

**PHYSICAL EXAMINATIONS OF STUDENTS
(And Student Physicals for School Athletics)**

Parents shall be encouraged to have their children physically examined prior to entering school and again prior to the fourth, seventh and tenth grades. A dental examination also shall be strongly suggested.

Any student engaging in any competitive athletics shall be given a physical examination prior to his/her participation in any form of exercises leading to such athletics.

Further, in any case where physical exercise is rather strenuous (such as physical education classes) and a student has any physical impairment whatsoever, the student may be required to present authorization for such participation from a physician.

Students may be excused from physical education activities and from curricular requirements relating to physical education activities upon the statement from a physician that such participation would be injurious to the student's health.

Teachers shall be alert to the general well-being of students and shall refer any questionable situations to the school nurse.
