

St. Anne Catholic School, a K3-12 school with campuses in Rock Hill and Fort Mill, is accepting applications for a **High School Chemistry Teacher** for the 2023-2024 school year. Previous teaching experience required. Teacher certification or ability to obtain teacher certification required. *This position is located on our high school campus in Fort Mill.*

As a growing Catholic school, we operate on a tight budget to keep tuition affordable so that all children seeking a Catholic education have the opportunity to attend St. Anne. We are seeking teachers who desire ministry work and want to join a team where collaboration and collegiality are respected and encouraged as we look for unique ways to educate students. At this time, our salary scale is based on 80% of the Rock Hill schools, and up to six years of experience are recognized.

The benefits of teaching at St. Anne far outweigh the challenging pay scale. We are a community who puts God and family first and work together so that everyone is able to find balance in their lives. We strongly encourage staff to enroll their children at St. Anne and offer a 50% tuition discount. Full benefit packages are also provided. At St. Anne, our faculty and staff focus on:

- Shared Vision and Goals: We know where we are going
- Collegiality: We're in this together
- Continuous Improvement and Life-Long Learning: We can always get better
- Risk-Taking: We try to learn new things
- Celebration and Humor: We feel good about ourselves

If you have a growth mindset and are looking to make an impact on Catholic education, come join our team!
