

Where Experience Creates Education

TradeEd is a program in partnership with CNM utilizing the Dual Enrollment program with APS. TradeEd will begin with the focus of 4 major areas. Through CNM Dual Enrollment students will have the ability to earn certifications in one of these areas:

Carpentry/Construction

The Carpentry program teaches how to read and interpret construction blueprints, use various concrete techniques to form foundations, frame building walls, proper window installation, trim work and more. **Two terms Minimum Credit Hours Required to Complete Certificate: 28**

Electrical (Solar optional)

The Electrical Trades program teaches electrical circuitry, troubleshooting, local and national electrical codes, and OSHA compliance safety training. Earn a certificate and pursue work as a Solar Photovoltaic Installer, Electrician, and more. **Three terms. Minimum Credit Hours Required to Complete Certificate: 42**

Welding

The Welding program teaches blueprint reading, mathematics, metallurgy, and other welding technology. **Three terms. Minimum Credit Hours Required to Complete Certificate: 38**

Automotive (Diesel Optional)

The Automotive Technology program provides hands-on training. Earn a certificate and pursue work as a Vehicle Inspector, Automotive Technician and Mechanic, and more. **Three terms. Minimum Credit Hours Required to Complete Certificate: 38**

TradeEd Student Expectations

Student Expectations:

Dual Enrollment students will be responsible for their own transportation to CNM classes. Students are immersed in a Full-time university type atmosphere at CNM and are expected to perform at that maturity level. Students will earn 1.0 elective credit on their high school transcript for every 3 credits earned at CNM- and grades earned will reflect on both their high school and college transcript. Students must adhere to CNM deadlines and expectations for enrollment, registration, and withdrawal from programs. Students must maintain a 2.5 or greater cumulative grade point average (GPA) each semester of enrollment at both eCademy and CNM.

Students will continue to enroll and complete core academic credits for high school graduation through eCademy/BlendEd. If a student graduates from high school prior to finishing their certification program it will be the student's financial responsibility to finish the program at CNM and achieve their certificate. eCademy will cover course and material fees for those students accepted to the TradeEd program up to the time of their graduation from APS or their completion of the CNM certification (whichever comes first).

Per FERPA (Family Education Rights and Privacy Act), Colleges/Universities, CNM and DC Instructors will NOT discuss grades, student progress, transcripts, financial aid, disciplinary information, etc., with parents without a signed release by the student.

TradeEd will cover any course fees for the certification programs listed above for students in good academic standing at both CNM and eCademy. If a student fails to remain in good standing, the student may remain in the CNM program, but TradeEd will no longer scholarship course fees at CNM and students are expected to return the resources provided to them by eCademy.
