### Screenings for Academic Support

#### Response to Instruction and Intervention (RTI2 ) Benchmark Universal Screener

RTI2 (Response to Instruction and Intervention) is a multi-tier approach to the early identification and support of students with learning and behavior needs. The RTI2 process begins with high-quality instruction and universal screening of all children in the general education classroom. It includes periodic assessments to identify each student's specific needs in reading, writing and math so they can get the appropriate level of instruction.

Student-level reports should be shared with parents by the school. Students who take part in intervention will receive regular progress reports for parents and guardians.
