

TEACHING ABOUT DRUGS, ALCOHOL AND TOBACCO

ACPS provides instruction concerning

- drugs and drug abuse,
- the public safety hazards and dangers of alcohol abuse, underage drinking, underage marijuana use, and drunk driving,
- the health and safety risks of using tobacco products, nicotine vapor products, alternative nicotine products, and
- gambling and the addictive potential thereof.

The health education program includes instruction in drug and substance abuse prevention. It encourages and supports organizations and activities that develop a positive peer influence and adult support concerning substance abuse and creates a climate whereby students may seek and receive counseling about substance abuse and related problems without fear of reprisal.
