

ENROLLMENT PROJECTIONS

District and individual school enrollment projections shall be prepared annually. District planning department staff shall base these projections on past and current enrollment information supplemented with demographic and economic data. These projections shall reflect each student reported in the annual state count prior to the application of individual student funding levels.

Enrollment projections shall be used for operational planning purposes and be included in the district long range facilities master plan.

Adopted April 5, 1995

Revised May 18, 2011
