

Math Science Sequence 2023 - 2024 (edited 1-9-23)

Computer Science Offerings:
 Accelerated Computer Sci
 AP Computer Science Principles
 AP Computer Science A

How to use this chart:
 This is done by matching colors:

Special cases:

Choose the science course the student wishes to enroll in for the next school year. Then choose the appropriate minimum math course which is recommended. For example if a student chooses Honors Biology they should also enroll in Honors Algebra 2. Obviously a student may be enrolled in a higher math course but should not be in a lower math course than the minimum recommended. If the science box is clear then there is no minimum math requirement for that science course.

- 9th** grade students in Accelerated Algebra 2 may take Honors Biology
- 9th** grade Honors Study of Biology (gifted)
- 10th** grade students in Accelerated Geometry may take Honors Chemistry
- 11th** grade students in Accelerated Analysis may take Honors Physics
- 12th** Honors Experimental Research in STEM may be taken concurrently with Honors Physics but not in place of it.
- *Accel Calculus students can take any AP course that an AB Calc student can take (also offered as gifted - Honors Study of Exp. Design in STEM)
