Rationale and Replacement Plan for Non-Automatic State Waivers

Liberty Common School is subject to all automatic waivers granted by the State of Colorado. In addition to renewing previously granted waivers, additional new waivers are appropriate based upon the school's academic, financial, and organizational track records, as well as precedents set by the liberal granting of these state waivers to other Colorado charter schools. Unless otherwise noted, Liberty Common School requests the duration of all waivers be as long as the school is open and operating in compliance with the Charter School Act and all other applicable federal and state laws.

C.R.S. § 22-7-1014 (2)(a) Preschool Individualized Readiness Plans – School Readiness Assessments.

- **RATIONALE:** Liberty Common School has existing authority to implement relevant curriculum and assessments that ensure students success in higher learning. The domains of physical well-being, motor development, social-emotional development, language and comprehension development, cognition, and general knowledge are assessed daily due to the curriculum and assessments in place. Support is readily available through numerous avenues throughout the program.
- **REPLACEMENT PLAN:**
- Liberty Common School has a kindergarten program that utilizes the Core Knowledge Sequence and Singapore Math, with targeted, specific assessments in place. All Colorado Academic Standards are met or exceeded, and the readiness of kindergarten students is determined collaboratively by parents, teachers, and administrators. Liberty Common School’s kindergarten program includes:
 1. Physical well-being and motor development:
 - Students participate in a structured Physical Education class meeting or exceeding state standards. Students are assessed on motor-development skills acquired throughout the year.
 - Students participate in Art education meeting or exceeding state standards. Development of fine motor skills is achieved through drawing, painting and making objects. Students are assessed on fine motor skills acquired throughout the year.
 - Students participate in Music education meeting or exceeding state standards. Students participate in a variety of movement and rhythm exercises. Students are assessed throughout the year.

- Students participate in daily penmanship exercises, learning how to hold and manipulate a pencil and write proper letters and numbers. Students are assessed throughout the year.
- Assessment information is gathered by observation protocols based on appropriate developmental guidelines and state standards in the area of physical well-being and motor development.

2. Social-emotional development

- Students are instructed in the positive behavior support system designed by the school. This includes classroom, cafeteria, recess, and hallway expectations. Students are rewarded for positive behaviors they demonstrate.
- Various classroom positive behavior techniques are implemented. These include red/yellow/green chart, individual behavior charts, and whole class rewards. This is to strengthen self-regulation and executive-function, which help students pay attention, remember directions and control their behavior.
- Students are taught our seven Foundation Stones throughout the year. They attend monthly Character Education Assemblies where guest speakers discuss real-life examples of how they promote the character traits that relate to the Foundation Stones. Teachers promote the Foundation Stones through the literacy and history in the Core Knowledge Sequence. Parents and staff also are role models for proper behavior.
- Assessment information is gathered by observation protocols based on appropriate developmental guidelines and state standards in the area of social-emotional development.

3. Language and comprehension development (based on state standards)

- Students receive instruction 90 minutes each day in the Core Knowledge Sequence. This is a comprehensive program for reading, writing, listening, and speaking that builds vocabulary and knowledge. Students master sounds and letters for fluent decoding and encoding and build knowledge, language and vocabulary that are essential for comprehension. Assessments are administered every two weeks to monitor growth.
- *AIMSweb* assessment is administered three times per year. Any student who does not make benchmark is progress-monitored every two or three weeks to note progress. Students not making benchmark are assessed with the *Burst* assessment to determine the literacy area most in need of improvement. If the student is far below benchmark on two consecutive administrations the student

is placed on a READ plan and given an additional 30 minutes of small group instruction.

- *NWEA (Northwest Evaluation Assessment)* assessment is administered three times per year. Any student who does not make benchmark is progress-monitored every two or three weeks to note progress.

4. Cognition and general knowledge (based on state standards)

- Students receive 60 minutes of math instruction using Singapore Math. This conceptual math curriculum is based on state standards. Assessment is given every week to monitor progress. Students who fall behind are given additional time in small group or 1:1 sessions with the teacher in the area of need.

- Science instruction includes lessons on various topics including: Plants and Animals, Animals and Their Needs, Human Body (including taking care of their body with exercise, cleanliness, healthy foods and rest), Introduction to Magnetism, Seasons and Weather, and Taking care of the Earth. Assessment is given regularly to monitor progress.

- History and Geography – Students are instructed on various topics including: Geography – Spatial Sense (which involves working with maps and globes to recognize rivers, lakes, mountains, the Atlantic and Pacific Oceans and the North and South Pole), an overview of the seven continents, Native American Peoples, Early Exploration and Settlement (including the voyage of Columbus, the Pilgrims, and Independence Day), Presidents, Past and Present, and symbols and Figures (including the American Flag, Statue of Liberty, Mount Rushmore and The White House).

- Assessment information is gathered by observation protocols based on appropriate developmental guidelines and state standards in the area of cognition and general knowledge.

- *NWEA (Northwest Evaluation Assessment)* assessment is administered three times per year. Any student who does not make benchmark is progress monitored every two or three weeks to note progress.

- Any student not making adequate growth in any of the above areas receive Response to Intervention (RtI) strategies in small groups, or 1:1 instruction. RtI plans include results of formal assessments, informal assessments, and developmental checklists. This information is housed in Pearson Inform, which is our Internet-based data management system. This program brings together achievement data from many sources, generates

student and summary reports, and allows for distribution to appropriate Student Teacher Assistance Team (STAT) members.

If students do not respond with adequate growth following this intervention, he or she may be referred to the Academic Support Team for further assessment.

C.R.S. § 22-1-128 Education Regarding Human Sexuality.

- **RATIONALE:** Colorado's automatic charter-school waiver C.R.S. §22-32-109(1)(t) grants Liberty Common School the authority to determine its own educational program, and curricular strategies. The school's Charter Contract is predicated upon adherence to the Core Knowledge Sequence which includes human-reproduction science instruction in an age-appropriate sequence beginning in the 5th grade (typically 10-year-olds). These lessons are exclusive to the science curriculum, and do not include content normally called "human sexuality." This is the practice the school intends to maintain.

However, upon careful reading of the new law, its "opt out" provisions are unclear, and imprecisely written (inelegant grammar, lack of punctuation, overbroad definitions, etc.) making them subject to misinterpretation, and speculation on legislative intent. For example, non-science subject matter as prescribed by the

curriculum and taught by Liberty Common School to 10-year-olds (in subjects such as literature, art, history, etc.), and in other grades, sometimes touches upon “healthy relationships” (“an interpersonal relationship that is free of physical, sexual, and emotional abuse, coercion, and violence”) as defined by recently enacted (31 May 2019) C.R.S. §22-1-128(2)(d.5). These lessons are, indeed, delivered via “oral, written, or digital lesson(s), lecture(s), or presentation(s) given by school staff...that teaches about sexual activity in the context of...healthy relationships” as defined by C.R.S. §22-1-128(2)(d.5).

The plain linkage of these new sweeping definitions has the effect of overbroad applicability directly altering the curriculum upon which the school’s Charter Contract and education model is predicated.

For example, Liberty students are exposed to relationships and situations described in Greek mythology, the anthropology of North American tribes, and those of many other world cultures past and present. Liberty’s art curriculum acquaints students with Renaissance art and artists such as Jan van Eyck’s *Giovanni Arnolfini and His Wife* (also known as *Arnolfini Wedding*) in which the “marriage covenant” and the circumstances of the bride’s pregnancy are central themes. Students are asked to consider sexual choices, behaviors, and interpersonal consequences of characters in literature rather routinely particularly in the school’s upper grades. They are asked to consider the interpersonal relationship between Abigail and John Adams, intermarriage between European monarchies, the affairs of kings and queens, etc. In hundreds, if not thousands, of such possible scenarios spanning anthropology (the study of relationships), history, art, Western Civilization, literature, music, and more, “healthy relationships” as defined by the new statute are inclined to be discussed, from time to time, in ways that would trigger the cascade of non-academic instructional requirements as prescribed by the new statute.

Liberty Common’s rigorous, academically focused curriculum affords no unallocated classroom time to accommodate this additional curriculum without threatening the robust instruction that presently, and historically forms the basis for the school’s Charter Contract.

A waiver option for charter schools in this circumstance was overtly verbalized, supported and preserved by the Colorado General Assembly, on a bi-partisan basis, prior to final adoption of this new statute. Such a waiver is the most practicable way for Liberty Common School to isolate its instruction of human reproduction to the science classroom, and effectively maintain fidelity to the Core Knowledge Sequence, and its school-wide science curriculum.

- REPLACEMENT PLAN: Liberty Common School adheres to the Core Knowledge Sequence as stipulated in the school’s Charter Contract with the Poudre School

District. The Core Knowledge science curriculum instructs 5th-grade students in cell division, plant and animal reproduction, and life cycles. Topics on “The Human Body” include the science of “Changes In Human Adolescence,” puberty, the endocrine system, and the reproductive system. The school instructs on these topics only within the domain of science. Evening presentations with parents precede and coincide with these lesson units, and are intended to better prepare parents to address, as they deem prudent, non-scientific questions 10-year-olds are likely to pose when prompted by this particular science unit. Related lessons in other grades are likewise fully pre-defined for parents. For example, 7th-grade-science instruction takes a deep dive into cell division, and genetics. Liberty’s human-reproduction curriculum excludes non-science content such as health instruction, and instruction in human sexuality. The right and responsibility of parents to direct the education and upbringing of their children is wholly embraced by the school which accommodates all parental “opt-out” directives.

C.R.S. § 22-2-112(1)(q)(I) Commissioner-Duties Teacher Effectiveness

- **RATIONALE:** Rationale: Liberty Common School has the authority to hire teachers and headmasters/principals that support the school's goals and objectives. The school headmaster, principal, or designated administrators are employed based, in part, upon their proficiency in performing professional evaluations of all personnel. Possession of a Type D certificate has no bearing upon effectively administering professional evaluations under the direction of the head of school.

The school attracts headmasters/principals and professional instructors who possess a wide variety of professional backgrounds, including, but not limited to out-of-state professionals, college-level instructors, experienced professional instructors from settings not requiring a license, as well as professionals with business, academic, military, or corporate experience. All professional employees of Liberty Common School are employed on an at-will basis and demonstrate subject-matter mastery.

Liberty Common School is exempt through specific waiver from requirements to report teacher evaluation ratings under the rubric established by C.R.S. 22-2-112(1)(q)(I).

- **REPLACEMENT PLAN:** Liberty Common School uses a thorough and comprehensive instructional-evaluation system as agreed to in the Charter School Agreement with Poudre School District. The evaluation system ensures professional instructors maintain subject-matter mastery, and expertise in pedagogy and classroom management. Professional instructional faculty members are trained in the school's evaluation system. Methods used for the school's evaluation system include quality standards which are clear and relevant to the administrators' and instructors' professional roles and responsibilities, have the goal of improving student academic growth, and meet the

intent of the quality standards established by the school's Charter, and greatly exceed the state's quality standards, and student-performance results.

Liberty Common School is not required to report instructor-evaluation data through the TSDL collection; however, instructor-performance data is reviewed by the school and used to inform hiring practices and ongoing professional development. Core course-level participation continues to be reported pursuant to the non-waivable statute 22-11-503.5.
