

# Daily Schedule

- Learning at home does not look like a typical school day schedule. The learning opportunities that teachers provide are meant to be flexible.
- Work at your child and family's own pace. Your teachers have chunked the learning into increments that are appropriate for each grade level.
- Ideally students, should have movement breaks in between activities.
- If your child wants extra activities or tasks there are additional options on your teacher's website—Additional play and reading are always encouraged!
