

## **STUDENT CONFERENCES**

The Board of Education believes that the school should develop and maintain close, constructive relationships with families in order to improve mutual understanding of individual students, promote ongoing cooperation between the school and the home, and improve school climate and student achievement.

Student conferences shall be held regularly during the school year as one method to assist families and teachers in working together to achieve these goals. Such conferences provide opportunities to become better acquainted, discuss student progress and deepen understanding of the school program.

In addition to conferences, some families welcome home visits by their children's teachers. Home visits provide an additional more extensive and personal opportunity to work together. They should be scheduled in advance.
