

Hinsdale High School District 86

Weekly Update

July 7, 2023

Update No. 109

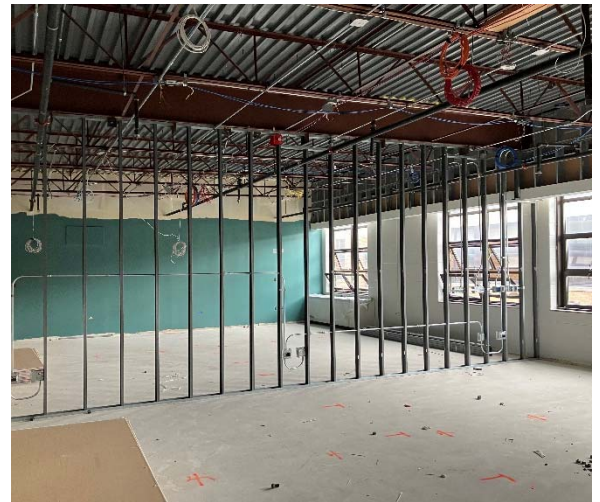

The Referendum Renovations are in their final phase. Phase 4 is comprised of refreshing 85 classrooms at Hinsdale Central. Improvements include new flooring, lighting, paint, and acoustic ceilings. Most classrooms are getting new furnishings.

The week of July 3-7, abatement continued and demolition wrapped up. Painting finished in the science wing and proceeded upstairs to social studies. Ceiling grid and light fixture installation continued. Flooring materials arrived on site for installation to commence next week.

Next Steps: The painters will continue through the second floor, followed by ceiling grid and light fixtures. Flooring installation will begin on the second floor.

Left: A science classroom with fresh paint and light fixtures. The ceiling tiles will be the last item to go in.

Right: A new wall will replace an old folding partition wall between two classrooms on the second floor.

Left: The window installation team continues progressing while dodging this week's storms.
