

Air Quality
Change in Athletic Competition Participation Guideline

On days when air quality/heat may impact athletic events:

1. At 1:30, a heads-up to athletic directors regarding potential for cancellation of events
2. At 2:30, the decision will be announced regarding cancellation of athletic events starting at 4:30 or earlier. This announcement will be the final call for middle school athletic events
3. At 4:30, the decision will be announced regarding the cancellation of athletic events starting at 5:00 or later

Sudden dangerous air quality changes may occasionally occur- should this happen after the final decision, it is the officials responsibility to cancel the game; cancelling practice will be sent to ADs from the district office

See RAAN air quality guidelines for specific outdoor activity per air quality level
