

ARTICLE VII. FACILITIES AND OPERATIONS

Section 2. Pest Management.

Each school building shall have an integrated pest management program. The pest management program shall be designed to minimize the use of pesticides in the school buildings and on school property and use the least caustic pesticides available. Annual notices to the parents of children attending the school shall be given within 30 days after the start of school and contain the information required by Michigan law. Advance notice of the application of the pesticide shall be given at least 48 hours before the application of the pesticide by posting the notice at the school entrance and using one other method permitted by state law, except in cases of emergency. The integrated pest management program shall be available for review by the parents. The Superintendent shall develop rules and regulations for school buildings to comply with Michigan law.
