

## New Math Materials

In April 2023 the school board adopted the following materials for K-8 math:

- *Bridges* Math program by the Math Learning Center for Grades K-4

Kids See the Math. Teachers See Results.

- *Envision* by Savvas for Grades 5-8

## Details

A team of teachers looked at evidence-based math programs, narrowing the field from 7 to 4 to 2.

***K-4 Bridges by the Math Learning Center*** (finished 2nd during last math adoption). Bridges - more activity based, better at developing number-sense which is critical, materials are more appropriate for primary grades, more motivating for students.

***5-8 Envision by Savvas*** (adopted by Belgrade High School in 2021) Envision - good for upper elementary students, Spanish version, great online resources for upper elementary students.

We conducted a 6-week pilot of the top two programs in grades K-4. The feedback from pilot teachers was heavily weighted in the vetting process.

## **Rationale**

Improving our students' math performance has been a priority. Having a primary resource that is proven to be effective is an important step to making that happen.

## **Professional Development**

Each program will be presenting PD prior to the school year starting. K-4 Instructional Coaches will provide ongoing support for teachers while Savvas will provide online support for math instructors.
