Solve the following word problem using a method of your choice:

40. The Robinsons are tearing down their above-ground pool to fix the liner. The pool contains 18,000 gallons of water. The water drains at a rate of 1,500 gallons per hour. How long will it take to empty half of the water out of the pool?

$$\text{Half the water} = 18,000 \div 2 = 9,000 \text{ gallons}$$

$$9,000 \div 1,500 = 6 \text{ hours}$$

It will take 6 hours to drain half the pool.
