Secondary Practical Nursing

IS THIS YOU?

Social | Realistic

Social personality types are “helpers”; they are friendly, outgoing, thoughtful, generous, empathetic and natural born helpers. They like to make a valuable impact on the lives of others. They are drawn to others with a desire to connect and seek close relationships. They value cooperation and cohesion. Helpers with a secondary personality type of ‘realistic’ like to do practical and hands-on work and will thrive in careers where they can use their hands to help people.

Find your work personality type with this free assessment at truity.com:
