New York's Statewide Assessment Strategy

New York's strategy **values each type of assessment** from the classroom to the state level, and how they can **add evidence** to answer questions **about student learning**.

A full picture of student achievement is best seen when these multiple measures are reviewed together.

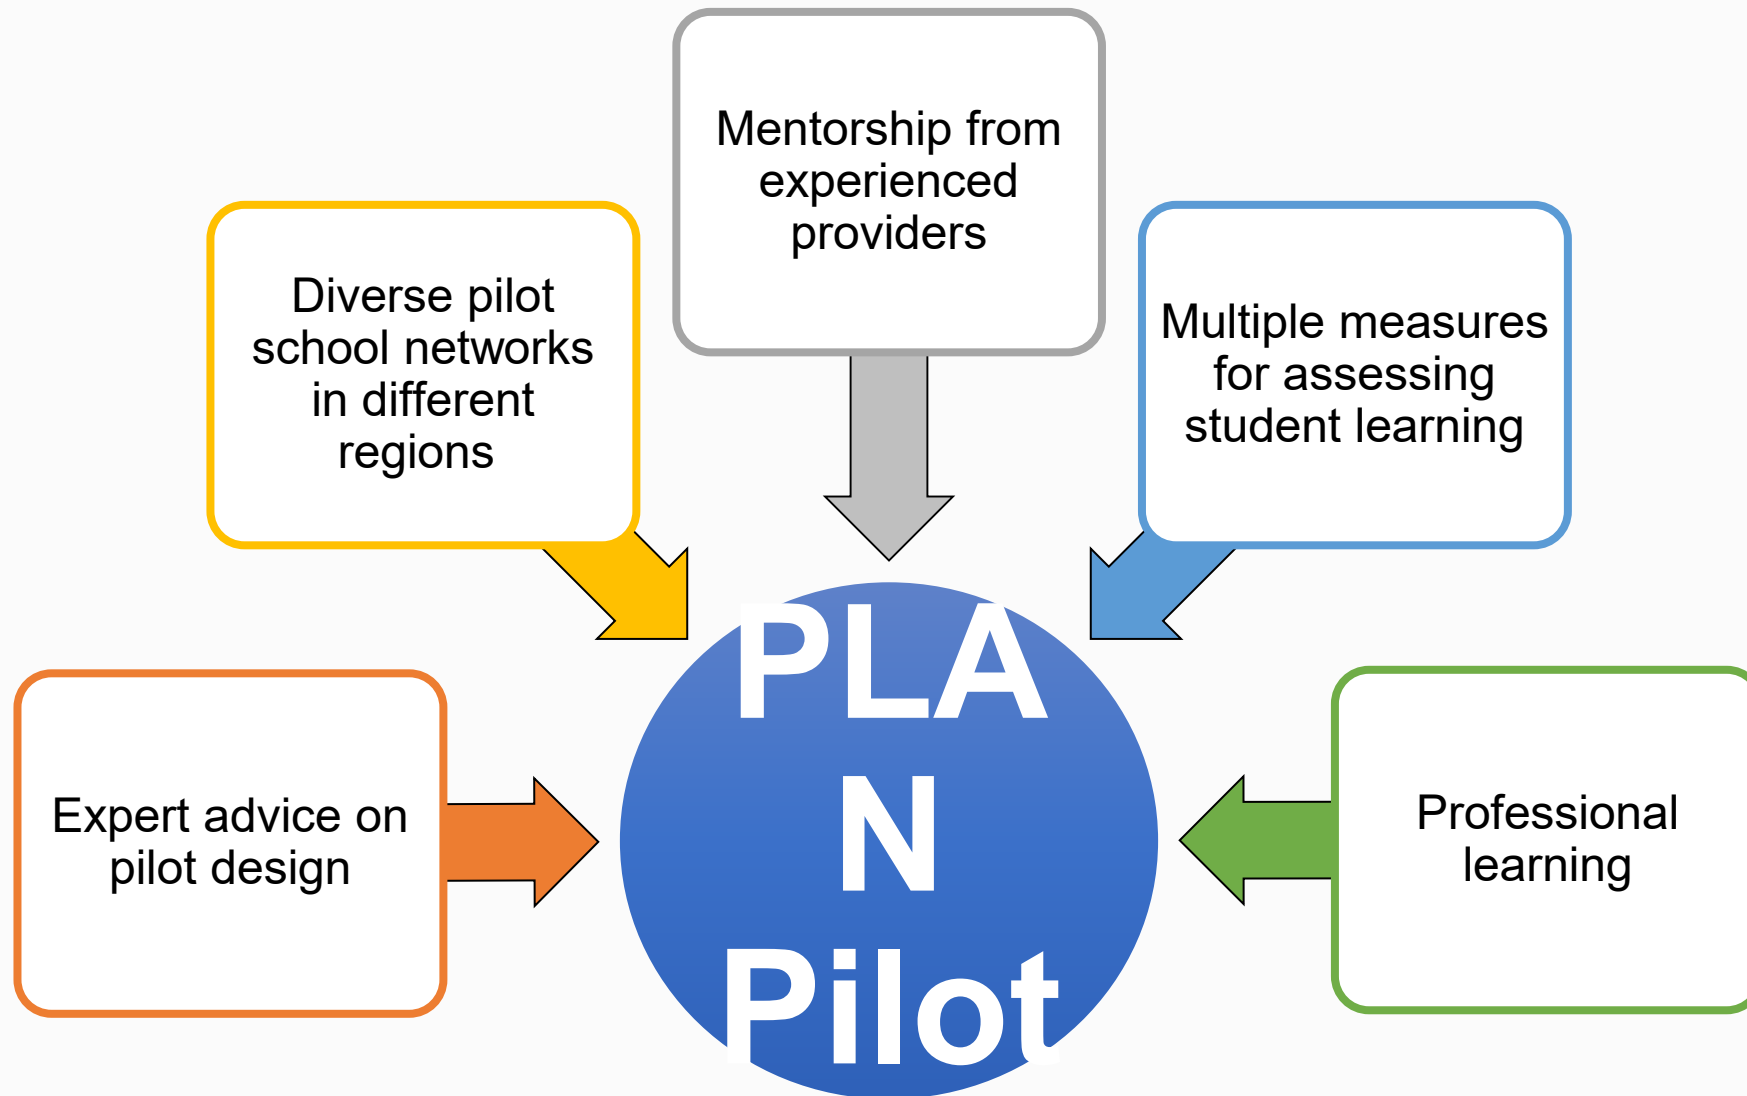

Research Design

In support of the **Grad Measures initiative**, the PLAN Pilot will look at how performance-based assessment approaches can be **implemented in a diverse range of schools** – urban & rural, large & small, with different student demographics; and **how to support schools** in making that transition.

Purpose: To explore the potential for New York's educational assessment system to be reimaged in a way that purposefully fosters high-quality instructional opportunities, provides authentic measures of deeper learning, and better prepares students for college and the workplace.
