12. Adjournment of Regular Board Meeting

The meetings of the Newport School Board are open public meetings and the public is welcome to attend and observe. While the board has set aside a portion of the meeting for audience participation and welcomes such participation at that time, the meetings are not a forum for public debate. If you wish to address the board during the designated audience time, please register with the board chair upon arrival. If, at any time during the meeting, you have questions or comments, please wait to be recognized by the Board Chair. We ask that the audience refrain from commenting and/or debating issues during the meeting.

NEWPORT SCHOOL DISTRICT
REGULAR MEETING
BOARD OF DIRECTORS

May 22, 2017

Highly Capable Program Changes for the 2017-2018 School Year

- The middle school will have a fifth grade honors math class, a sixth grade honors math class, and a 7th/8th honors ELA class. The reason in making these changes from honors social studies to honors math are driven by a need to better prepare our highly capable learners for the 21st century skills they will need post high school.
 - In implementing an honors math class beginning in fifth grade, my hope is to have more students enrolling in our AP Stats and AP Calculus classes at the high school. STEM careers are leading the way in the United States for building our economy through innovation, and our highly capable learners are the future of STEM in our community and the United States as a whole.
 - Our seventh and eighth grade students will be taking a two year honors ELA class with curriculum for the eighth and ninth grade standards. They will be able to continue on this trajectory with honors ELA classes at the high school.
- I also formed a Highly Capable Parent Advisory Committee. The first meeting was at 4:30 pm on May 9th, 2017. There will be more meetings next year to help accomplish the goals below. The purpose of this committee is to form a working relationship between school personnel, parents, and the community in order to best serve our highly capable learners. The Highly Capable Program seeks to recognize and develop talents in advanced-level learners. The following goals are suggested to offer a continuum of program services:
 - Ensure that gifted education services are an integral part of the general education program.
 - Provide differentiated instruction and curricular materials for everyday core classes to help them continuously improve student achievement and performance.
 - Promote communication of district gifted identification and programming procedures to all schools and families. Ideally, I'd like to establish a school wide screener for second or second grade to identify gifted learners based on data, in addition to current teacher recommendations.
 - Recognize and develop diverse abilities and talents of students through additional resources and sources within our community.
 - Gather and search for additional materials for programs to enrich our students.
 - Find sources, parents and people within our community to teach our students their unique talents, expertise and ideas.
 - Help with our Math Is Cool program competitions and preparations. Making this into a club next year is a goal that we will accomplish.
 - These goals are based on gifted program standards and content goals of the National Association for Gifted Children (NAGC) as well as Newport School District's Highly Capable policies.
- Quarterly newsletters will be sent to parents to communicate what is happening in the highly capable program and provide resources for parents to help their gifted children

Policy 2410 -
High School Graduation
Requirements

High School Graduation Requirements

- A. The board will award a regular high school diploma to every student enrolled in the District who meets the requirements of graduation established by the district. Only one diploma will be awarded with no distinctions being made between the various programs of instruction which may have been pursued.**

The board will establish graduation requirements which, as a minimum, satisfy those established by the State Board of Education:

Subject	Newport High School		Pend Oreille River School	
	Classes of 2016-18	Classes of 2019 and Beyond	Classes of 2016-18	Classes of 2019 and Beyond
English	4	4	4	4
Mathematics	3	3*	3	3*
Science	2 (1 Lab)	3* (2 Labs)	2 (1 Lab)	3* (2 Labs)
Social Studies	3	3	3	3
Health and Fitness (one class must including training in cardiopulmonary resuscitation (CPR) and use of automatic external defibrillators (AED)).	.5 credit health; 1.5 credit fitness	.5 credit health; 1.5 credit fitness	.5 credit health; 1.5 credit fitness	.5 credit health; 1.5 credit fitness
Arts	1	2**	1	2**
World Languages	0	2**	0	2**
Occupational Education	1	1	1	1
Electives	7	4	4	4
District Requirement: Portfolio/Culmination Project	No Credit	No Credit	No Credit	No Credit
Total District Credit Requirements	23	24	20	24

*The 3rd credit of science and the 3rd credit of math are chosen by the student based on the student's interest and High School and Beyond Plan, and approved by the parent or guardian, or if the parent or guardian is unavailable or does not indicate a preference, the school counselor or principal (WAC 180-51-068)

**Personalized Pathway Requirement are related courses that lead to a specific post high school career or educational outcome chosen by the student based on the student's interests and High School and Beyond Plan, that may include Career and Technical Education, and are intended to provide a focus for student's learning.

The board will approve additional graduation requirements as recommended by the superintendent.

In addition to the minimum credit requirements, to earn a diploma each student must:

Pass the reading and writing portions of the statewide assessment or a state approved alternative. Students in the classes of 2016, 2017 and 2018 must pass one of the following comprehensive English Language Arts (ELA) exit exams: reading and writing portions of the statewide assessment or new ELA exit exam (administered beginning spring 2015) or new 11th Grade Smarter Balanced Comprehensive ELA Test (administered beginning spring 2015). Students in the class of 2019 and beyond must pass the 11th Grade Smarter Balanced Comprehensive ELA Test; and

1. Complete a High School and Beyond Plan: Within the first year of high school enrollment, each student will develop a plan for satisfying the state and district's high school graduation requirements and for their first year after high school completion. The plan should be developed in collaboration with the student, parent and district staff. The plan should include how the student will satisfy the district's academic credit requirements, preparation for successfully completing the statewide assessment, a description of the student's culminating project and the student's goals for the year following graduation. Each student plan should be reviewed annually at the beginning of the school year to assess student progress, to adjust the plan, and to advise the student on steps necessary for successful completion of the plan;
2. Complete a Culminating Project: During the course of their high school career, each student will complete a culminating project. The project will demonstrate the student's ability to think analytically, logically and creatively and to integrate experience and knowledge to form reasoned judgments and solve problems. The project will also have a connection to the world of work in that it will demonstrate that the student understands the importance of work and how performance, effort, and decisions directly affect future career and educational opportunities;
3. Complete math requirements. Students in the classes of 2015, 2016, 2017 and 2018 must pass one end of course assessments (Algebra I or Geometry or an integrated math equivalent; or, beginning spring 2015, New Algebra/Integrated Math 1 EOC Exit Exam or New Geometry/Integrated Math 2 EOC Exit Exam or New 11th Grade Smarter Balanced Comprehensive Math Test; or a state-approved alternative. Students in the class of 2019 and beyond must pass the 11th Grade Smarter Balanced Comprehensive Math Test; and
4. Complete science requirements: Students in the classes of 2017 and beyond must pass the biology end-of-course assessment or a state-approved alternative.

B. Students in the class of 2013 and beyond must complete mathematics courses in one of the following progressive sequences.

1. Algebra I, Geometry, and Algebra II;
2. Integrated Mathematics I, Integrated Mathematics II, and Integrated Mathematics III; or
3. Any combination of (a) and (b) in progressive sequence.

In lieu of a third credit of mathematics, students may choose an alternative mathematics course, if the parent/guardian agrees that the third credit mathematics elective is supportive of the student's education and career goals. Before approval of the elective third mathematics credit a meeting will be held with the student, the parent/guardian and the school staff to discuss the student's High School and Beyond Plan and the mathematics requirements for post-secondary and career choices.

The district will obtain a signed consent from the parent for the student to enroll in the

alternative third credit of mathematics. The consent form will confirm the meeting, that the parent understands the impact of the selection on the student's educational and employment options, and that the alternative is most appropriate for the needs of the student. Students may also satisfy the mathematics requirements by earning equivalency based credit in career and technical education mathematics courses. Those credits must be recorded using the equivalent academic high school department designation.

C. A student will receive a certificate of academic achievement only if they earn the appropriate number of credits required by the district, complete a culminating project, complete the high school and beyond plan, and meet the reading, writing and math standards on the high school statewide assessment or an appropriate alternative assessment.

1. Students qualifying for special education services will earn a certificate of individual achievement as determined by their individual education plan.

D. High school credit will be awarded for successful completion of a specified unit of study. In this district, successful completion of a specified unit of study means:

1. Earning a passing grade according to the district's grading policy; and/or
2. Demonstrating proficiency/mastery of content standards as determined by the district; and/ or
3. Successfully completing an established number of hours of planned instructional activities to be determined by the district.

The district will establish a process for determining proficiency/mastery for credit-bearing courses of study.

E. The superintendent will develop procedures for implementing this policy which include:

1. Establishment of the process and assessment criteria for the high school culminating project requirements, and determination of the education plan process for identifying competencies;
2. Establishing the process for completion of the High School and Beyond Plan;
3. Recommending course and credit requirements which satisfy the State Board of Education requirements and recognize the expectations of the citizens of the district;
4. Determining which courses satisfy particular subject area requirements and whether a particular course may satisfy more than one subject area requirement, including a process for determining the credits the district will recognize for courses taken through another program recognized by the state (e.g. another public school district or an approved private school) or those courses taken by students moving into the state from another state or country. Decisions regarding the recognition of credits earned before enrolling in the district will be based on the professional judgment of the high school principal or designee based on an evaluation of the student's former program and demonstrated knowledge and skills in the discipline for which credit is sought. The decision of the principal may be appealed to the superintendent within fifteen school days;
5. Making graduation requirements available in writing to students, parents and members of the public;
6. Providing for a waiver of graduation requirements for an individual student when permitted. All state graduation requirements must be satisfied unless a waiver is permitted by law;
7. Granting credit for learning experiences conducted away from school, including National Guard high school career training;
8. Granting credit for correspondence, vocational-technical institutes and/or college courses for college or university course work the district has agreed to accept for high school credit. State law requires that the district award one high school credit for every five quarter hour credit or three semester hour credit successfully earned through a college or university,

except for community college high school completion programs where the district awards the diploma. Tenth and eleventh grade students and their parents will be notified annually of the Running Start Program;

F. Granting credit for work experience:

1. Granting credit based upon competence testing, in lieu of enrollment;
2. Granting credit for high school courses completed before a student attended high school, to the extent that the course work exceeded the requirements for seventh or eighth grade;
3. Counseling of students to know what is expected of them in order to graduate;
4. Preparing a list of all graduating students for the information of the board and release to the public;
5. Preparing suitable diplomas and final transcripts for graduating seniors;
6. Planning and executing graduation ceremonies; and
7. Developing student learning plans for students who are not successful on one or more components of the statewide assessment.

In the event minimum test requirements are adopted by the board, a student who possesses a disability will satisfy those competency requirements which are incorporated into the Individualized Education Program (IEP). Satisfactory completion of the objectives incorporated into the IEP will serve as the basis for determining completion of a course.

A student will be issued a diploma after completing the district's requirements for graduation. In lieu of the certificate of academic achievement, special education students may earn a certificate of individual achievement. A student will also be advised that he/she may receive a final transcript. However, a student's diploma or transcript may be withheld until the student pays for any school property that has been lost or willfully damaged. Upon payment for damages, or the equivalency through voluntary work, the diploma or transcript will be released. When the damages or fines do not exceed \$100, the student or his/her parents will have the right to an appeal using the same process as used for short-term suspension as defined in Policy 3241, Classroom Management, Corrective Actions or Punishments. When damages are in excess of \$100, the appeal process for long term suspension as defined in Policy 3241, Classroom Management, Corrective Actions or Punishments, will apply.

Graduation requirements in effect when a student first enrolls in high school will be in effect until that student graduates unless such period is in excess of ten years.

In the event that other forms of corrective actions are imposed for violations of school rules, the student may be denied participation in graduation ceremonies. Such exclusion will be regarded as a school suspension. In such instances, the diploma will be granted.

Policy 2107 -
Comprehensive Early Literacy
Plan

Comprehensive Early Literacy Plan

The district recognizes that early literacy is fundamental to students' development of listening, speaking, reading, writing and critical thinking skills. The district will develop and implement reading and early literacy services to kindergarten through fourth grade students based on student need for additional support so that every student has the opportunity to build a strong foundation for academic success.

General requirements

The plan will include:

1. Use of annual screening assessments and other tools (e.g., Washington kindergarten inventory of developing skills, Washington state early learning and development guidelines for birth through third grade, the second grade reading assessment under RCW 28A.300.310, local assessments) to identify at-risk readers; and
2. Research-based family involvement and engagement strategies, including those that help families and guardians learn to assist student reading and early literacy skills at home.

In order to keep parents informed and engaged in their student's reading progress, the district will require that report cards for students in kindergarten through fourth grade report the student's progress toward reading skill acquisition and whether the student is reading at grade level.

If the student is not reading at grade level, the teacher and other appropriate school personnel will:

- 1) Advise the parent or guardian as to which interventions and/or strategies the district will use to help improve the student's reading skills; and
- 2) Provide strategies for parents or guardians to use at home to assist their student in improving their reading skills.

Requirement specific to third grade students

Prior to the return of the results of the statewide student assessment in English language arts, teachers and parents of students in third grade who are reading below grade-level or who, based on formative or diagnostic assessment and other indicators are likely to score in the below basic level (level one in a four-level scoring system on the statewide student assessment) on the third grade statewide student assessment in English language arts will meet to discuss the student's progress. Teachers may use a regularly scheduled parent-teacher conference to satisfy this meeting requirement.

At the meeting, the teacher will inform the parents/guardians of:

- The requirements of this policy;
- The intensive reading improvement strategies that will be available to their student before fourth grade; and
- The school district's grade placement policy for the following year.

If a third grade student scores below grade level on the third grade statewide student assessment in English language arts and no meeting took place prior to the return of the results as indicated above, the principal or designee will notify the student's parents/guardians of:

- The fact that their student scored below basic;
- The requirements of this policy with regard to such a score;

- The intensive improvement strategy options available;
- The school district's grade placement policy;
- Contact information for a school district employee who can respond to questions and provide additional information; and
- A reasonable deadline for obtaining the parent's consent regarding the student's improvement strategies that will be implemented and the student's grade placement.

The district must obtain parent/guardian consent regarding appropriate grade placement and the intensive improvement strategy to be implemented. For students to be placed in fourth grade, the strategies discussed must include one provided, supported or contracted by the school district that includes a summer program or other options developed to meet the needs of students to prepare for fourth grade. The strategy must be implemented in consultation with the parents/guardians.

If the district does not receive a response from a parent/guardian by the deadline or within a reasonable time thereafter, the principal or designee will make a decision on the student's grade placement for the following year and the intensive improvement strategies that will be implemented during the following school year. If the principal and parent cannot agree on the appropriate grade placement and improvement strategies from the list of available options, the district will honor the parent's request.

If a student does not have a score in English language arts on the third grade statewide assessment but the district determines or is able to anticipate (using district or classroom-based formative or diagnostic assessments or another standardized assessment), that that student is below basic, the district will follow the same process for third grade students listed in this policy.

Students in the transitional bilingual instruction program are exempt from this process, unless the student has participated in the program for three school years and receives a score of below basic on the third grade statewide student assessment in English language arts. Students with disabilities whose individualized education program (IEP) includes specially designed instruction in reading or English language arts are exempt from this process.

Intensive reading and literacy improvement strategies

The district will choose and implement intensive reading and literacy improvement strategies from a state menu of best practices established by the Office of the Superintendent of Public Instruction (OSPI).

The district may use a practice or strategy not present on the state menu of best practices for two years initially. If the district is able to demonstrate that it has achieved improved outcomes for students over the previous two school years at a level commensurate with best practices on the state menu, OSPI must approve use of the strategy for one additional school year. Subsequent approval is dependent on continuing improvement.

Students with disabilities whose individualized education program (IEP) includes specially designed instruction in reading or English language arts will be provided reading and literacy improvement strategies as provided in the IEP.

In any school where more than forty percent of tested students received a score of basic (level two on a four-level scoring system) or below basic on the third grade statewide student assessment in English language arts in the previous school year, the school district will implement an intensive

reading and literacy improvement strategy from the state menu or an alternative strategy as referenced above for all students in grades kindergarten through four at the school.

Reporting requirement

The district will require each school to report the number of students in kindergarten through fourth grade who are reading below grade level and the interventions being provided to those students to improve their reading. The information will be disaggregated by subgroups of students. The district will aggregate the information and provide reports to the office of the superintendent of public instruction for delivery to the education committees of the legislature and the educational opportunity gap oversight and accountability committee.

Policy 2421 -
Promotion/Retention

Promotion/Retention

The board recognizes that the rate of physical, social, emotional and academic growth will vary among individual students. Since each student grows at his/her own rate, these individual growth characteristics will be recognized in classroom programming.

After a student has successfully completed a year of study at a specific grade level, he/she will be promoted to the next grade. Retention at the same grade may be beneficial to the student when he/she is not demonstrating minimum competency in basic skill subjects in relation to ability and grade level. Retention should not be considered, except in these instances where there is a strong likelihood that the student will benefit with minimum social and emotional disruption.

The superintendent will establish procedures which provide that parents will be informed at least one (1) quarter in advance of any retention decision on the part of the school. The procedures may include an exception to this timeline for third grade students subject to the grade placement requirements in Policy 2107, Comprehensive Early Literacy Plan.
