

Engineering (PLTW)

Trade, Technology, Engineering, and Industrial Education (TTE&I) programs provide students with the skills and conceptual knowledge needed for careers in industry, engineering and design. Students can focus on industry certifications for careers immediately after graduation or develop skills and knowledge needed for higher level professional degrees in engineering and design fields.

Course Levels

Career & Technical Student Organization

Although there are currently no colleges in NC that grant college credit for PLTW Courses - some out of state colleges do.
