FWCS Technology

What We Want

- Equal Access
- Differentiated Learning Activities
- Innovative Learning
- Effective Communication
- Productive Operations

What We Believe

What We Want

- Technology is a tool
- Technology can enhance and transform learning
- Technology will be essential in our learners' future
- Technology empowers
- Technology users must be supported

What We Believe

What We Want

What We Know

- Technology engages learners
- Technology allows learners to progress at their own rate
- Technology can store, process, and report data
- Technology allows broader access to information
- Technology provides many ways to communicate

Indicator List - Microsoft Internet Explorer

Indicator List

IN MA.5.3.1   Use a variable to represent an unknown number.

Example: When a certain number is multiplied by 3 and then 5 is added, the result is 29. Let x stand for the unknown number and write an equation for the relationship.

View Indiana's Academic Resources

IN MA.5.3.2   Write simple algebraic expressions in one or two variables and evaluate them by substitution.

Example: Find the value of $5x + 2$ when $x = 3$.

Local intranet

The Language of Equations

Purpose

Students will use a variable to represent an unknown number to write an equation that correctly represents a situation.

Materials

For the teacher: chalk, chalkboard
For each student: copy of Black Line Master (BLM) *I'm Thinking of a Number*

Activity

A. Introduction

1. Ask students if anyone speaks more than one language. Discuss responses.
2. Tell students that they will be learning a "new language" today, but this language is easy to learn. Tell them that the new language is the language of equations. Explain that the class will be reading word problems and writing them in the language of equations.

B. Class Activity

1. Review simple story problems that can be written as number sentences (e.g., "Sara bought 6 apples and 3 oranges. How many pieces of fruit did Sara buy altogether?"). Have students assist you in writing the number sentences.
2. Tell students that there are some story problems that tell you the answer to the number sentence but are missing another part of the number sentence.

EXTENDING THE ACTIVITY

Have students write word problems to be converted to equations. Allow students to write either story problems, such as the ones in the activity, or word problems involving numbers only, such as the ones on the BLM.

MEETING INDIVIDUAL NEEDS

Work individually with students having difficulty writing correct equations. Ask questions such as: "What is the result you will have
