

Which Diabetes Training Course Do I Need?

Diabetes Care at School: Bridging the Gap

1. Continuing Nursing Education (CNE) Program
2. Diabetes Training for Non-Medical Personnel
3. Diabetes Awareness Training

Additional Courses:

Insulin Pump Therapy in the School Setting

Continuous Glucose Monitoring in the School Setting

Typically completed by school nurses and staff members who are assisting school nurses if a student wearing an insulin pump or a CGM device is currently being cared for. However, any staff member is welcome to complete the insulin pump or CGM course.
