

## *Welcome to AP Environmental Science!*

23-24 Summer Assignment- Ms Watt

As an Introduction and Preview of the course, you will be watching and analyzing “Before the Flood” and also reporting on 2 current Environmental issues or events. You will be added to the Team AP Env Sci Summer Assignments where you can access and upload your work. The descriptions are here below.

If you have any questions/concerns, please email me or message me on Teams!

### **Current Issue/Event:**

Pick and research 2 current Environmental issues or events. You will write a summary of what’s going on, and also your reaction to what is happening. Use and site two sources (for each issue/event) for your information. Make sure to use reputable, unbiased sources. You could start by searching Google News for ideas. Examples of reputable sources would be NY Times, National Geographic, The Guardian, NPR, BBC, The Boston Globe etc.... If you have a question about a source just let me know!

### **Before the Flood**

“Before the Flood” is a documentary that does a great job of introducing many different topics which we will be covering throughout this course. It is on Disney Plus and also may be found on YouTube. Watch the film and then respond to the questions/prompts in the document linked below. I will also post the PDF in our Env Sci Summer Team.
