

Funding Sources Outside the School System

Grant policy

It is the policy of the Garfield Re-2 School District to assist and support schools and departments in the pursuit and acquisition of funding opportunities from federal, state and other governmental units, as well as private and foundation sources. These grants should advance major system priorities and school improvement plans, enhance professional development efforts, and improve student achievement.

Grant philosophy

1. The school district will aggressively and systematically seek, secure, maintain and manage grant funds consistent with major system priorities of the district and school improvement plans of schools.
2. The school district will establish and maintain a specific grant management plan. The grant management plan will explicitly outline activities, quality control measures, accountability measures, responsibilities, and deadlines for competitively seeking, securing, and managing grant funds.
3. The school district will commit and allocate adequate resources to ensure that its grant management plan is effectively implemented and operated.
4. The school district will use grant funds exclusively to supplement and enhance current efforts of the school system.
5. The school district will operate grant-sponsored programs in accordance with the terms and conditions of the funding agency.
6. The school district will systematically evaluate and assess the effectiveness of its grants management plan and make modifications to the plan when deemed desirable and appropriate.
