ABOUT OUR SCHOOL

Frederick Douglass High School, situated on 65 beautiful acres of a historic Lexington horse farm, is a state-of-the-art educational facility offering students the opportunity to participate in rigorous academic, exceptional artistic, and world-class athletic programs.

Frederick Douglass High School is built on the concept of small learning communities centered around common themes or experiences, which promote teamwork, collaboration, and critical thinking. These small learning communities allow students to explore a field that interests them and provides a connection between the classroom and the real world. Graduates from Frederick Douglass High School are prepared to thrive in today's global economy.

ABOUT OUR PROGRAMS

All students begin in the Freshman Academy. During this transitional year, students are introduced to the various career pathways offered at Frederick Douglass High School. Students are provided the support that they need to make the transition from middle school to high school as smooth as possible.

After their freshman year, students at Frederick Douglass are enrolled in one of three career-themed academies. In these small learning communities, students work with a core team of teachers over several years to develop mastery in both academic content and technical areas. In addition, they develop communication and collaboration skills necessary for post-high school success.
