12

This musical score is for an F major Remington and Arpeggio study. It is written in 4/4 time and consists of 12 measures. The melody is composed of eighth and quarter notes, while the arpeggio accompaniment uses eighth and sixteenth notes. The key signature has one sharp (F#). Measure numbers 4, 8, and 12 are indicated at the start of their respective staves.

12

This musical score is for a Bb major Remington and Arpeggio study. It is written in 4/4 time and consists of 12 measures. The melody is composed of eighth and quarter notes, while the arpeggio accompaniment uses eighth and sixteenth notes. The key signature has two flats (Bb and Eb). Measure numbers 4, 7, 9, and 12 are indicated at the start of their respective staves.

SOJ WARMUP PACKET

Two-Note Slur

Two-Note Slur exercise musical notation. The exercise consists of two staves. The first staff contains two measures of music. The first measure has a slur over a half-note G4 and a half-note A4. The second measure has a slur over a half-note B4 and a half-note C5. The second staff begins with a '4' indicating a four-measure phrase. It contains two measures of music. The first measure has a slur over a half-note D5 and a half-note E5. The second measure has a slur over a half-note F5 and a half-note G5. The third measure has a slur over a half-note A5 and a half-note B5. The fourth measure has a slur over a half-note C6 and a half-note D6.

Three-Note Slur

Three-Note Slur exercise musical notation. The exercise consists of two staves. The first staff contains two measures of music. The first measure has a slur over a half-note G4, a half-note A4, and a half-note B4. The second measure has a slur over a half-note C5, a half-note D5, and a half-note E5. The second staff begins with a '4' indicating a four-measure phrase. It contains two measures of music. The first measure has a slur over a half-note F5, a half-note G5, and a half-note A5. The second measure has a slur over a half-note B5, a half-note C6, and a half-note D6. The third measure has a slur over a half-note E6, a half-note F6, and a half-note G6. The fourth measure has a slur over a half-note A6, a half-note B6, and a half-note C7.

Four-Note Slur

Four-Note Slur exercise musical notation. The exercise consists of two staves. The first staff contains two measures of music. The first measure has a slur over a half-note G4, a half-note A4, a half-note B4, and a half-note C5. The second measure has a slur over a half-note D5, a half-note E5, a half-note F5, and a half-note G5. The second staff begins with a '4' indicating a four-measure phrase. It contains two measures of music. The first measure has a slur over a half-note A5, a half-note B5, a half-note C6, and a half-note D6. The second measure has a slur over a half-note E6, a half-note F6, a half-note G6, and a half-note A6. The third measure has a slur over a half-note B6, a half-note C7, a half-note D7, and a half-note E7. The fourth measure has a slur over a half-note F7, a half-note G7, a half-note A7, and a half-note B7.

Five-Note Slur

Five-Note Slur exercise musical notation. The exercise consists of two staves. The first staff contains two measures of music. The first measure has a slur over a half-note G4, a half-note A4, a half-note B4, a half-note C5, and a half-note D5. The second measure has a slur over a half-note E5, a half-note F5, a half-note G5, a half-note A5, and a half-note B5. The second staff begins with a '4' indicating a four-measure phrase. It contains two measures of music. The first measure has a slur over a half-note C6, a half-note D6, a half-note E6, a half-note F6, and a half-note G6. The second measure has a slur over a half-note A6, a half-note B6, a half-note C7, a half-note D7, and a half-note E7. The third measure has a slur over a half-note F7, a half-note G7, a half-note A7, a half-note B7, and a half-note C8. The fourth measure has a slur over a half-note D8, a half-note E8, a half-note F8, a half-note G8, and a half-note A8.

Lip Trill Exercise

Lip Trill Exercise musical notation. The exercise consists of two staves. The first staff contains two measures of music. The first measure has a slur over a half-note G4, a half-note A4, a half-note B4, a half-note C5, and a half-note D5. The second measure has a slur over a half-note E5, a half-note F5, a half-note G5, a half-note A5, and a half-note B5. The second staff begins with a '4' indicating a four-measure phrase. It contains two measures of music. The first measure has a slur over a half-note C6, a half-note D6, a half-note E6, a half-note F6, and a half-note G6. The second measure has a slur over a half-note A6, a half-note B6, a half-note C7, a half-note D7, and a half-note E7. The third measure has a slur over a half-note F7, a half-note G7, a half-note A7, a half-note B7, and a half-note C8. The fourth measure has a slur over a half-note D8, a half-note E8, a half-note F8, a half-note G8, and a half-note A8.

VOLUME

Power and quantity of sound are trademarks of great ensembles. This type of playing requires a constant monitoring of the player's tone quality and intonation. The key to playing loud is relaxation of the breath, the body, and the inside of the mouthpiece. An ugly, "spread" tone is often the result of tension and forced breathing.

The change in air required to play softer comes from changing the AMOUNT of air that moves through the instrument. Changing the speed of the air or the tension/relaxation of the body/breath will only change the quality of sound, not the power. However, in order to control the increased air flow at higher volumes, the corners of the mouth must be kept firm to support the large volume of air pouring through the aperture. Visualize the lips wrapping around the air stream when playing at fuller dynamic levels.

The same goes for playing at softer volumes. The only change should be the amount of air used and a smaller aperture, NOT the speed. If the speed of the air drops, you lose tone quality and intonation.

Great care should be taken through the building and diminishing of volume over a given period of time. Playing both loud and soft with a round, beautiful sound is a goal that will require great concentration over an entire marching season.

Level 1	pp	As soft as you can play with a good sound
Level 2	p	
Level 3	mp	Standard, relaxed, marching band volume
Level 4	mf	
Level 5	f	
Level 6	ff	As loud as you can play with a good sound

CHORD THEORY

The most basic form of chord we work with is called a triad, which is a chord of exactly three notes that we can stack in intervals of 3rds. That means that the distance between the bottom note and the middle note is a 3rd (G to B), and the distance between the middle note and the highest note is a 3rd (B to D). Another (and much easier) way of thinking about it is stacking the notes up like a snowman. If you can't make snowman, it isn't a traditional triad. This is shown in the example below.

Each note in a Triad has a specific name attached to it. The bottom note (when stacked like a snowman) is called the root. This is the pitch the chord is named after. If the root is a G, then the triad is called a G chord. The middle note of the snowman is called the 3rd, because it is the interval of a 3rd above the root. The top note is a 5th because it is a 5th above the root.

Just like intervals, chords can be major or minor. For a major triad, all three notes must be in the Major key of the bottom note. In the example above, we have G, B, and D. The key of G major (we use G because it is the root.) has one sharp (F#) and the rest of the notes are natural. The triad of G, B, and D is a major triad since all three notes fit into the key of G Major.

A minor chord has the third lowered one half-step from what would be a major chord. In the example above, which is a major chord, we would need to lower the B to a B $\flat$ (Because B is the 3rd). Once we have done that, the triad consists of G, B $\flat$, and D. It is now a minor chord.

Chords that have more than three notes stacked on top of each other are known as extended chords. The naming convention of these extra notes follow the same rules as notes in a triad. After the root, third, and fifth follow the seventh, ninth, eleventh, etc. These extra notes add new “color” to the chords, changing them in a variety of ways. We classify these chords similarly to the way we classify triads.

Major 7th	The triad is major, and the 7 th of the chord is a major 7 th above the root.
Minor 7th	The triad is minor, and the 7 th of the chord is a minor 7 th above the root.
Dominant 7th	The triad is major, and the 7 th of the chord is a minor 7 th above the root.

Chord Tuning (Just Intonation)

If we play all the notes in the chord in equal temperament (the note being perfectly in tune with the tuner), the chord will sound out of tune. This is why when we play chords we must play them with “Just Intonation.” This is where we play the root of the chord perfectly in tune, but the 3rd, 5th, 7th, etc. are played purposefully “out of tune” so that the chord sounds resonant and in tune with itself. It is a strange concept at first, but over time with a conscious effort to tune chords correctly, we will automatically start to adjust your pitch every time we play a chord. On the next page you will find a chart we will use to tune the chords we play throughout the year.

Chords of Just Intonation

All chords are based on root "C" which is "0" pitch.
