## **Diabetes Medical Management Plan (DMMP)**

This plan should be completed by the student's personal diabetes health care team, including the parents/guardians. It should be reviewed with relevant school staff and copies should be kept in a place that can be accessed easily by the school nurse, trained diabetes personnel, and other authorized personnel.

Date of plan:	This plan is v	alid for the current school year:

Checking blood glucose					
Brand/model of blood glucose meter:					
Target range of blood glucose:					
Before meals: ☐ 90–130 mg/dL ☐ Other:					
Check blood glucose level:					
☐ Before breakfast ☐ After breakfast ☐ ☐ Hours after breakfast ☐ 2 hours	after a correction do:	se			
☐ Before lunch ☐ After lunch ☐ ☐ Hours after lunch ☐ Before d	lismissal				
☐ Mid-morning   ☐ Before PE   ☐ After PE   ☐ Other: _					
As needed for signs/symptoms of low or high blood glucose	ed for signs/symptor	ms of illness			
<b>Preferred site of testing:</b> ☐ Side of fingertip ☐ Other: Note: The side of the fingertip should always be used to check blood glucose level if hypogly	vcemia is suspected.				
Student's self-care blood glucose checking skills:					
Independently checks own blood glucose					
May check blood glucose with supervision					
Requires a school nurse or trained diabetes personnel to check blood glucose					
$\hfill \Box$ Uses a smartphone or other monitoring technology to track blood glucose values					
Continuous glucose monitor (CGM): Yes No Brand/model:					
Alarms set for: Severe Low: Low: High:					
Predictive alarm: Low: High: Rate of change: Lov	v:	High:			
Threshold suspend setting:					
Additional information for student with CGM					
<ul> <li>Confirm CGM results with a blood glucose meter check before taking action on the</li> </ul>	e sensor blood glucos	e level.			
If the student has signs or symptoms of hypoglycemia, check fingertip blood gluco	-	the CGM.			
<ul> <li>Insulin injections should be given at least three inches away from the CGM insertion site.</li> </ul>					
<ul> <li>Do not disconnect from the CGM for sports activities.</li> <li>If the adhesive is peeling, reinforce it with approved medical tape.</li> </ul>					
<ul> <li>If the CGM becomes dislodged, return everything to the parents/guardians. Do not throw any part away.</li> </ul>					
Refer to the manufacturer's instructions on how to use the student's device.					
Student's Self-care CGM Skills	Indepe	ndent?			
The student troubleshoots alarms and malfunctions.	☐ Yes	☐ No			
The student knows what to do and is able to deal with a HIGH alarm.	☐ Yes	☐ No			
The student knows what to do and is able to deal with a LOW alarm.	☐ Yes	□ No			
The student can calibrate the CGM.					
The student knows what to do when the CGM indicates a rapid trending rise or fall in the blood glucose level.					
The student should be escorted to the nurse if the CGM alarm goes off: Yes No					
Other instructions for the school health team:					

Page 2 of 7, DMMP

Hypoglycemia treatment			
Student's usual symptoms of hypog	lycemia (list below):		
If exhibiting symptoms of hypoglycem product equal to grams of carb	9	ss than mg/dL, give	a quick-acting glucose
Recheck blood glucose in 15 minutes a	and repeat treatment if blood gl	ucose level is less than	mg/dL.
Additional treatment:			
If the student is unable to eat or drir (jerking movement):	nk, is unconscious or unrespo	nsive, or is having seizure a	ctivity or convulsions
• Position the student on his or her			
• Give glucagon:	☐ 1 mg ☐ ½ mg	Other (dose)	
• Route:	☐ Subcutaneous (SC)	☐ Intramuscular (IM)	
<ul> <li>Site for glucagon injection:</li> </ul>	☐ Buttocks ☐ Arm	☐ Thigh ☐ Othe	er:
<ul> <li>Call 911 (Emergency Medical Servi</li> </ul>	ces) and the student's parents/g	guardians.	
<ul> <li>Contact the student's health care p</li> </ul>	provider.		
<ul> <li>Check  Urine  Blood for  Blood for  Blood glucose greater than  insulin (see correction dose orders)</li> <li>Notify parents/guardians if blood  For insulin pump users: see <b>Addition</b></li> <li>Allow unrestricted access to the b</li> <li>Give extra water and/or non-sugar</li> </ul>	mg/dL AND at least is). glucose is over mg/dL. onal Information for Student wit athroom.	hours since last insulin dose,	_
Additional treatment for ketones:			
• Follow physical activity and sports	orders. (See <b>Physical Activity a</b>	and Sports)	
If the student has symptoms of a hyper parents/guardians and health care prov nausea and vomiting, severe abdomina or lethargy, or depressed level of consc	vider. Symptoms of a hyperglyce al pain, heavy breathing or short	emia emergency include: dry	mouth, extreme thirst,
Insulin therapy			
Insulin delivery device:	Syringe	Insulin pen	Insulin pump
Type of insulin therapy at school:	Adjustable (basal-bolus) insu

Physical activity and sports	
A quick-acting source of glucose such as glucose tabs and/or sugar-containing juice must of physical education activities and sports.  Student should eat 15 grams 30 grams of carbohydrate other: before every 30 minutes during every 60 minutes during after vigorous physical activity was recent blood glucose is less than mg/dL, student can participate in physical activity was corrected and above mg/dL.  Avoid physical activity when blood glucose is greater than mg/dL or if urine/blood ketones as (See Administer Insulin for additional information for students on insulin pumps.)	vity
Disaster plan	
To prepare for an unplanned disaster or emergency (72 hours), obtain emergency supply kit from par Continue to follow orders contained in this DMMP.  Additional insulin orders as follows (e.g., dinner and nighttime):
