

RELATED STUDIES OVERVIEW and DESCRIPTIONS

Related studies is a combination of classes you will take as a 6th, 7th and 8th grader. When you first enroll, you will select the option of classes you plan to take during your time at Fremont Middle School.

BAND

Band is a class that meets all year, every other school day. Band is a performance based class where students will learn music fundamentals and music note reading through instrumental playing. Band students will perform in several concerts throughout the school year.

Vocal Music

Vocal Music is a class that meets all year, every other school day. Vocal Music students will participate in a choral setting that focuses on building music literacy, performance skills, and vocal technique to better understand, perform, analyze and appreciate music. Performances during and after school take place throughout the school year.

SPANISH

Spanish is a class that meets all year, every other school day. Spanish students will develop and practice the four basic language skills; listening, speaking, reading and writing. Over the course of three years, the students will build language skills to provide a solid foundation for the high school benchmark exams in their final year at the Middle School.

CREATIVE ARTS

Creative Arts are classes that meet for one trimester, every other school day. Creative Arts includes Visual Arts, Music/Drama and Technology. If you select Creative Arts Classes you will have one of each type of class per grade level, classes are assigned at random.

Visual Arts classes are offered on a three year loop. Students will have the possibility of exploring 2D Design, Painting, Ceramics, Drawing, Mixed Media and Sculpture within their three years at Fremont.

Music/ Drama/ Music Technology classes are offered as two different classes every other year. Students will continue to gain skills and understanding of the elements of music and drama. They will explore the way music and drama enriches our lives through performing, creating, acting and creating music online.

Technology classes are offered on a three year loop. Student will have the opportunity to use and learn with multiple software and hardware tools across many areas. Students will apply skills in Robotics, 2D and 3D design, prototyping objects, creating apps, as well as computer designed media. In each class, students will create multiple projects using skills from multiple areas.
