

Asbestos Notification

July 14, 2023

Special Message to Parents, Students, Administrators, Staff and Community Members

Dear Parents, Students, Administrators, Staff and Community Members:

The Southington Public Schools are surveyed for asbestos every three years. As is the case for most public and commercial buildings in New England, asbestos-containing products were found in our buildings.

An Asbestos Management Program has been developed so that asbestos-containing materials are maintained in a condition in which they do not pose a health hazard. As part of this program, these materials are periodically inspected every 6 months.

Anyone wishing to know more about the Asbestos Management Program or the asbestos-containing materials found in the Southington Public Schools may request to read the Asbestos Management Plan which is on file in the Buildings & Grounds Office, or in the Main Office of each school.

Sincerely,

James Lombardo

Designated Person / SPS Asbestos Management Plan

Note: This letter meets the State and Federal regulations requiring an annual asbestos notification to school building occupants.
