## **Chapter 1: Executive Summary**

The Visalia Unified School District is a school district serving the general vicinity of the City of Visalia in Tulare County, California. The District serves students in grades kindergarten through twelve.

Enrollment in grades TK-12 for the current school year (2020/21) was 28,884 students at the time of the official enrollment census taken in the fall. Many schools are operating close to maximum capacity, and some schools are over design capacity and rely on portables to temporarily accommodate students. Projects are being planned and developed to provide additional space.

Residential development is projected to add 2,454 new housing units in the next five years. This pace is based on recent activity and matches the anticipated units used in the demographics study. There were 701 new housing units built in 2020 within the District boundaries.

Applying the methodology prescribed by State law for Level 2 Fees (see next section for a more detailed discussion), this School Facilities Needs Analysis finds the Visalia Unified School District is justified in levying a fee of **\$4.41 per square foot** on residential development subject to the fee. This is an increase of \$0.33 over the current Level 1 rate of \$4.08 per square foot for residential units. The total developer fee rate compared to the Level 2 study approved last year has increased by \$0.25 per square foot. The SAB (State Allocation Board) approved an inflation adjustment for school construction of 1.42% compared to last year.

Expected revenues from development fees in the next five years are projected to be \$22.66 million. This fee will provide up to one-half of the cost of needed school projects, with the other half expected to be provided by the State building program and other local sources. Additional District funds may be required to supplement these fees to provide for the actual construction costs of school projects.

# **Chapter 2: Context and Legal Requirements**

This document, the Visalia Unified School District's School Facilities Needs Analysis, exists to fulfill a statutory requirement established by the California Government Code. A school district must prepare or have prepared a School Facilities Needs Analysis (SFNA) as a prerequisite to imposing "Alternate" fees on new housing to provide funding for additional school facilities needed to accommodate students anticipated from new homes.

The SFNA is not used to justify other forms of fees or mitigation agreements, and is not a facilities plan or financing study for the school district. Its purpose is narrowly defined and this document should be used only to fulfill statutory requirements for the stated fees.

#### A. History and Context of SB 50 School Facility Fees

Senate Bill 50 (SB 50)<sup>1</sup> was passed during the 1998 session of the California Legislature as a comprehensive restructuring of the state's school facility construction and funding process. Parts of the legislation became effective when the state's voters approved Proposition 1-A, a \$9.2 billion school and university construction/modernization bond<sup>2</sup>.

SB 50 also changed the legal process whereby builders of new homes could be required to pay for new or expanded schools to serve the new homes. A spectrum of local ordinances, policies, and requirements were largely replaced with a statewide, three-tier system. In this new system, tiers or levels are:

- Level 1: similar to 1986 fee structure, now 4.08 per sq. foot<sup>3</sup>
- Level 2: up to 50% of the State allowed cost for construction and sites, if the school district meets specified eligibility tests<sup>4</sup> (assumes State pays other 50% of cost.)
- Level 3: same as Level 2, but includes State's 50% share only when the State declares it is out of funds for new construction<sup>5</sup>

Level 2 Fees are new grants of authority to school districts, but are counterbalanced by a firm prohibition on other local fees and other requirements on housing developments. Level 2 Fees are referred to by the Legislation as "Alternate" fees.

A significant change with the current fee program is the local school district's ability, if it meets the eligibility tests, to impose a Level 2 fee without involving the city or county having control of land use approvals within the school district.

<sup>&</sup>lt;sup>1</sup> Chapter 407, Statutes of 1998

<sup>&</sup>lt;sup>2</sup> Statewide Proposition 1-A, November 3, 1998

<sup>&</sup>lt;sup>3</sup> Rate effective January 22, 2020

<sup>&</sup>lt;sup>4</sup> See Calif. Government Code Section 65995.5

<sup>&</sup>lt;sup>5</sup> Level 3 fees are currently not allowed

Many other changes to the school building process occurred with the passage of SB 50 and Proposition 1-A. This report focuses only on fees, but these changes should be viewed in the context of the amended system.

#### **B.** Legal Requirements to Impose Alternate Fees

For a school district to impose Level 2 Fees, it must meet a number of eligibility tests specified in SB 50. The Visalia Unified School District has satisfied these requirements.

#### **1.** Apply for New Construction funding to establish a baseline capacity

The Visalia Unified School District has submitted its documents to OPSC for new construction and has had its eligibility baseline established. The District has applications in process and will apply for new construction funding as projects arise.

#### 2. Be eligible for New Construction funding

The Visalia Unified School District has been determined by the Office of Public School Construction and the State Allocation Board to be eligible for new construction funding.

#### **3.** Satisfy two of the four following tests:

- a. Have substantial enrollment<sup>6</sup> on Multi-Track calendar
- b. General Obligation bond in past four years with at least 50% yes vote
- c. Have issued debt or incurred obligations used for capital outlay equal to 15% of district's bonding capacity<sup>7</sup>
- d. Use relocatable (portable) classrooms for at least 20% of the district's total classrooms.

<sup>&</sup>lt;sup>6</sup> Generally defined as 30% of the District's K-6 enrollment; special rules for 9-12 districts. <sup>7</sup> If the debt includes landowner voted Melle Base debt enground after 11/4/08, then the the

If the debt includes landowner-voted Mello Roos debt approved after 11/4/98, then the threshold level is 30% rather than 15%.

The Visalia Unified School District satisfies at least two of these four tests:

- (b) The District passed Measure A a \$105.3 million local bond on November 6, 2018.
- (c) The existing capital facility debt is over 15% of the bonding capacity. The bonding capacity is \$349,553,821 and the debt is \$134,955,294 for a debt ratio of 38.61%. The debt includes bonds and COP's as shown in the appendix.
- (d) There are 320 portable classrooms of the total 1,265 classrooms in the District (includes Denton Elementary) for a ratio of 25.3%. This count does not include the temporary rented portables. See appendix for classroom inventory.
- 4. Prepare a School Facilities Needs Analysis.

The Visalia Unified School District caused this School Facilities Needs Analysis to be prepared for review and adoption by the School Board.

5. Follow the procedures and process identified in State law.

The Visalia Unified School District will follow the adoption process and procedures as specified in State law.

## **Chapter 3: Data Used in Analysis**

This Chapter presents the data used to calculate the fee. Chapter 4 contains the actual calculation. Many of these data elements are prescribed in State law and are presented as required.

Data elements to be reviewed include:

- A. Pupil-per-Home yield rates
- **B.** Housing projection for the next five years
- C. Enrollment from new homes built in the next five years
- **D.** Available capacity in existing schools
- E. Grant amount per pupil
- F. Site Acquisition and Site Development allowances

#### A. Pupil-per-Home Yield Rates

SB 50 prescribed how pupil-per-home yield rates are to be calculated for a SFNA. The method is to identify homes built in the past five years that are similar to homes expected to be built in the projection period (the next five years).

The Student Yield Rates are to be calculated separately for elementary, junior high, and high school students.

The homes built in the District during the past five years was matched with the data base of students currently enrolled to determine these yield factors. The addresses for the housing units were compared to the student data for 2020/21. The method was to identify as many new homes built within the five-year window that could be mapped in the GIS program. The permits were pulled at least 6 months prior to the date of the student data collection (October 2020) to ensure they could be occupied.

Data is presented as required by grade level group. Two housing types have been shown, Single Family (attached and detached) and Multi Family. Multi Family represent the planned townhouse and apartment units.

	TK-6	7-8	9-12	Total
SF	0.2700	0.0785	0.1611	0.5096
MF	0.1620	0.0471	0.0532	0.2623
Combined	0.2486	0.0721	0.1398	0.4605

Pupil-per-Home yield results:

#### **B.** Housing Projection for Next Five Years

As required by SB 50, new housing units have been projected for the next five years. Data from city and county planners have been used to make the projection shown below along with a review of the historic construction rates.

# New Residential Units in the Next Five Years (2021/22 through 2025/26)

Dwelling Type	<u> 5 Year Total</u>
Single Family	1,967
Multi Family	487
Total	2,454

These projections are estimates and precise numbers in a given year may vary from the table, however the total for the five year period reflects plans approved and in process.

A review of the historic permits pulled for new residential units indicated the average size new housing unit has averaged 2,094 square feet for single family units and 1,171 square feet for multi-family units. These numbers will be used for the average size of the new housing units over the next five years.

#### C. Enrollment from New Housing in Five Years

Multiplying the number of new homes by the pupil-per-home yield rate gives the expected number of pupils from the new homes to be built in the next five years. This approach, which is prescribed in State law, has certain limitations: first, the yield rate is likely to be lower as new homes typically have fewer students soon after construction than will be seen after the neighborhood is established; and second, the five year window minimizes the need for intermediate and high school facilities which often need more than five years of enrollment growth to require a full size facility. As a result, the formula under SB 50 generally understates a school district's long term need.

SB 50 allows a five year projection to be utilized to determine the number of projected students from new residential development. Using this methodology, the District has projected the number of new housing units for the next five years and multiplied by the yield factors to determine the number of students to be projected from new housing.

#### Visalia Unified School District New Students Projected by Grade Level For Development Through 2026

	Student Yields	Studente
	for New	Students
Grade Level	Residential Dev.	Projected
Single Family		1967 Units
TK-6	0.2700	531
7-8	0.0785	154
9-12	0.1611	317
Total	0.5096	1,002
Multi Family		487 Units
TK-6	0.1620	79
7-8	0.0471	23
9-12	0.0532	26
Subtotal	0.2623	128
All Development		2454 Units
TK-6	0.2486	610
7-8	0.0721	177
9-12	0.1398	343
Totals	0.4605	1,130

A total of 1,130 students are projected to be generated by the new housing units.

#### D. Capacity and Space Available for Students from New Residential Units

As calculated by the State's prescribed methodology on form SAB 50-02 and then adjusting for the projects constructed and funded since the baseline was established, a total of 28,995 spaces exist in the District's schools as shown in the following chart.

		<u>TK-6</u>	<u>7-8</u>	<u>9-12</u>	<u>SDC</u>	<u>TOTAL</u>
SB50 Baseline:		10,075	3,051	4,995	91	18,212
School Projects	Project #		Capacity	Added/Gra	nts Funde	d
El Diamante High	1			2,000		2,000
Elbow Creek	2	190				190
Mountain View	3	186				186
Royal Oaks	4	184				184
Four Creeks Elem	5	725			13	738
Oak Grove Elem	8	750			13	763
Cottonwood Creek Elem	12	40	585		13	638
Golden West High	13			162		162
Redwood High	14			41		41
Global Learning Charter	15	34				34
Crowley	16	34				34
Crestwood	17	68				68
Four Creeks	18				22	22
La Joya Middle	19		31			31
Annie R Mitchell Elem	20	750			35	785
Redwood High	21			45		45
Mt Whitney High	22			44		44
Manuel F Hernandez Elem	23	750			35	785
Golden West High	24			23		23
Ivanhoe	25	23				23
Shannon Ranch Elem	26	700				700
VTEC	27			10		10
Redwood High	28			337		337
Ridgeview Middle	29		839		9	848
Riverway Elem	30	675				675
Denton Elem	31	675			13	688
Totals for Completed Proj	ects	5,784	1,455	2,662	153	10,054
Other District funded Project	ts:			729		729
Grand Totals		15,859	4,506	8,386	244	28,995

Project 31, Denton Elem has been submitted to OPSC for funding and is currently on the workload list waiting to be approved. The project has been included in the District capacity.

After determining the enrollment, the number of students must be compared to the District's existing capacity based on the "baseline" capacity total used when applying for State new construction funds. The difference between the students and existing capacity is the "space available". The "unhoused students" generated from the new housing developments are those that remain after accounting for any space available and used to calculate the allowable Level 2 Fees.

#### Visalia Unified School District Unhoused Students from Development Through 2026

	Students From	Current	Space	Capacity	Space	Net Unhoused
Grade Level	New Housing	Enrollment	Needed	per SB 50	Available	Students
	[1]	[2]	[3]	[4]	[5]	[6]
TK-6	604	14,919	14,919	15,859	79	525
7-8	175	4,474	4,474	4,506	32	143
9-12	340	9,202	9,202	8,386	0	340
SDC	11	289	289	244	0	11
Total	1,130	28,884	28,884	28,995	111	1,019

[1] Projected added enrollment through 2026 based on planned residential development.

[2] Based on October enrollment of 20/21 school year.

[3] Space needed within existing facilities to house students living in existing housing units.

[4] Based on SB 50 methodology of capacity calculation.

[5] Space available for students from new developments.

[6] Net unhoused students in 2026 due to new housing developments.

The "Current Enrollment" shown in this table is from the 20/21 school year.

The "Space Needed" shown is based on the current school year enrollment. The result is the number of seats that need to be reserved for students from the existing housing units in the District. This insures adequate seats will be available for the housing units that are already existing within the District. The current and past enrollments are shown on the SAB 50-01 which is included in the appendix.

The "Capacity per SB 50" summarized in this table is from the calculations done on the previous page and is based on State loading standards.

The "Space Available" is determined by comparing the "Space Needed" to the "Capacity per SB 50". If the District has excess capacity, then those seats will be used to reduce the number of unhoused students projected from new developments. Since the total space needed is less than the total district capacity, there is space available for 111 students.

The result of this table is the "Net Unhoused Students" which will be used to determine the costs of the facility needs. Therefore, of the 1,130 new students projected from new developments, there are 1,019 (90,2%) that will need to be housed in new facilities.

#### E. State Construction Grant Amount for Unhoused Pupils from New Housing

When calculating the Level 2 Fees, the number of projected unhoused students is multiplied by the State's new construction grant amount. Those amounts which are shown below are updated annually by the State Allocation Board each January.

State Grant Allowance for New School Projects							
Grade Level	Base Grant	Fire Alarms	Fire Sprinklers	Total			
TK-6	\$12,628	\$15	\$212	\$12,855			
7-8	\$13,356	\$20	\$252	\$13,628			
9-12	\$16,994	\$34	\$262	\$17,290			
SDC	\$23,731	\$45	\$448	\$24,224			

The following chart assumes that 1 % of the new student population generated from new housing units will consist of special education students. This is equal to the current ratio of students who are enrolled in special day classes.

Grade Level	Unhoused <u>Students</u>	Per-Pupil Grant <u>Allowance</u>	Total Grant <u>Cost</u>
TK-6	525	\$12,855	\$6,748,875
7-8	143	\$13,628	\$1,948,804
9-12	340	\$17,290	\$5,878,600
SDC	11	\$24,224	\$266,464
TOTALS	1,019		\$14,842,743

#### Allowable Grant Costs for Projected Unhoused Students

The cost per student amounts include State funded allowances for required fire alarm and sprinkler requirements for new school projects as of January 2021.

#### F. Site Acquisition and Site Development Grant Allowance

#### 1. <u>Eligible Site Acquisition Costs</u>

When calculating the Level 2 Fees, the grant totals listed above are added to half the estimated site acquisition costs that are projected for the next five years, and eligible site development costs. The following table shows the total acres needed based on the CDE (California Department of Education) standards for site sizes.

Site Needs					
Average Size Schools		Projected	Equivalent	Site	
			Unhoused	Sites	Acres
	Acres	<u>Students</u>	Students	Needed	Needed
Elementary	10	600	525	0.875	8.75
Middle	20	800	143	0.179	3.58
High	40	1500	340	0.227	9.07
				TOTAL	21.40

For purposes of calculating the Level 2 fee, the District will need 21.4 acres of additional land. The site costs are based on acquisition at \$154,505 per acre for sites useable for school purposes based on Department of Education standards. This per acre value is based on the average price paid for the last two new elementary schools.

#### 2. <u>Eligible Site Development Costs</u>

SB 50 allows the inclusion of site development costs in the fee calculation. These costs are limited to one half of the actual or estimated service site improvements, off site improvements and utility costs which would be allowed by the State Allocation Board. These improvements can include applicable drainage, utility and road improvements. In addition, the SAB has a grant that provides for general site development costs which is based on a per acre value in addition to a percentage of the projects pupil grant allowance (see Grants on page 10).

The development costs were derived from historical project costs funded by the State. The average amounts totaled \$271,725 for elementary, \$255,639 for junior high and \$298,105 for high schools. The total need is for 21.4 acres developed at a cost of \$5,996,594. The 50% eligible site development costs that can be included in the Level 2 computation totals \$4,180,461 and includes the allowance for general site development costs of \$1,182,165. The following figure summarizes the site acquisition and development costs.

						Total
	Acres	Land		Development		Site
	Needed	Cost/Acre	Land Cost	Cost/Acre	Dev. Cost	<u>Needs</u>
Elementary	8.75	\$154,505	\$1,351,918	\$271,725	\$2,377,594	\$3,729,512
Middle	3.58	\$154,505	\$553,128	\$255,639	\$915,188	\$1,468,315
High	9.07	\$154,505	\$1,401,360	\$298,105	\$2,703,812	\$4,105,172
Totals	21.40		\$3,306,406		\$5,996,594	\$9,302,999
	Ę	50% portion:	\$1,653,203		\$2,998,297	
General Site	Developr	nent				
		Allowance/				
	Acres	Acre	Base Cost	<u>% Allowance</u>	Added Cost	Total Cost
Elementary	8.75	\$20,554	\$179,848	6%	\$404,933	\$584,781
Middle	3.58	\$20,554	\$73,583	6%	\$116,928	\$190,511
High	9.07	\$20,554	\$186,425	3.75%	\$220,448	\$406,873
Totals	21.40					\$1,182,165
Total 50% Site Development Costs:						\$4,180,461
Total 50% Land & Development Costs:						\$5,833,664

#### COST OF SITES NEEDED

The "Added Cost" column was determined by multiplying the percentage allowance by the total student grants for each grade shown on page 10.

#### G. Projects to be Financed with Level 2 Fees

Fees collected in the next five years will be spent on known and future school construction projects. Projects may include but are not limited to the following:

- 1. New school facilities
- 2. Land for new schools
- 3. Additional land needed at existing schools
- 4. New classrooms at existing schools
- 5. Additional support facilities at existing campuses to accommodate increased enrollments
- 6. Portables used for interim housing needs

The District may use the fees to make the annual COP payments due to previous projects that have been financed. As provided by State law, fees may be used for the reasonable administrative costs of collecting the fees, and for legal and other costs of justifying and imposing the fees.

# **Chapter 4: Calculation of Level 2 Fee**

This Chapter applies the data identified above and calculates the fee justified. The process follows requirements of SB 50 as enacted in the Government Code and Education Code.

After figuring the aggregate projected costs, the total was divided by the number of projected square footage of the new residential units to derive the per square foot assessment amount. Based on these calculations, the Level 2 fee within the Visalia Unified School District for the next 12 months is calculated to be **\$4.41** per square foot, for residential units.

#### Visalia Unified School District SB 50 Level 2 Fee Determination

	Base Need		Land Acquisition & Site Development				
	Unhoused	Cost per	Total	Land	Site	Total Land &	
Grade Level	Students	Student	Cost	Acquisition	Development	Site Dev.	Total Need
		[1]		[2]	[3]	[4]	
TK-6	525	\$12,855	\$6,748,875	\$675,959	\$1,773,577	\$2,449,536	\$9,198,411
7-8	143	\$13,628	\$1,948,804	\$276,564	\$648,105	\$924,669	\$2,873,473
9-12	340	\$17,290	\$5,878,600	\$700,680	\$1,758,779	\$2,459,459	\$8,338,059
SDC	11	\$24,224	\$266,464	\$0	\$0	\$0	\$266,464
Totals	1,019		\$14,842,743	\$1,653,203	\$4,180,461	\$5,833,664	\$20,676,407

#### New Housing Unit Area

Unit Type	Number of Units	Area per Unit	Total Area
Single Family Multi Family	1,967 487	2,094 1,171	4,118,898 570,277
Totals	2,454		4,689,175

	Level 2 Fee \$ /Sq. Ft.
Grades TK-12 Amount:	\$4.41

[1] Cost per student per SB 50 allowance for new construction projects.

[2] Equals one half of the estimated land acquisition costs.

[3] Equals one half of the estimated site development costs including general site development costs.

[4] Total cost assumes 21.40 acres to be acquired.

The grant amounts shown include the amounts allowed by OPSC for fire alarms and sprinklers as of January 2021.

#### A. Reduce Cost by Other Available Funds, Including Owned Sites

SB 50 requires that the cost of serving students from new housing be reduced by other available local funds. The Visalia Unified School District potentially has several such sources of funds.

#### 1. Fees on Senior Housing and Commercial/ Industrial Projects

Fees collected on senior housing and commercial or industrial development projects must be used to reduce the Level 2 fee amount, unless the fees are committed to other projects.

The District has applied these revenues to pay the lease/rental cost of portable classrooms that provide space for students from <u>existing</u> housing that accommodates workers in the senior housing projects or commercial/ industrial projects. By entering into such lease agreements, the Governing Board has not dedicated these funds to facilities necessitated by new residential construction subject to Alternate fees<sup>8</sup>.

#### 2. Redevelopment Pass-Thru and Other Agreements

As with the preceding paragraph, the limited funds received from Redevelopment and similar agreements are used to provide capacity for enrollment growth from existing homes plus improvements to schools not related to new housing development. These funds are not available to reduce the cost of providing facilities for students from new residential projects.

#### 3. Voter Approved Bond Measure

The District passed a \$105.3 million local bond in November 2018. The proceeds from that bond will be used for needed modernization projects and possibly for new construction projects to provide relief for the current overcrowding in the high schools. The Districts master plan identified a total need of \$221 million in modernization needs. Therefore, no local bond funds are available to offset costs identified in this report for students projected from new housing units.

#### 4. Surplus Property

The District does not have any land or school sites which have been declared surplus and can be used to reduce the costs of facility needs identified in this report.

Based on the preceding four paragraphs, there are no local funds available to reduce costs to accommodate students from future new residential development.

<sup>&</sup>lt;sup>8</sup> See Government Code Section 65995.5 (c)(2) and 65995.5 (f).

# B. Collection of Level 3 Fees if State Funds for the New Construction Program Are Not Available.

The Visalia Unified School District has the option of levying a fee approximately two times<sup>9</sup> that shown above in the event state funds for new construction are not available, as provided by Government Code Section 65995.7.

The Level 3 fee is calculated by the preceding methodology to be:

#### **Level 3 Fee Calculation**

	<u>Amount</u>
Total Facility Needs based on 50% allowance:	\$20,676,407
Total Facility Needs based on 100% allowance:	\$41,352,815
Local Funds Available:	\$0
Net Facility Needs due to residential development:	\$41,352,815
Area of projected residential units:	4,689,175
Level 3 Fee per square foot:	\$8.82

Level 3 fees greater than the Level 2 amount may need to be reimbursed if an agreement is established and State funds subsequently become available.

In certain cases, builders and buyers of qualifying affordable housing, may be eligible for State reimbursement of the difference between Level 2 and Level 3 fees.

In the case where the SAB declares it is out of funds for new construction projects, the District would need to take action in order to be able to collect Level 3 fees.

<sup>&</sup>lt;sup>9</sup> This amount is approximate due to the formula imposed by statute.

# **Chapter 5: Nexus Between Fees and Projects Subject to Fees**

California law allows school districts that have demonstrated a need for new or expanded school facilities to assess a fee on each building permit issued within its territory<sup>10</sup>. The fee can only be used to offset the capital cost needed to serve students from projects subject to the fee. (A small amount may be used for administering the fee program.) Other means of funding school building projects are available, and many residential developments provide funding for new or expanded schools by arrangements not based on this statutory authority.

#### A. Procedural Requirements for School Facility Fees

Before levying any fee, a school district or other public agency must show a connection between the fee and the project or activity that must pay the fee, and further must show that the fees will be used to alleviate a cost or burden caused by that development activity. Statutory and case law is clear that fees may not be used to address general or unrelated needs of the public agency. These justification requirements are sometimes known as the "Nexus tests" or "AB 1600" criteria. A nexus test demonstrates the linkage or closeness of the fee and its use to the activity causing the need. AB 1600 is shorthand for the procedural requirements found in the Government Code to levy any fee on a development project in California.<sup>11</sup>.

Later sections of this chapter will address each of the statutory tests and evaluate whether School Facility Fees at the adjusted rate meet the necessary legal requirements. The facts and analyses in this document are presented for use by the governing board of this school district when making the findings needed to adopt a resolution levying a fee.

#### B. Background and Current Conditions in the District

The Visalia Unified School District has experienced housing development over the past ten years and anticipates additional impacts will result from continuing development of new homes, as discussed earlier in this report. Earlier sections have discussed school expansion and construction projects to accommodate students from the new homes.

Combining the preceding factors has established a cost to accommodate new students from residential developments of \$8.82 per square foot, the local one-half share of which is **\$4.41** per square foot. Fees under other statutes apply to commercial and senior housing projects.

<sup>&</sup>lt;sup>10</sup> See Calif. Education Code Section 17620, et seq. and Government Code Section 65995, et seq.

<sup>&</sup>lt;sup>11</sup> See Govt. Code Section 66000, *et seq.*, also known as the Mitigation Fee Act. (Assembly Bill 1600 was the law that codified and reorganized these requirements.)

#### C. Specific Criteria for Levy of School Facility Fees

Various specific criteria must be satisfied to impose Level 2 School Facility Fees. The following discussion will show that the proposed Alternate fees meet these criteria.

#### 1. <u>Purpose of the Fee: Government Code Section 66001(a)(1)</u>

School Facility Fees may be levied "for the purpose of funding the construction or reconstruction of school facilities"<sup>12</sup>. Fees may not be used for regular maintenance, routine repair, inspection or removal of asbestos containing materials, or purposes of deferred maintenance, as defined<sup>13</sup>.

Level 2 School Facility Fees shall be used by this school district for the construction of school facilities at existing and future campuses. Specific uses and examples were listed in Chapter 3.

#### 2. <u>Uses to Which the Fee will be Put: Section 66001(a)(2)</u>

Specific uses may include but are not limited to: the design of new construction projects, acquisition of land, construction of new permanent buildings, placement of modular classrooms on a short term or long term basis, modernization and/or reconstruction projects, necessary permit and plan checking fees, testing and inspection costs, necessary furnishing and equipment, and related costs of construction projects. In addition, fees will be used for the lease of interim school facilities pending availability of newly constructed, modernized or reconstructed facilities. Fees may be used for the legal and administrative costs of establishing and administering the fee program and for planning needed new schools to serve growth areas.

Facilities that may be affected include those projects listed in Chapter 3 and all existing properties owned by the District and future sites to be acquired for school purposes.

In addition, Government Code Section 65995.5 (f) requires that "A fee, charge, dedication, or other requirement . . . shall be expended solely on the school facilities identified in the needs analysis as being attributable to projected enrollment growth from the construction of new residential units." This requirement is met by tracking the use of the fees in a specific accounting fund and is made public through an annual report to the school board that documents the use of such fees.

<sup>&</sup>lt;sup>12</sup> Educ. Code 17620(a)(1)

<sup>&</sup>lt;sup>13</sup> Educ. Code 17620(a)(3)

#### 3. <u>Reasonable Relationship Between Use of Fee and Type of Project on Which</u> <u>Fee is Levied: Section 66001(a)(3)</u>

For residential projects, the relationship of new homes to public school enrollment is demonstrated by the students living in the new homes. Yield data from recently built housing in the District confirms this relationship. Housing projects that prohibit occupancy by school age children typically are exempt from Level 2 Fees<sup>14</sup>.

#### 4. <u>Reasonable Relationship Between the Need for the Public Facility and Type</u> of Project: Section 66001(a)(4)

This section will show: (1) that additional school facilities are needed to accommodate students from projects subject to the fee, (2) the school facility construction/reconstruction projects identified are reasonable given the need created by the projects subject to the fee, and (3) that no other funding source is available or expected which will preclude the need for fees on new development projects.

#### a. <u>Need for additional school facilities</u>

Enrollment projections show that existing facilities will continue to be needed to serve existing students and enrollment other than from new development. There is insufficient space available for students from residential development without planning, designing, and constructing additional school facilities.

#### b. <u>Reasonableness of the Identified Projects</u>

The number of students expected clearly indicates the need for new school facilities. The District has considered and rejected temporary measures such as long-term use of temporary classrooms at existing schools, converting schools to a multi-track calendar, and other means of avoiding construction that will adversely affect the existing students and the community.

#### c. <u>Alternative Funding for the Identified Projects</u>

Other funding sources are not available or reasonably expected for the projects needed to accommodate students from new housing. Current balances in the fee fund are pledged to current projects or paying off earlier expansion, modernization, improvement, or other projects. Other funding sources are required to meet existing non-development related facility needs, including modernization/renovation of existing schools,

<sup>&</sup>lt;sup>14</sup> Generally, this requires a specific deed restriction.

replacement of existing portable classrooms, or other needs of the school district.

#### 5. <u>Reasonable Relationship Between Amount of Fee and Cost of Facility</u> <u>Attributable to Development Paying Fee: Section 66001(b)</u>

This test requires that the public agency show two relationships: (1) that the amount of the fee is properly based on the portion of the needed facility that is attributable to new development, and (2) that the amount of the expected fees from new development be feasible to have the needed project financed and built.

#### a. <u>Amount attributable to residential development</u>

Preceding discussion has shown that new school facilities are needed to serve students expected from future new homes. The financial analysis is based on costs per pupil so that total costs may be prorated or allocated between new development and any other causes.

#### b. <u>Feasibility of funding project</u>

The cost of needed new facilities to serve students is greater than may be funded by fees alone. The school district will seek additional funding or reductions in cost from all sources. It is anticipated that bond funds, state funds, existing agreements with builders, other local funds, and future state reimbursement will provide sufficient funding to build the needed school projects. Funding, including borrowing based on fees expected more than five years in the future, may be used to allow projects to begin construction to better meet student housing needs.

#### 6. <u>Fees collected for projects more than five years in future: Section 66001(d)</u>

It is not expected that any fees will remain unspent and held for projects more than five years after collection. School district staff will monitor requirements of this section through their annual reports on fees collected and spent.

#### 7. <u>Fees that are conditions of approval: Section 66005(a)</u>

This section requires that fees imposed as a condition of approval of a development or a development project not exceed the "estimated reasonable cost of providing the service or facility for which the fee or exaction is imposed". Fees levied for school facility purposes by this school district are based on the actual cost of needed facilities and will not exceed the estimated reasonable cost of the facilities for which they are imposed.

#### 8. <u>Time of payment of School Facility Fees: Section 66007</u>

School Facility Fees for this school district will be collected either prior to issuance of a building permit or upon issuance of the certificate of occupancy. An account has been established, ongoing appropriations have been made of funds for planning, design, or construction of needed facilities, and a proposed construction schedule or plan has been adopted. Except as modified by other documentation of the school district, the construction schedule for the needed school facilities identified in this plan will be within the next five years.

#### 9. <u>Exemption for project to replace damaged buildings due to a Natural</u> <u>Disaster: Govt. Section 66011 and Education Code Section 17626</u>

This school district will not levy fees on projects statutorily exempt as replacements for structures damaged or destroyed by a natural disaster as determined by the Governor.

#### 10. <u>Fees on Commercial, Industrial, and Agricultural Projects: Education Code</u> <u>Sections 17621, 17622</u>

This section does not apply as Level 2 Fees are not imposed on commercial, industrial, or agricultural construction projects.

#### D. Notice of Change and Time of Implementation

Following action of the governing board to adopt a resolution establishing rates for Level 2 Fees, staff will transmit a copy of the resolution and a map of the District's boundaries to the planning/building departments of the county and all cities which are served by the District informing those agencies of the revised amounts and the effective date of the new fees. The effective date of the fees shall be immediately upon action of the Governing Board<sup>15</sup>.

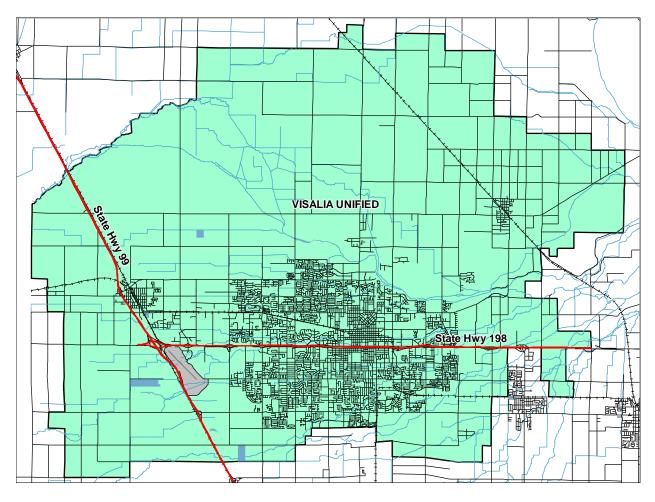

#### E. Conclusion

Compliance with the preceding nexus requirements establishes that the Visalia Unified School District is eligible to impose these fees authorized by State law. The following map shows the geographic area for which the District is authorized to collect these fees.

<sup>&</sup>lt;sup>15</sup> See Government Code Section 65995.6(f).

### F. District Map

## **Chapter 6: Findings and Conclusions**

Based on the preceding analysis, the following Conclusions are submitted for the Board's review and consideration.

- A. The Visalia Unified School District has applied for and been found to be eligible for New Construction funding from the State School Facilities Program.
- B. The Visalia Unified School District has completed a School Facilities Needs Analysis, and properly adopted that Analysis after providing public notice, responding to comments, and taking action as prescribed by law.
- C. The Visalia Unified School District meets at least two of the four tests required by Government Code Section 65995.5 (b)(3):
  - a. The District has passed a local bond in the past four years,
  - b. The District has capital facility debt in an amount that exceeds 15% of the District's bonding capacity.
  - c. The District has over 20% of its classrooms as portable classrooms.
- D. Fees collected under authority of Section 65995.5 or Section 65995.7 shall be expended as required by statute.
- E. The District has met necessary nexus and notice requirements.
- F. A Level 2 "Alternate" fee is justified in the amount of \$4.41 per square foot of residential development.

Respectfully Submitted,

Cynelle

Ken Reynolds SchoolWorks, Inc.

I certify, as the District Representative, that the information reported on this form and, when applicable, the High School Attendance Area Residency Reporting Worksheet attached, is true and correct and that:

• I am designated as an authorized district representative by the governing board of the district.

• If the district is requesting an augmentation in the enrollment projection pursuant to Regulation Section 1859.42.1 (a), the local planning commission or approval authority has approved the tentative subdivision map used for augmentation of the enrollment and the district has identified dwelling units in that map to be contracted. All subdivision maps used for augmentation of enrollment are available at the district for review by the Office of Public School Construction (OPSC).

• This form is an exact duplicate (verbatim) of the form provided by the Office of Public School Construction. In the event a conflict should exist, then the language in the OPSC form will prevail.

#### NOTE 6 - LONG-TERM LIABILITIES (Continued)

<u>Capitalized Lease Obligations</u>: The District leases a building, print shop, and buses under agreements which provide either (a) for title to pass upon expiration of the lease period or (b) provide the District with a purchase agreement upon the expiration of the lease period. As of June 30, 2020, the historical cost of capital assets acquired in connection with the leases totaled \$2,451,993 and the accumulated depreciation was \$633,979.

Future yearly payments on the capitalized lease obligations are as follows:

Year Ending		Lease	
<u>June 30,</u>	<b>Payments</b>		
2021	\$	527,824	
2022		527,825	
2023		406,708	
2024		126,196	
2025		63,098	
Total payments		1,651,651	
Less amount representing interest		(70,714)	
Net present value of minimum lease payments	\$	1,580,937	

<u>Schedule of Changes in Long-Term Liabilities</u>: A schedule of changes in long-term liabilities for the year ended June 30, 2020 is shown below:

Governmental Activities	Balance June 30, 2019 Additions Deletions			<u>Deletions</u>	Balance June 30, 2020			Amounts Due Within <u>One Year</u>		
Debt:										
General Obligation Bonds	\$	53,919,971	\$	-	\$	785,000	\$	53,134,971	\$	1,595,000
Unamortized premiums		4,543,170		-		168,981		4,374,189		172,452
Accreted interest		3,537,425		718,709		-		4,256,134		
Certficiates of Participation		74,950,000				1,760,000		73,190,000		1,885,000
Capitalized lease obligations		1,571,208		590,000		580,271		1,580,937		494,767
Other Long-Term Liabilities:										
Net pension liability (Note 8 & 9)		312,875,000		15,244,000		-1		328,119,000		-
Net OPEB Liability (Note 10)		91,005,465		-		5,943,125		85,062,340		-
Compensated absences		873,170		143,629		-		1,016,799		-
	\$	543,275,409	\$	16,696,338	\$	9,237,377	\$	550,734,370	\$	4,147,219
