

New to CoxHealth?

Welcome! Our door is open.

The **WELCOME CLINIC** ensures that you have uninterrupted care while you're getting started with a new physician. If you have a chronic medical condition or need a prescription refilled before your first regular appointment, the Welcome Clinic is a great place to start.

Is this a walk-in clinic?

No, we see patients by appointment only.

How do I make an appointment?

Just give us a call. A physician referral specialist will book your appointment and help you find a physician who's right for you.

Am I required to get a primary care provider?

You may receive care at the Welcome Clinic before you meet your new physician, but we do ask that you be in the process of establishing care with a CoxHealth provider before you arrive.

Why is that?

It's important to build a relationship with someone who knows your medical history, and helps you recognize health problems before they become serious.

We look forward to meeting you!
