

Food and Nutrition

Family and Consumer Sciences (FCS) provides the bridge needed by all students to deal with issues such as work-and-family, health care, child and elder care, and technology usage. FCS Education is a catalyst to bring these issues into action-oriented, skill-building educational programs. The North Carolina FCS Education program provides a platform for students to transition into adult life by gaining a strong foundation of the knowledge and skills needed for successfully living and working in a diverse, global society.
