Note: The Notifications link in the app only appears when you have have at least one mailing list with Mobile Notifications enabled.

Users can enable the toggle next to any list from which they would like to receive notifications. The first time they select to receive notifications, they will receive a system message confirming this choice.

Notifications for their selected lists will appear on the Notifications screen. Once they have signed up for notifications, they can manage their subscription settings using the gear icon on the Notifications screen or in the Settings section of their device.
