6: Findings and Conclusions

Based on the preceding analysis, the following Conclusions are submitted for the Board's review and consideration.

- A. The Visalia Unified School District has applied for and been found to be eligible for New Construction funding from the State School Facilities Program.**
- B. The Visalia Unified School District has completed a School Facilities Needs Analysis, and properly adopted that Analysis after providing public notice, responding to comments, and taking action as prescribed by law.**
- C. The Visalia Unified School District meets at least two of the four tests required by Government Code Section 65995.5 (b)(3):**
 - a. The District has passed a local bond in the past four years,
 - b. The District has capital facility debt in an amount that exceeds 15% of the District's bonding capacity.
 - c. The District has over 20% of its classrooms as portable classrooms.
- D. Fees collected under authority of Section 65995.5 or Section 65995.7 shall be expended as required by statute.**
- E. The District has met necessary nexus and notice requirements.**
- F. A Level 2 "Alternate" fee is justified in the amount of \$5.50 per square foot of residential development.**

Respectfully Submitted,

Ken Reynolds
SchoolWorks, Inc.
