

SHAC Meeting Minutes: December 6, 2022

Meeting Start: 4:00 pm

Guest Speaker: Mandy Watson RN, BSN, IBCLC

Attendee's: Rita Gray, Amy Daily, Karen McHam, Emily Epperson, Diana Williams, Diana Herrington, Keri Hampton, Paula Stephenson, Ami Patterson, Officer Jason McEntire

Mandy Watson: Safe is Not Always Safer / ENDS: Electronic Delivery Systems /Fentanyl

ENDS are being made into very discreet objects that make it very easy to be hidden. (Hoodie strings, watches, pens, etc)

Legal Age of Use is 21. If found on a minor this is considered a Class C Misdemeanor. Depending of the substance found inside or is discovered to have been shared with another student the person can be charged with up to a felony.

Other things found in vapes around our area: THC, alcohol, methamphetamines, Fentanyl

Narcan (nasal spray) the antidote for opioids suggested to be kept near the AEDS in our schools and recommended to have multiple people trained to administer.

Signs of Opioid Overdose: Pinpoint pupils, difficult staying awake, slow/weak or no breathing, limp body, cold/clammy skin, and discolored skin.

Mandy to possibly speak at a community wide informative presentation for teachers and parents to attend. Looking into possibly having her speak with High School Students.

Officer McIntyre:

What is BISD doing to control Vaping in our district? Policy in place

Vape detectors in JH/HS Bathrooms/Halls that detects and alerts principals and officers with the substance/smoke detected.

There is no warning given, when a student is caught there is a ticket written.

All vapes taken up and checked immediately for what substance is inside.

All Trainers and Nurses have Access to and have been trained to use Narcan.

BISD currently reviewing updated TEA/ TSNO policies.

Meeting Adjourned 4:54 pm
