

## MAMMALS

CHORUS:

Em                      B7                      Em  
Mammals, Mammals, Mammals everywhere  
Mammals, Mammals, they're flying in the air,  
Mammals, Mammals, they're swimming in the sea,  
Mammals, Mammals, just like you and me

Mammals like camels come by land or sea,  
They can sky high in the forest canopy  
Could be a lion or a manatee,  
They feed off what is called a mammary

CHORUS

Bats are mammals even though they fly up in the sky,  
Finding their prey with a sonar-like eye,  
Echolocation helps to guide them in the night  
Just a vibration creates a sense of sight

CHORUS

I know some mammals that are square pegs  
Funky southern mammals that lay eggs  
I see you laughin', but I wouldn't kid ya  
They're the duck billed platypus and the spiny echidna

CHORUS

Let me tell you 'bout some mammals in the ocean,  
Dolphins, whales, and seals are causing commotion,  
Trying to get a bite so that they can eat,  
Turning fat to blubber, to insulate their heat

CHORUS

Attention! Alert! There are mammals all around us,  
Hairy, smelly mammals, they've got the place surrounded,  
So turn to your neighbor, say "I'm a mammal too"  
And throw your hands up if you're in the mammal crew
