Havre Public Schools
Kindergarten Mathematics

Course Information:

Topic: Mathematics
Grade Level: Kindergarten
Length Per Day: 45 Minutes Per Day

Essential Understanding:

In Kindergarten, instructional time should focus on two critical areas: (1) representing and comparing whole numbers, initially with sets of objects; (2) describing shapes and space. More learning time in Kindergarten should be devoted to numbers than to other topics. core standards

Theme Samples:

1. Students use numbers, including written numerals, to represent quantities and to solve quantitative problems, such as counting objects in a set; counting out a given number of objects; comparing sets or numerals; and modeling simple joining and separating situations with sets of objects, or eventually with equations such as $5 + 2 = 7$ and $7 – 2 = 5$. (Kindergarten students should see addition and subtraction equations, and student writing of equations in kindergarten is encouraged, but it is not required.) Students choose, combine, and apply effective strategies for answering quantitative questions, including quickly recognizing the cardinalities of small sets of objects, counting and producing sets of given sizes, counting the number of objects in combined sets, or counting the number of objects that remain in a set after some are taken away.

2. Students describe their physical world using geometric ideas (e.g., shape, orientation, spatial relations) and vocabulary. They identify, name, and describe basic two-dimensional shapes, such as squares, triangles, circles, rectangles, and hexagons, presented in a variety of ways (e.g., with different sizes and orientations), as well as three-dimensional shapes such as cubes, cones, cylinders, and spheres. They use basic shapes and spatial reasoning to model objects in their environment and to construct more complex shapes. core standards

Course Objectives and Expectations:

In Kindergarten, instructional time should focus on two critical areas:
1. Representing and comparing whole numbers, initially with sets of objects
2. Describing shapes and space
(opi.mt.gov - Montana Content Standards for Mathematical Practices and Mathematics Content)

Mathematical Practices

1.   Make sense of problems and persevere in solving them.
2.   Reason abstractly and quantitatively.

3.   Construct viable arguments and critique the reasoning of others.
4.   Model with mathematics.
5.   Use appropriate tools strategically.
6.   Attend to precision.
7.   Look for and make use of structure.
8.   Look for and express regularity in repeated reasoning.

core standards

Student Objectives:

Counting and Cardinality
- I can count to 100 by 1's and 10's.
- I can count to 20 in the correct order.
- I can write my numbers to 20.
- I can represent the correct number of objects to 20.
- I can count objectives to 20 (unless scattered in to 10).
- I can compare two numbers (between 1-10)
- I can compare objects in groups by groups by greater than, less than or equal to.

Numbers and Operations in Base Ten:
- I can count to 19 in the correct order.
- I can write my numbers up to 19.
- I can make numbers 11-19 using base ten.

Measurement and Data:
- I can compare and classify objects by length, weight, and size.

Geometry:
- I can classify, describe, and construct 2D and 3D shapes.
- I can identify shapes in my environment.

Pacing and Pertinent Montana Content Standard:

Numbers to 100	

Trimester 1, 2, & 3	**Standard-K.CC.A.1** Count to 100 by ones and tens.
	Standard- K.CC.A.2 Count forward beginning from a given number within the known sequence (instead of having to begin at 1).
	Standard- K.CC.A.3 Write numbers from 0-20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects.)
	Standard- K.CC.B.4 Understand the relationship between numbers and quantities; connect counting and cardinality.
	    ‧ When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.
	    ‧ Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.
	    ‧ Understand that each successive number name refers to a quantity that is one larger.
	Standard: K.CC.B.5 Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects.
	Standard: K.CC.C.6 Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies. (Include groups with up to ten objects.)
	Standard: K.CC.C.7 Compare two numbers between 1 and 10 presented as written numerals.
	Standard: K.NBT.A.1 Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (such as 18=10+8); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.

Organizing by Size, Weight & Length	
Trimester 1 & 3	**Standard: K.MD.A.1** Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object. **Standard: K.MD.A.2** Directly compare two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute, and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter.

Positional Words	
Trimester 2	**Standard: K.G.A.1** Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to.

Shapes	
Trimester 2 & 3	**Standard: K.G.A.2** Correctly name shapes regardless of their orientations or overall size. **Standard: K.G.A.3** Identify shapes as two-dimensional (lying in a plane, flat) or three-dimensional (solid). **Standard: K.G.B.4** Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/"corners") and other attributes (e.g., having sides of equal length). **Standard: K.G.B.5** Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes. **Standard: K.G.B.6** Compose simple shapes to form larger shapes. For example, "Can you join these two triangles with full sides touching to make a rectangle?"

Comparing Sets	
Trimester 2	**Standard: K.MD.B.3** Classify objects into given categories; count the numbers of objects in each category and sort the categories by count. Limit category counts to be less than or equal to 10. **Standard: K.MD.A.2** Directly compare two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute, and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter.

Addition & Subtraction Stories	
Trimester 3	**Standard: K.NBT.A.1** Compose and decompose numbers from11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (such as 18=10+8); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.

Timeline:

Trimester 1:
Numbers to Five - 2 Weeks
Numbers to 10 - 2 Weeks
Order by Size, Length and Weight - 2 Weeks
Counting and Numbers 0-10 - 2 Weeks
Size and Position - 1 Week

Trimester 2:
Numbers 0 to 20 - 3 Weeks
Solid and Flat Shapes - 2 Weeks
Numbers to 100 - 3 Weeks
Comparing Sets - 2 Weeks

Trimester 3:
Ordinal Numbers - 1 Week
Counting on and Counting Back - 2 Weeks
Number Facts - 1 Week
Length and Height - 1Weeks
Addition Stories - 1 Week
Subtraction Stories - 1 Week
Measurement - 1 Week

KINDERGARTEN STANDARDS

Counting and Cardinality (CC)
Know number names and the count sequence.
- Count to 100 by ones and by tens. (K.CC.1)
- Count forward beginning from a given number within the known sequence (instead of having to begin at 1). (K.CC.2)
- Write numbers from 0-20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects). (K.CC.3)

Count to tell the number of objects.
- Understand the relationship between numbers and quantities; connect counting to cardinality.
  - When counting objects, say the number names in the standard order, pairing each object with one and only one number
  - name and each number name with one and only one object from a variety of cultural contexts, including those of Montana American Indians.
  - Understand that the last number name said tells the number of objects counted and the number of objects is the same regardless of their arrangement or the order in which they were counted.
  - Understand that each successive number name refers to a quantity that is one larger. (K.CC.4)

- Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects from a variety of cultural contexts, including those of Montana American Indians. (K.CC.5)

Compare numbers.
- Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies. (K.CC.6)
- Compare two numbers between 1 and 10 presented as written numerals. (K.CC.7)

Operations and Algebraic Thinking (OA)
Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.
- Represent addition and subtraction with objects, fingers, mental images, drawings, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations. [Drawings need not show details, but should show the mathematics in the problem.] (K.OA.1)
- Solve addition and subtraction word problems from a variety of cultural contexts, including those of Montana American Indians, and add and subtract within 10, e.g., by using objects or drawings to represent the problem. (K.OA.2)
- Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., $5 = 2 + 3$ and $5 = 4 + 1$). (K.OA.3)
- For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation. (K.OA.4)
- Fluently add and subtract within 5. (K.OA.5)

Number and Operations in Base Ten (NBT)
Work with numbers 11 – 19 to gain foundations for place value.
- Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, record each composition or decomposition by a drawing or equation (such as $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones. (K.NBT.1)

Measurement and Data
Describe and compare measurable attributes.
- Describe measurable attributes of objects, such as length or weight and describe several measurable attributes of a single object. (K.MD.1)
- Directly compare two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter. (K.MD.2)

Classify objects and count the number of objects in each category.
- Classify objects from a variety of cultural contexts, including those of Montana American Indians, into given categories; count the numbers of objects in each category, and sort the categories by count. (K.MD.3)

Geometry (G)

Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).

- Describe objects, including those of Montana American Indians, in the environment using names of shapes, and describe the relative positions of these objects using terms such as: above, below, beside, in front of, behind, and next to. (K.G.1)
- Correctly name shapes regardless of their orientations or overall size. (K.G.2)
- Identify shapes as two-dimensional (lying in a plane, "flat") or three-dimensional ("solid"). (K.G.3)

Analyze, compare, create, and compose shapes.

- Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/"corners") and other attributes (e.g., having sides of equal length). (K.G.4)
- Model shapes in the world from a variety of cultural contexts, including those of Montana American Indians, by building shapes from components (e.g., sticks and clay balls) and drawing shapes. (K.G.5)
- Compose simple shapes to form larger shapes. For example, "Can you join these two triangles with full sides touching to make a rectangle?" (K.G.6)
