

Prior Lake – Savage Area Schools 2022-2023 Annual Asbestos Notification

Prior Lake – Savage Area Schools in accordance with the Federal Asbestos Hazard Emergency Response Act (AHERA) continues to implement an E.P.A. approved asbestos management plan. This plan has been developed to identify and manage asbestos containing materials within ISD #719 buildings. ISD #719 approaches this issue in a safe and proactive manner to insure the health and safety of students, staff and other building occupants.

The following asbestos related activities have been completed in the 2021-2022 school year or will be completed within the 2022-2023 school year.

Fall 2021	Asbestos Periodic Inspection
Spring 2022	Asbestos Periodic Inspection
Fall 2022	Asbestos Periodic Inspection
Spring 2023	Asbestos Periodic Inspection

If you have questions regarding the District’s asbestos management plan, it is on file in the District Office and is available for public viewing during normal business hours. If you have questions regarding this information please contact the District Asbestos Program Manager, Jim Dellwo at (952) 226-0054.

Prior Lake – Savage Area Schools 2022-2023 Integrated Pest Management Notification

Janet B. Johnson Parents' Right-to-Know Act of 2000

All Minnesota schools are required to inform parents/guardians and school employees that they may request to be notified prior to pesticide application on school property. Pesticides include chemicals which are used to control insects, weeds, rodents or other pests as defined by the law (M.S. 123B.575, Subd. 9).

To provide the required information, schools must maintain a list of parents/guardians and school employees who request notification. Schools must also provide information about individual pesticide applications upon request, including the name of the pesticide product, and the time and location of the planned application. An estimated schedule of pesticide applications is available for review or copying at the District Office.

Pesticides and non-chemical treatments may be used in combination in and around schools for a variety of reasons, including the control of pests which have the potential to bite, sting, spread disease, cause asthma, and/or trigger an allergic reaction. Pesticides may also be used to prevent or control damage to materials within the school building or to the school building itself, or to control pests or weeds that are a nuisance.

The long-term health effects on children from the application of such pesticides or the class of chemicals to which they belong may not be fully understood. Children may be more susceptible to pesticides than adults due to their smaller size and rapid growth and development. Also, their playful behavior may expose them to more pesticide residue.

To limit the potential pesticide exposure, this school follows safety regulations to ensure pesticides are applied properly. All pesticide products, which are used in and around school buildings, are required to be registered with the Minnesota Department of Agriculture and the U.S. Environmental Protection Agency. In addition, school employees and certified and licensed applicators are required by state and federal law to comply with all requirements of the pesticide label, including building sites, application rates, re-entry intervals, posting, use of personal protective equipment, use restrictions, and disposal on the product label.

If you would like to be notified prior to pesticide applications made on days other than those specified in the estimated schedule (excluding emergency applications), please contact:

Prior Lake – Savage Area Schools 2022-2023 Indoor Air Quality (IAQ) Annual Notification

Prior Lake – Savage Area Schools ISD #719 in coordination with the Minnesota Department of Education and the Environmental Protection Agency (EPA) has developed an indoor air quality management plan. A factor of the IAQ management plan is the following yearly correspondence to all district residents on the status of IAQ issues within the district.

The School Board of Education has approved the Prior Lake – Savage Area Schools IAQ Management Plan. These are the IAQ related activities that have taken place in FY22 and will take place in FY23.

Spring 2022 District Wide	Indoor Air Quality questionnaires
Fall 2021 District Wide	Indoor Air Quality walkthrough
Spring 2023 District Wide	Indoor Air Quality questionnaires
Fall 2022 District Wide	Indoor Air Quality walkthrough

Throughout the upcoming year ISD #719 will continue to respond to IAQ concerns in a proactive manner to ensure the health and safety of students, staff and building visitors. If you have questions relating to IAQ or would like to review the district IAQ management plan, please feel free to contact Jim Dellwo – Director of Operations & Transportation at (952) 226-0054.

LEAD-IN-WATER ANNUAL NOTICE

Minnesota Statute 121A.335 requires public school buildings serving pre-kindergarten through grade 12 to test for lead in water every 5 years. This statute also requires school districts to make the results of the testing available to the public for review and to notify parents of the availability of the information. Notification may be accomplished by publishing a statement in a “Back to School” newsletter or publication that is available to staff, student, parents and the public.

Prior Lake – Savage Area Schools is committed to providing a safe working and learning environment for employees and students. The District has developed a lead in water management plan and testing program that complies with Minnesota Statute 121A.335, as well as recommendations from the Environmental Protection Agency’s (EPA’s) Lead Contamination Control Act (LCCA) of 1988 and the Minnesota Department of Health (MDH), and Minnesota Department of Education (MDE).

For more information on Prior Lake – Savage Area Schools lead reduction and testing program, please contact Jim Dellwo – Director of Operations & Transportation at (952) 226-0054.
