Technology

Road to Relevance

Now more than ever are we seeing technology integrated into students' academic and personal lives. At Conewago Valley School District, different buildings are implementing technology into their classrooms in many different ways. All school buildings have access to new Apple products and platforms, so students are getting exposure to technology earlier in their education. At the secondary level, New Oxford High School has gone one to one. Therefore, every student has an iPad to use every day. Next year New Oxford Middle School will also go one to one. A very exciting time to watch our students learn new things and do amazing things with technology!

What to focus on

Digital Citizenship: This is how to help students to learn, communicate and collaborate safely and responsibly. This is where it is important for the school and parents to work together to make sure our students are being safe and responsible online. We want our students to explore and find creative and innovative ways to express themselves through technology but do so in an appropriate and safe manner.
