## **Legal Notices – Thompson School District**

### **Notice of Storm Water Program**

Notice is hereby given that the Thompson School District implemented a Storm Water Management Plan in 2008. As a Non Standard MS4 permittee, Thompson School District has identified outfalls that could be impacted by illegal discharges into the storm water system, as required by the Colorado Department of Public Health and Environment.

This Plan includes educational programs and signage for the general public and building users to prevent illicit discharges of pollutants into waterways. Pollutants and chemicals can negatively impact water quality and the environment. A copy of the current program can be obtained from Jess Arnold, Environmental Specials, by calling (970) 613-5381 or via at [jess.arnold@thompsonschoools.org](mailto:jess.arnold@thompsonschoools.org). Input and questions are welcome and should be directed to Jess Arnold at the contact information listed above.
