

Cause and Effect

A cause is why something happens.
An effect is what happens.

- Choose an informational text you have read this week. 
- Talk about events and look for causes and effects. To find an effect ask, “What happened?” To find the cause ask, “Why did it happen?”
- Create a Pyramid Foldable®. On the outside tabs, write the effects. On the inside tabs write their causes.

You need

- > informational text
- > Pyramid Foldable®
- > pencils or pens
