

WE NEED YOUR HELP IN CHECKING YOUR LINE

Since the City of New Britain's water department cannot easily access the part of the water line located on your property, we need your help to identify the water service line material on your property. You can use this guidance to determine your service line material.

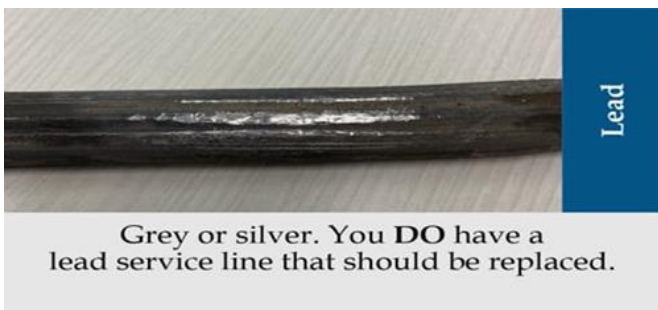

HOW TO CHECK YOUR LINE

WHAT YOU NEED:

- House key or coin
- Strong refrigerator magnet
- Need a coin and a magnet? Call Stephanie Scalise at 860-826-3532 to request a kit (coin, magnet and protect your tap information).

STEPS TO FOLLOW TO CHECK YOUR LINE:

1. Find the water meter in your basement **or outside your home** and look at the service line that enters the water meter.
2. Use the house key or coin to carefully scratch the pipe surface.
3. Compare the scratched area to the following descriptions (below)
4. Upload photo and submit results

Brass

Brass has "threads".

A magnet will not stick to a brass pipe.
