APPENDIX B

<u>Please Sign and return each form to the Athletics Office or to the Athletic Trainer's office.</u>

**The student athlete will not be allowed to participate in athletics until every form is turned in. The forms needed are listed below. **

- 1. Marple Newtown Athletic Code of Conduct
- 2. Marple Newtown Emergency Medical / Consent Form
- 3. Understanding Non-medical/Misuse of Prescription Medications
- 4. PIAA CIPPE Sect. 1-6 (Must be signed by a Doctor after June 1, 2023 to be valid for 2023/2024 school year.
- 5. Marple Newtown Activity Fee Form

Physical Examinations

No student shall be eligible to represent his/her school in any interscholastic athletic contests unless he/she has been examined by a licensed physician of medicine before his/her first sports season of the academic year. Before each subsequent sports season of the same academic year, he/she will need to be re-certified by either a parent or physician in order to confirm that his/her condition is satisfactory before he/she begins to train or practice for the intended sport. All physical exam information will be kept on file in the athletic office.

<u>Sections I-V (1-5)</u> of the physical form must be filled out by a parent prior to a physical being given by a physician. <u>Section VI (6)</u> of the physical form is filled out by the physician.

*** THE PHYSICAL MUST BE Authorized AFTER JUNE 1, 2023 TO BE VALID FOR THE 2023--2024 YEAR. ***

Season 2 and/or season 3 participation requires recertification by:

Re-certification by parent: This option is afforded to student athletes who finish their previous season deemed healthy by our athletic trainer. A parent can fill out <u>Section VII (7)</u> of the physical form to certify that there has been no change in the medical condition of their child since the date of their last physical.

Re-certification by a physician: This is required for any student athlete who finishes the previous season as an injured member of the team or any student who suffers an injury or change to their medical condition between seasons. Section VIII (8) must be filled out by a physician in order to certify that the student is deemed fit to participate in the new season.

MARPLE NEWTOWN SCHOOL DISTRICT

Marple Newtown Athletic Code of Conduct

As a member of the Athletic Program in the Marple Newtown School District, I realize that participation in extracurricular activities is a privilege that must be upheld. I have read the student athlete/parent handbook and understand that I am required to meet the academic requirements put forth by the district, and also those requirements outlined by the coaches of the programs in which I am involved.

Any student posting things via a social media outlet must adhere to our Athletic Code of Conduct in addition to any school rules that may apply. It is imperative that any social media correspondences fall under the guidelines of sportsmanship and fair play. Please use good judgment when posting anything on one of these outlets. Those found in violation of the above will jeopardize participation in and/or attendance of an extracurricular event.

In addition, as a member of the athletic department in the Marple Newtown School District, I am expected to model our "Six Pillars of Character": hard work, sportsmanship, integrity, citizenship, respect and responsibility. Any actions that would be contrary to those six pillars will jeopardize my participation in the athletic program.

I have read the above and agree to the terms discussed. I will strive to maintain "Tiger Pride" and display character in all aspects of my life as a student athlete in the Marple Newtown School District.

Sports Injuries and Prescription PainKillers Understanding Non-medical/Misuse of Prescription Medications

Prescription Medications

- The class of prescription drugs most commonly prescribed for pain is opioids, such as Vicodin, Percocet, Codeine, Demerol
 or Oxycontin. Under a doctor's orders, these medications can be very helpful. But if used improperly, they can be
 dangerous.
- Most individuals who misuse prescription medications, particularly teens, believe these substances are safer than illegal
 drugs because they are prescribed by a doctor. Doctors take into account things like the patient's age, weight, and medical
 history; the drug's form, dose, and possible side effects; and the potential for addiction, when prescribing medications.
- 70% of people 12 and older who abuse prescription drugs get them from family and friends, and 60% of teens who have abused prescription painkillers have done so before the age of 15.

What is Addiction?

- Addiction is a disease characterized by compulsive drug seeking behavior regardless of the consequences. As the illness
 progresses, an addicted person needs more of the drug, the illness becomes harder to treat, and the risk of overdose
 increases
- Misusing medication can lead to serious consequences including addiction, other substance use, criminal activity, death.
- People who misuse painkillers might not understand how these factors interact and put them at risk for serious negative
 consequences. Additionally, mixing prescription opioids with alcohol or other drugs is the leading cause of overdose death
 in Delaware County.

It is important for parents/guardians to be aware of what substances your student athlete may be exposed to or using during the season. What are the signs and symptoms you should look for?

Signs of use

- Anxiety/Irritability
- Insomnia
- Long periods of sleep
- Loss of appetite/nausea
- Watery eyes
- Chills
- Depression
- Disorientation
- Pinpoint pupils

Signs of dependency

- Change in personality
- Social withdrawal
- Change in daily habits
- Neglect responsibilities
- Forgetfulness
- Increased sensitivity
- Change in appearance
 - Receiving lower grades Increased absence

Signs of overdose*

*If you see any of these signs, consider this an emergency and call 911 immediately.

- May not awaken when aroused
- Cold. clammy skin
- Blue lips, face, hands
- Struggle for breath
- Elevated body temperature
- Vomiting
- Behaving irrationally/confused

Take Action! What can you do if your athlete is prescribed medication?

- 1. Know \rightarrow Know what medications your athlete is using and the signs of use, dependency, and overdose.
- 2. Monitor → The adult in the household should maintain possession of the medication and closely monitor the dosage and refills. Although most youth are capable of self-administering over-the-counter painkillers, prescription opiates should be closely supervised by an adult. Set clear rules with your medications! Never share, take more than prescribed, or mix with other drugs.
- 3. Talk → Discuss the dangers of prescription medications with your athlete. Emphasize that just because they are prescribed by a doctor, it does not make them safe!
- 4. Lock Your Meds → Keep all prescription medications locked up to keep your family and friends safe! When the prescription is no longer needed, dispose of the unused medication at any Delaware County Drop Box locations (visit www.co.delaware.pa.us/heroin for locations).

I have reviewed and understand the symptoms and warning signs of prescription drug misuse.

Marple Newtown School District Extracurricular Activity Fee

Marple Newtown High School
120 Media Line Road
Newtown Square, PA 19073
Athletic Office: 610-359-4232
Chris Gicking, Athletic Director grades 6-12
cgicking@mnsd.org

Paxon Hollow Middle School 815 Paxon Hollow Road Broomall, PA 19008 Athletic Office: 610-359-4337 Julie Rufo, Assistant Athletic Director grades 6-12 jrufo@mnsd.org

The established Activity Fee for this school year is \$75.00. This once a year fee entitles the student to participate in multiple activities. There is a maximum fee of \$150 per family from grades 6-12. If you have children at both the HS and MS, please send payment to the HS Athletic office.

Activities that will be assessed fees include all interscholastic school sports; band, chorus and orchestra; all students involved in the production of school plays and musicals; speech team; debate team; Hi-Q; forensics team; mock trial, math club.

The fee is to be paid by the following dates:

Yearly Activities by September 27th

Seasonal Activities: Fall sports/activities - due first day of practice

Winter sports/ Activities-due first day of practice

Spring sports/Activities - due first day of practice

Please note *** If the activity fee is not paid/waiver is not turned in, the student may not participate/try out for that activity or sport.

Please complete this form for the 1st activity of participation with all information requested and submit to the athletic office along with payment made out to Marple Newtown School District. Name of Student: ______ Grade: _____ Name of Siblings: Grades(s) Telephone: On the line below, please list <u>all activities</u> you anticipate your child will be involved in this year. I have reviewed the "Activity Fee Program" and understand that the fee I am paying does not guarantee playing time or control over any conditions of the team or program, and is not refundable. In addition, I understand that the fee will not be refunded or pro-rated for a student who becomes injured or ineligible during the season, when a student is removed from a team for academic or disciplinary reasons, when cancelled contests cannot be rescheduled, or when a full allotment of games cannot be scheduled. In addition, I understand that the number of scheduled contests may vary from level to level and from school to school. I also understand that paying the fee does not alter the Student Policies of the Marple Newtown School District, the Athletic Code of Conduct, the regulations of the Pennsylvania Interscholastic Athletic Association, and individual team rules. SIGNATURE OF STUDENT SIGNATURE OF PARENT/ GUARDIAN PARENT/GUARDIAN PRINT NAME

IF FEES ARE NOT PAID BY THE DATES LISTED ABOVE, STUDENTS WILL BE REMOVED FROM THEIR ACTIVITIES UNTIL PAYMENT IS RENDERED.

PIAA COMPREHENSIVE INITIAL PRE-PARTICIPATION PHYSICAL EVALUATION

INITIAL EVALUATION: Prior to any student participating in Practices, Inter-School Practices, Scrimmages, and/or Contests, at any PIAA member school in any school year, the student is required to (1) complete a Comprehensive Initial Pre-Participation Physical Evaluation (CIPPE); and (2) have the appropriate person(s) complete the first six Sections of the CIPPE Form. Upon completion of Sections 1 and 2 by the parent/guardian; Sections 3, 4, and 5 by the student and parent/guardian; and Section 6 by an Authorized Medical Examiner (AME), those Sections must be turned in to the Principal, or the Principal's designee, of the student's school for retention by the school. The CIPPE may not be authorized earlier than June 1st and shall be effective, regardless of when performed during a school year, until the latter of the next May 31st or the conclusion of the spring sports season.

SUBSEQUENT SPORT(S) IN THE SAME SCHOOL YEAR: Following completion of a CIPPE, the same student seeking to participate in Practices, Inter-School Practices, Scrimmages, and/or Contests in subsequent sport(s) in the same school year, must complete Section 7 of this form and must turn in that Section to the Principal, or Principal's designee, of his or her school. The Principal, or the Principal's designee, will then determine whether Section 8 need be completed.

Parent's/Guardian's Signature Date / / Permission to administer emergency medical care: I consent for an emergency medical care provider to administer any emergency medical care deemed advisable to the welfare of the herein named student while the student is practicing for or participating in Inter-School Practices, Scrimmages, and/or Contests. Further, this authorization permits, if reasonable efforts to contact me have been unsuccessful, physicians to hospitalize, secure appropriate consultation, to order injections, anesthesia (local, general, or both) or surgery for the herein named student. I hereby agree to pay for physicians' and/or surgeons' fees, hospital charges, and related expenses for such emergency medical care. I further give permission to the school's athletic administration, coaches and medical staff to consult with the Authorized Medical Professional who executes Section 7 regarding a medical condition or injury to the herein named student. Parent's/Guardian's Signature Confidentiality: The information on this CIPPE shall be treated as confidential by school personnel. It may be used by the school's athletic administration, coaches and medical staff to determine athletic eligibility, to identify medical conditions and injuries, and to promote safety and injury prevention. In the event of an emergency, the information contained in this CIPPE may be shared with emergency medical personnel. Information about an injury or medical condition will not be shared with the public or media without written consent of the parent(s) or guardian(s). Parent's/Guardian's Signature ___

Section 3: Understanding of Risk of Concussion and Traumatic Brain Injury

What is a concussion?

A concussion is a brain injury that:

- Is caused by a bump, blow, or jolt to the head or body.
- Can change the way a student's brain normally works.
- Can occur during Practices and/or Contests in any sport.
- Can happen even if a student has not lost consciousness.
- Can be serious even if a student has just been "dinged" or "had their bell rung."

All concussions are serious. A concussion can affect a student's ability to do schoolwork and other activities (such as playing video games, working on a computer, studying, driving, or exercising). Most students with a concussion get better, but it is important to give the concussed student's brain time to heal.

What are the symptoms of a concussion?

Concussions cannot be seen; however, in a potentially concussed student, one or more of the symptoms listed below may become apparent and/or that the student "doesn't feel right" soon after, a few days after, or even weeks after the injury.

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Bothered by light or noise

- Feeling sluggish, hazy, foggy, or groggy
- Difficulty paying attention
- Memory problems
- Confusion

What should students do if they believe that they or someone else may have a concussion?

- Students feeling any of the symptoms set forth above should immediately tell their Coach and their parents. Also, if they notice any teammate evidencing such symptoms, they should immediately tell their Coach.
- The student should be evaluated. A licensed physician of medicine or osteopathic medicine (MD or DO), sufficiently familiar with current concussion management, should examine the student, determine whether the student has a concussion, and determine when the student is cleared to return to participate in interscholastic athletics.
- Concussed students should give themselves time to get better. If a student has sustained a concussion, the student's brain needs time to heal. While a concussed student's brain is still healing, that student is much more likely to have another concussion. Repeat concussions can increase the time it takes for an already concussed student to recover and may cause more damage to that student's brain. Such damage can have long term consequences. It is important that a concussed student rest and not return to play until the student receives permission from an MD or DO, sufficiently familiar with current concussion management, that the student is symptom-free.

How can students prevent a concussion? Every sport is different, but there are steps students can take to protect themselves.

• Use the proper sports equipment, including personal protective equipment. For equipment to properly protect a student, it must be:

The right equipment for the sport, position, or activity; Worn correctly and the correct size and fit; and

Used every time the student Practices and/or competes.

- Follow the Coach's rules for safety and the rules of the sport.
- Practice good sportsmanship at all times.

If a student believes they may have a concussion: Don't hide it. Report it. Take time to recover.

participating in interscholastic athletics, including the risks associated with continu traumatic brain injury.	ing to compete after a concussion or

Section 4: Understanding of Sudden Cardiac Arrest Symptoms and Warning Signs

What is sudden cardiac arrest?

Sudden cardiac arrest (SCA) occurs when the heart suddenly and unexpectedly stops beating. When this happens blood stops flowing to the brain and other vital organs, SCA is NOT a heart attack. A heart attack may cause SCA, but they are not the same. A heart attack is caused by a blockage that stops the flow of blood to the heart. SCA is a malfunction in the heart's electrical system, causing the heart to suddenly stop beating.

How common is sudden cardiac arrest in the United States?

There are about 350,000 cardiac arrests that occur outside of hospitals each year. More than 10,000 individuals under the age of 25 die of SCA each year. SCA is the number one killer of student athletes and the leading cause of death on school campuses.

Are there warning signs?

Although SCA happens unexpectedly, some people may have signs or symptoms, such as

Dizziness or lightheadedness when exercising;

Fatigue (extreme or recent onset of tiredness)

Fainting or passing out during or after exercising;

Weakness:

Shortness of breath or difficulty breathing with exercise, that is not asthma related:

Chest pains/pressure or tightness during or after exercise.

Racing, skipped beats or fluttering heartbeat (palpitations)

These symptoms can be unclear and confusing in athletes. Some may ignore the signs or think they are normal results off physical exhaustion, if the conditions that cause SCA are diagnosed and treated before a life-threatening event, sudden cardiac death can be prevented in many young athletes.

What are the risks of practicing or playing after experiencing these symptoms?

There are significant risks associated with continuing to practice or play after experiencing these symptoms. The symptoms might mean something is wrong and the athlete should be checked before returning to play. When the heart stops due to cardlac arrest, so does the blood that flows to the brain and other vital organs. Death or permanent brain damage can occur in just a few minutes. Most people who experience a SCA die from it; survival rates are below 10%.

Act 73 – Peyton's Law - Electrocardiogram testing for student athletes

The Act is intended to help keep student-athletes safe while practicing or playing by providing education about SCA and by requiring notification to parents that you can request, at your expense, an electrocardiogram (EKG or ECG) as part of the physical examination to help uncover hidden heart issues that can lead to SCA.

Why do heart conditions that put youth at risk go undetected?

- Up to 90 percent of underlying heart issues are missed when using only the history and physical exam;
- Most heart conditions that can lead to SCA are not detectable by listening to the heart with a stethoscope during a routine physical; and
- Often, youth don't report or recognize symptoms of a potential heart condition.

What is an electrocardiogram (EKG or ECG)?

An ECG/EKG is a quick, painless and noninvasive test that measures and records a moment in time of the heart's electrical activity. Small electrode patches are attached to the skin of your chest, arms and legs by a technician. An ECG/EKG provides information about the structure, function, rate and rhythm of the heart.

Why add an ECG/EKG to the physical examination?

Adding an ECG/EKG to the history and physical exam can suggest further testing or help identify up to two-thirds of heart conditions that can lead to SCA, An ECG/EKG can be ordered by your physician for screening for cardiovascular disease or for a variety of symptoms such as chest pain, palpitations, dizziness, fainting, or family history of heart disease.

- ECG/EKG screenings should be considered every 1-2 years because young hearts grow and change. ECG/EKG screenings may increase sensitivity for detection of undiagnosed cardiac disease but may not prevent SCA.
- ECG/EKG screenings with abnormal findings should be evaluated by trained physicians.
- If the ECG/EKG screening has abnormal findings, additional testing may need to be done (with associated cost and risk) before a diagnosis can be made, and may prevent the student from participating in sports for a short period of time until the testing is completed and more specific recommendations can be made.
- The ECG/EKG can have false positive findings, suggesting an abnormality that does not really exist (false positive findings occur less when ECG/EKGs are read by a medical practitioner proficient in ECG/EKG interpretation of children, adolescents and young athletes).
 - ECGs/EKGs result in fewer false positives than simply using the current history and physical exam

The American College of Cardiology/American Heart Association guidelines do not recommend an ECG or EKG in asymptomatic patients but do support local programs in which ECG or EKG can be applied with high-quality resources.

Removal from play/return to play

Any student-athlete who has signs or symptoms of SCA must be removed from play (which includes all athletic activity). The symptoms can happen before, during, or after activity.

Before returning to play, the athlete must be evaluated and cleared. Clearance to return to play must be in writing. The evaluation must be performed by a licensed physician, certified registered nurse practitioner, or cardiologist (heart doctor). The licensed physician or certified registered nurse practitioner may consult any other licensed or certified medical professionals.

I have reviewed this form and understand the sympto to detect hidden heart issues.	ms and warning signs of SCA. I have also read the informat	tion about the electrocardi	ogram testing and how it may help

SECTION 7: RE-CERTIFICATION BY PARENT/GUARDIAN

This form must be completed not earlier than six weeks prior to the first Practice day of the sport(s) in the sports season(s) identified herein by the parent/guardian of any student who is seeking to participate in Practices, Inter-School Practices, Scrimmages, and/or Contests in all subsequent sport seasons in the same school year. The Principal, or the Principal's designee, of the herein named student's school must review the SUPPLEMENTAL HEALTH HISTORY.

If any SUPPLEMENTAL HEALTH HISTORY questions are either checked yes or circled, the herein named student shall submit a completed Section 8, Re-Certification by Licensed Physician of Medicine or Osteopathic Medicine, to the Principal, or Principal's designee, of the student's school.

completed Section 8, Re-Certification by Licensed Physician of Medicine or Osteopathic Medicine, to the Principal, or Principal's at the student's school. Yes Explain "Yes" answers at the bottom of this form. Circle questions you don't know the answers to. Yes No 1. Since completion of the CIPPE, have you experienced dizzy spells, blackouts, and/or unconsciousness? 4. Since completion of the CIPPE, have you experienced any episodes of unexplained shortness of breath, wheezing, and/or chest	
injury that required medical treatment from a licensed physician of medicine or osteopathic medicine? An additional note to item #1. If serious illness or serious injury was marked "Yes", please provide additional information below pain? Since completion of the CIPPE, are you taking any NEW prescription medicines or pills? Do you have any concerns that you would like to discuss with a physician?	<u> </u>
2. Since completion of the CIPPE, have you had a concussion (i.e. bell rung, ding, head rush) or traumatic brain injury?	_
#'s Explain yes answers; include injury, type of treatment & the name of the medical professional seen by student	
I hereby certify that to the best of my knowledge all of the information herein is true and complete. Student's Signature	!

Section 8: Re-Certification by Licensed Physician of Medicine or Osteopathic Medicine

This Form must be completed for any student who, subsequent to completion of Sections 1 through 5 of this CIPPE Form, required medical treatment from a licensed physician of medicine or osteopathic medicine. This Section 8 may be completed at any time following completion of such medical treatment. Upon completion, the Form must be turned in to the Principal, or the Principal's designee, of the student's school, who, pursuant to ARTICLE X, LOCAL MANAGEMENT AND CONTROL, Section 2, Powers and Duties of Principal, subsection C, of the PIAA Constitution, shall "exclude any contestant who has suffered serious illness or injury until that contestant is pronounced physically fit by the school's licensed physician of medicine or osteopathic medicine, or if none is employed, by another licensed physician of medicine or osteopathic medicine."

NOTE: The physician completing this Form must first review Sections 5 and 6 of the herein named student's previously completed CIPPE Form. Section 7 must also be reviewed if both (1) this Form is being used by the herein named student to participate in Practices, Inter-School Practices, Scrimmages, and/or Contests in a subsequent sport season in the same school year AND (2) the herein named student either checked yes or circled any Supplemental Health History questions in Section 7.

If the physician completing this Form is clearing the herein named student subsequent to that student sustaining a concussion or traumatic brain injury, that physician must be sufficiently familiar with current concussion management such that the physician can certify that all aspects of evaluation, treatment, and risk of that injury have been thoroughly covered by that physician.

Section 9: CIPPE MINIMUM WRESTLING WEIGHT

INSTRUCTIONS

Pursuant to the Weight Control Program adopted by PIAA, prior to the participation by any student in interscholastic wrestling, the Minimum Wrestling Weight (MWW) at which the student may wrestle during the season must be (1) certified to by an Authorized Medical Examiner (AME) and (2) established NO EARLIER THAN six weeks prior to the first Regular Season Contest day of the wrestling season and NO LATER THAN the Monday preceding the first Regular Season Contest day of the wrestling season (See NOTE 1). This certification shall be provided to and maintained by the student's Principal, or the Principal's designee.

In certifying to the MWW, the AME shall first make a determination of the student's Urine Specific Gravity/Body Weight and Percentage of Body Fat, or shall be given that information from a person authorized to make such an assessment ("the Assessor"). This determination shall be made consistent with National Federation of State High School Associations (NFHS) Wrestling Rule 1, Competition, Section 3, Weight-Control Program, which requires, in relevant part, hydration testing with a specific gravity not greater than 1.025, and an immediately following body fat assessment, as determined by the National Wrestling Coaches Association (NWCA) Optimal Performance Calculator (OPC) (together, the "Initial Assessment").

Where the Initial Assessment establishes a percentage of body fat below 7% for a male or 12% for a female, the student must obtain an AME's consent to participate.

For all wrestlers, the MWW must be certified to by an AME.

Assessor's Signature	Date	
CERTIFICATION Consistent with the instructions set forth above and the Initial Assessment, I have is certified to wrestle at the MWW of during the 20 20_ AME's Name (print/type)	wresting seasor	1.
Address	Phone ()	
AME's SignatureMD, DO, PAC, CRNP, o (circle one)	r SNP Date of Certi	fication//
For an appeal of the Initial Assessment, see NOTE 2.		

NOTES:

- 1. For senior high school wrestlers coming out for the Team AFTER the Monday preceding the first Regular Season Contest day of the wrestling season the OPC will remain open until January 15th and for junior high/middle school wrestlers coming out for the Team AFTER the Monday preceding the first Regular Season Contest day of the wrestling season the OPC will remain open all season.
- 2. Any athlete who disagrees with the Initial Assessment may appeal the assessment results one time by having a second assessment, which shall be performed prior to the athlete's first Regular Season wrestling Contest and shall be consistent with the athlete's weight loss (descent) plan. Pursuant to the foregoing, results obtained at the second assessment shall supersede the Initial Assessment; therefore, no further appeal by any party shall be permitted. The second assessment shall utilize either Air Displacement Plethysmography (Bod Pod) or Hydrostatic Weighing testing to determine body fat percentage. The urine specific gravity testing shall be conducted and the athlete must obtain a result of less than or equal to 1.025 in order for the second assessment to proceed. All costs incurred in the second assessment shall be the responsibility of those appealing the Initial Assessment.
