

ENGAGE, ENRICH, EMPOWER.

SHELTON PRIDE

Founded in 1976, Shelton School is a private non-profit, non-sectarian, co-ed school serving intelligent students with learning differences (LD) in grades EC/Preschool through 12th. It has been the turning point for thousands of students. Shelton's individualized, structured multisensory academic program, especially written for LD students, challenges students by building the necessary skills. Shelton's niche is providing a customized educational approach with positive, practical solutions matching the needs of LD students. For many, Shelton's full school program is optimal for the duration of their high school days.

Shelton offers a comprehensive curriculum with a strong academic orientation and a nurturing family atmosphere that considers the physical, intellectual, emotional, and social growth of each student. In addition, the school offers a full array of extra-curricular,

fun activities. Whether students leave Shelton to return to a mainstream classroom, take a gap year or head to college, they are equipped to meet the next challenge. Shelton is about helping every child become the absolute best human being he can be, not just academically fit.

While the school is clearly the centerpiece of its mission, Shelton's bundled services offer much more. Shelton encompasses three other major components—a speech/language/hearing center, an evaluation center, and an outreach/training program, all open to the community.

Shelton provides extensive training for professionals who work with LD students and their families. Shelton's new 30-acre campus offers superior spaces and educational amenities for all areas of school life.

...changing the way the world thinks about learning differences...
