## IPM statement

It is the goal of Pleasanton Unified School District to implement IPM by focusing on long-term prevention or suppression of pests

through accurate pest identification, by frequent monitoring for pest presence, by applying appropriate action levels, and by making the habitat less conducive to pests using sanitation and mechanical and physical controls. Pesticides that are effective will be used in a manner that minimizes risks to people, property, and the environment, and only after other options have been shown ineffective.

Our pest management objectives are to: *(Example: Focus on long-term pest prevention)*

Maintain healthy campus while focusing on long term prevention.

## IPM team

In addition to the IPM Coordinator, other individuals who are involved in purchasing, making IPM decisions, applying pesticides, and complying with the Healthy Schools Act requirements, include:

Name and/or Title	Role in IPM program
Mehdi Rajabzadeh	Executive Director - Operations
Juan Sanchez	Manager - Custodial
Aisha Fish	Executive Secretary- Operations
Michelle Hill	District Secretary - Operations
Cassandra Lopez	District Secretary - Operations
Juan Castro Jr.	Certified Applicator - Grounds

## Pest management contracting

✓ Pest management services are contracted to a licensed pest \_\_\_\_\_ control business. Pest Control Business name(s): Designated Vendor

✓ Prior to entering into a contract, the school district has confirmed that the pest control business understands the training requirement and other requirements of the Healthy Schools Act.

## Pest identification, monitoring and inspection

Pest Identification is done by: Campus Staff and Designated Vendor

Monitoring and inspecting for pests and conditions that lead to pest problems are done regularly by District – Custodial Staff and Grounds and results are communicated to the IPM Coordinator.

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include:

*(Example: Sticky monitoring boards are placed in the kitchen and are checked weekly by custodial staff.)*

## Pests and non-chemical management practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove	Fix leaks	Seal	Install	Physical	Traps	Carbon Monoxide Treatment
	food		cracks		barriers		
Ants	✓	✓	✓		✓	✓	
Roaches	✓	✓	✓		✓	✓	
Gophers		✓			✓	✓	✓
Rodents	✓	✓	✓	✓	✓	✓	
Spiders	✓	✓	✓		✓		

## Chemical pest management practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

The use of non-exempt pesticides will be limited to emergency conditions and situations and performed during non-school days (unless the emergency situation requires otherwise) to limit exposure to students and staff.

This school district expects the following pesticides (pesticide products and active ingredients) to be applied during the year.
