The **American School in** London

ASP After School Program Highlights June, Volume 3

From Director's Desk

Dear Families,

Thank you for making this year a resounding success! We celebrate the end of a wonderful year filled with growth, learning, and memorable experiences. Your support and trust have been instrumental in creating a thriving community. We will be back in the upcoming school year with new and exciting programs.

Thank you for being a part of our journey, and we can't wait to welcome you back!

Regards Francesca Marr After School **Program** Director

Program Highlights

We have enjoyed exploring, learning and absorbing lots of interesting facts about Greek history and culture. The students were keen on learning a few basic words and phrases and trying new foods such as Tsoureki, which is a traditional sweet bread served during the orthodox Easter. We even made our own greek salad. Learning about the Greek Gods and Goddesses was great fun! Each session was a good mixture of geography facts, cultural aspects or traditions and the narrative story of same without the traditional Zorba dance -) so we have mastered that

Self-Defence

This term, the children self-defence program immersed themselves in a safe haven filled with positive energy and unwavering support. They actively engaged in activities that fostered their mental and physical growth, learning the importance of self-awareness and being prepared to react when necessary. Most importantly, they had an absolute blast, enjoying every moment of the program while developing crucial skills.

Gardeners against Climate Change

Children actively participated in various activities aimed at combating climate change. They engaged in essential tasks like weeding and planting bulbs while learning about greenhouse insulation techniques. Witnessing the beauty of blooming flowers firsthand, they carefully transferred plants into flower beds. The joy of growing their own plants in the grow station was evident, and their creativity blossomed as they crafted clay cacti and pumpkins. This program instilled a profound appreciation for nature and offered hands-on experiences in gardening
