

**First Thursdays Communities Webinar Series
Presents...
It's Electric! EV Charging Program Updates**

Through the end of this calendar year, join Eversource each first Thursday of the month to learn about our clean energy and energy efficiency programs and offerings in Connecticut. These lunchtime webinars are an opportunity to learn directly from your desk.

This month, we will provide an overview of our current available electric vehicle (EV) charging incentives open to our residential and commercial customers. We will be joined by our Connecticut Electric Mobility Program Managers who will walk us through EV technology and resources available for customers considering installing EV charging.

Why should you attend?

- You want to learn more about Eversource's EV program in Connecticut
- You want to learn about EV programs that you can share with your community and residents
- You want to help your community members reduce their carbon footprint through EV adoption
