REVISED: 11 July 2022

CANAL WINCHESTER MIDDLE SCHOOL & HIGH SCHOOL
"Extra-Curricular Participation Agreement"

A. PREAMBLE

The Canal Winchester Schools believe that an athlete participates in sports by choice. Participation in athletics is a privilege, not a requirement. In making the choice to participate in athletics, the student must choose between the rules of athletics and non-participation. The schools further believe that it is the responsibility of all students to uphold the dignity and honor of the Canal Winchester Schools at all times when representing their school in any activity.

The most important goal of the Canal Winchester Local Schools Extra-Curricular Programs is to provide every participant the opportunity to grow mentally, morally, physically and emotionally. To assure that the program can provide these opportunities, a degree of self-discipline is required of each participant. Self-discipline involves compliance with rules and regulations concerning personal behavior.

Rules promote order and safety, and assist participants to reach maximum performance potential. Every participant should adhere to the rules of the school and conduct himself/herself as a "good citizen" of that school and the community at all times. Dedication and personal sacrifice by each participant promote a sense of group unity and common goals.

Compliance with the rules can help each participant learn values that carry beyond the extra-curricular program and into daily living. In addition, research has shown that use and abuse of tobacco, alcohol and other drugs have harmful effects on the social and intellectual development of children and youth, and on their mental, physical and emotional health.

Again, it must be remembered that **participation in extra-curricular activities is not a right, but a privilege that shall be regulated.** Therefore, all students who participate in interscholastic athletic or other co-curricular activities at any time meet the following regulations from the date of participation. Regulations concerning alcohol and other drugs and tobacco will be in effect for all athletes and other co-curricular activities during their term of participation while enrolled as students in grades 7-12 in the Canal Winchester Local School District.

CODE OF CONDUCT-12 month rule

All athletes shall abide by a code of conduct which will earn him/her the honor and respect that participation and competition in the interscholastic program affords. Any conduct that results in dishonor to the athlete, the team, or the school will not be tolerated. Acts of unacceptable conduct, such as, but not limited to, theft, vandalism, hazing, disrespect, immorality or violations of the law that tarnish the reputation of everyone associated with the athletic programs and will not be tolerated. This code shall be in effect for 12 months a year, 24 hours a day, for those who made the team. If you make the team and quit, the code still applies. If an athlete is cut, the code does not apply. The code of conduct applies for one calendar year after the conclusion of the last sports season in which the athlete participated.

Failure to comply with the regulations could jeopardize a student's entire co-curricular career.

F. Urine Drug Testing of High School Student Athletes

Urine Drug Testing of High School Student Athletes Participating in Interscholastic Athletic Activities

This guideline calls for weekly or bi-weekly random testing of up to 20% of the current interscholastic athletes. All student athletes must understand and abide by the Student Code of Conduct as well as by the rules and regulations outlined, in detail, in the Student Athletic Handbook. Any disciplinary action taken as a result of the urine drug testing set forth in this guideline is contained therein.

The procedure for initial and subsequent drug testing of athletes is accomplished in partnership with a properly qualified drug-testing vendor approved by the Board of Education. The Vendor will report the result(s) of the urine drug testing of all student athletes to the designated school official. All drug test results are considered confidential information and will be handled accordingly.

The athletic department will pay for random drug tests unless otherwise specified in these guidelines.

List of Eligible Student-Athletes

The Director of Athletics will prepare a list of eligible student athletes and forward it to the Vendor for the selection of student athletes who will submit urine specimens for testing. The Director of Athletics will update the list, periodically.

Procedures for Student Athletes

A. Informed Consent for Testing

At the beginning of each initial sport season, student athletes and parents/guardians/custodians must complete and sign the Informed Consent Agreement. A student whose season is over and does not plan on participating in athletics for the remainder of the school year may be removed from the program with a signed parental consent delivered to the designated official. No student

may participate in practice or competition until all forms are properly executed and on file with the Director of Athletics.

B. Sample Collection

Any eligible student athlete selected randomly for urine drug testing who is not available on the day of testing will be tested at the next available testing time. Arrangements may be made for special collections, at a Vendor collection site with prior approval by the Building Principal or Director of Athletics.

A student unable to produce an adequate specimen of urine during the collection period, after consuming up to 16 ounces of water and waiting up to 60 minutes, will be suspected of not cooperating with the testing program and will not be allowed to practice or participate in any scheduled competitions until the required testing is completed. The specimen must be collected within 36 hours. Any refusal or inability to provide an adequate urine specimen within 36 hours will be treated as a positive result.

C. Self- Referral

Self-Referral per the Athletic Handbook will not apply once a student's name has been randomly chosen.

Vendor Requirements

A. Testing of Urine Specimens

The Vendor will have all specimens tested for the specified illicit or banned substances by a qualified laboratory certified by the Substance Abuse and Mental Health Services Administration (SAMHSA) following the guidelines of the Department of Health and Human Services (HHS.) The testing laboratory should have greater than 10 years experience in toxicology testing and chain-of-custody procedures. All specimens must be initially tested using a highly accurate immunoassay technique, with all presumptive positive results then confirmed by a Gas Chromatography/Mass Spectroscopy (GC/MS) Confirmatory test.

The testing laboratory must be able to test for the following drug classes, substances or their metabolites in collected urine specimens. The Building Principal or designee may specify specific classes or substances to be tested before seeing the random list of students.

Alcohol	Amphetamines	Anabolic Steroids	Barbiturates
Benzodiazepines	Cocaine Metabolites	Ecstasy	LSD
Marijuana Metabolites	Methadone	Methaqualone	Nicotine
Opiates	Phencyclidine	Propoxyphene	

B. Medical Review Officer (MRO) Services

The Vendor will provide MRO services by a licensed physician who is certified by the Medical Review Officer Certification Council (MROCC) or the American Association of Medical Review Officers. The MRO will have proved by examination to have had the appropriate medical training to interpret and evaluate drug test results as a procedure for urine drug testing of Canal Winchester School District students participating in Interscholastic Athletic Activities. The MRO

is responsible for the evaluation of positive drug tests and reporting findings to the designated school official(s) in a timely and confidential manner.

C. Reporting of Test Results by Vendor

During the verification process, the MRO will notify the parents of a potentially positive test. It is important for all parents to understand that the MRO will be checking with parents about legally prescribed drugs, use of another family members, or anyone's prescription drugs are illegal under the law and will be considered a positive result. Once verification is complete, the MRO will certify all urine drug screens as negative or positive and report by telephone positive findings, in a confidential manner, to the designated school official(s).

D. Statistical Reporting and Confidentiality of Urine Drug Test Results.

The Vendor will provide the designated school official(s) with an annual report showing the number of tests performed, rate of positive and negative results, and what substances were found in the positive urine specimens.

Random Selection Of Student Athletes For Testing

The Vendor will use a system to assure that students are selected in a random fashion. This system will utilize a computer-based system designed specifically for the purpose of randomly selecting individuals for drug testing.

Schedule of Random Urine Drug Testing – FREQUENCY

At the beginning of each season, as determined by the Ohio High School Athletic Association or when a student moves into the district and joins a sport, all athletes wishing to participate in that season's sports may be subject to random urine testing for illicit or banned substances as defined in "Illicit or Banned Substances" on Page 8. Urine drug testing is unannounced. The day and date are selected in cooperation with school officials and the Vendor. Random testing may be done up to bi-weekly for up to 20 percent of student athletes

Testing Year

The testing year begins the date the first activity for the upcoming school year commences and continues for 365 days thereafter.

Custody and Control Form Completion

The Vendor is responsible for seeing that proper drug testing custody and control forms are used that satisfy the needs of the testing laboratory and the Guidelines for Urine Drug Testing of students participating in interscholastic athletic activities. A student number will be used for identification with the student's name only appearing on the copies that go to the donor, the Medical Records Officer, and the School Official

Collection Process

Once escorted to the collection site, a specimen of urine is collected from the student athlete using the following process:

- A. Student first is asked to rinse his/her hands with water and dry them or use an alcohol-free hand wipe provided by the vendor.
- B. No purses, bags, or containers may be taken into the collection area with the student. All extra coats, vests, jackets, sweaters, etc., are to be removed before entering the collection area.
- C. The student, assisted by the collector, completes the drug testing custody and control form.
- D. The collector opens the collection kit while the student watches and hands the collection cup to the student, indicating the volume of urine needed for the testing (45ml). The student is instructed to void directly into the cup and hand it to the collector before flushing the toilet or washing their hands.
- E. The collector verifies that the toilet water is blue from the bluing agent.
- F. The student enters the stall to collect the specimen, then hands the container to the collector.
- G. If the student is unable to produce a specimen, they may drink up to 16 ounces of water, provided by the collector or designated school official, and wait up to 1 hour. He or she will not be allowed out of direct view of the collector or School Official. If after 1 hour, the student is still unable to produce an adequate specimen of at least 30ml. he or she will be referred per policy stated under Paragraph B under Procedures for Student Athletes.
- H. If the student is able to produce a specimen, the collector checks the volume, reads and records the temperature within four minutes of collection, and looks for evidence of tampering. If tampering is suspected, a second specimen will be requested. A second suspected tampered specimen will be considered refusal to test, and the Director of Athletics will be notified.
- I. With the student watching, the collector will pour the specimen into the two bottles and recap the specimen bottles tightly.
- J. The collector takes the properly signed and initialed bottle seals and places them over the caps and sides of the bottles.
- K. The sealed bottles are placed inside the transport bag.
- L. The top lab copies of the drug testing custody and control form are folded with the top portion visible to the outside and placed in the Requisition Pouch. This pouch is then sealed. The student is given the donor copy of the form.
- M. The student is then dismissed.
- N. The collector distributes the remaining copies of the form as required, being responsible for getting the appropriate copy of the form to the MRO in a timely manner.
- O. The Director of Athletics will be notified immediately of any student who refuses to give a urine sample.

Medical Review Officer (MRO) Responsibilities

The MRO will review all results of urine drug testing. Any urine specimen testing positive for illicit or banned substances, or adulterated specimens, will be handled in the following manner:

- A. The MRO determines if any discrepancies have occurred in the Chain of Custody.
- B. The MRO contacts the parent/guardian/custodian to determine if the student is on any prescribed medication from a physician, depending on the substances found in the urine.
- C. If the student is on medication, the parent/guardian/custodian will be asked to provide documentation of the prescription within five working days, to document what medications the student is currently taking. Failure to provide such requested information will be considered a positive result.
- D. The MRO will then determine if any of the prescribed medications resulted in the positive drug screen.
- E. Finally, the MRO, based on the information given, will certify the drug test results as positive or negative and report any positive results TO THE DESIGNATED SCHOOL OFFICIAL, initially reporting positive results by phone.
 - (1) The MRO will likely rule it a negative drug test, for example, if the MRO receives a letter from the treating physician that the student has been prescribed Tylenol with codeine as a pain medication following tooth extraction.
 - (2) The MRO would likely rule it a positive drug test, for example, if the student has a positive drug screen for codeine and has no documentation from a physician for the medication (possibly a parent gave the student one of his/her pills.)
 - (3) The MRO will automatically consider it a positive screen if illicit drugs such as marijuana, heroin, cocaine or alcohol are found or if adulterated.
- F. The MRO may use quantitative results to determine if positive results on repeat tests indicate recent use of illicit or banned substances or the natural decline of levels of the illicit or banned substance from the body. If the MRO feels the quantitative levels are above the established cutoffs and do not reflect current use but natural decay, a negative result may be reported.

Pick Up Process

The Vendor is responsible for seeing that specimens are delivered to, or picked up by, the testing laboratory and the Chain of Custody form properly annotated.

Procedures In The Event of A Positive Result

Whenever the MRO reports that a student athlete's test result indicates the presence of illegal drugs or banned substances, or adulterated specimen the following will occur:

- A. Within 24 hours of being notified by the MRO of a positive result or adulterated specimen, the Athletic Director or designee will notify the parent/guardian/ custodian by phone and/or also send

a letter by certified mail. The student is then notified of any positive results.

- B.** If the parent/guardian/custodian or student wishes to contest the results, the Vendor will arrange for the split portion of the specimen to be submitted for testing to another laboratory, which is also approved by the Board of Education. This is done at parent/guardian/custodian or student expense. Such a request must be made to the Building Principal, in writing, within five working days from the date the Building Principal first notified the parent/guardian/custodian of positive test results.
- C.** The MRO may use quantitative results to determine if positive results on repeat testing indicate recent use of illicit or banned substances or the natural decline of levels of the illicit or banned substance from the body. If the MRO feels the quantitative levels determined to be above the established cutoffs do not reflect current use but natural decay, then a negative result may be reported.

CONSEQUENCES

Non-punitive Nature of Policy

No student athlete will be penalized academically for testing positive for illegal drugs or banned substances. The results of drug tests pursuant to this policy will not be documented in any student's academic records.

All student athletes must understand and abide by the Student Code of Conduct as well as by the rules and regulations outlined, in detail, in the Student Athletic Participation Handbook. Any disciplinary action taken as a result of the urine drug testing set forth in this guideline is contained therein.

PART II: Use; First Positive Result

Students will be subject to all of the following disciplinary measures:

If a student tests positive for substances deemed banned or illicit under this guideline, the student will be suspended from participation. Students will be subject to all of the following disciplinary measures:

If a student tests positive for substances deemed banned or illicit under this guideline, the student will be suspended from participation in 50% of the total number of competitions or games scheduled for that athletic activity for the current season. The student can reduce this penalty to a 20% loss by completion of the following:

1. Assessment of the student by a certified drug counselor, at parent expense;
2. Submission to and negative results from a non-random subsequent drug test, administered prior to participation in the next athletic game or competition.

In order for a suspension to be credited, the athlete must complete the season during which the penalty is served, and must continue to fulfill all requirements for participation in the athletic activity, including attending practices, team meetings, and other mandatory events.

If the season has progressed so that less than the 50% or 20% of competitions or games scheduled for that athletic activity for the current season remain, the balance of the competition loss shall carry over to the following season for that athletic event, or may be imposed in other athletic activities, where competition

or games occur after the conclusion of the current athletic activity season.

Students, participating in more than one athletic activity, who test positive for banned or illicit substances will be suspended from competition or games for all athletic activities they currently participate in.

PART II: Use; Second Positive Result

If a student tests positive for substances deemed banned or illicit under this guideline, the student will be suspended from participation. Students will be subject to all of the following disciplinary measures:

If at any time, a student tests positive a second time for substances deemed banned or illicit under this guideline, the student will be suspended from participation in any and all interscholastic athletic for one calendar year.

The athlete loses rights to all leadership positions on interscholastic athletic teams for their remaining years of athletic eligibility.

PART II: Use; Third Positive Result

If a student tests positive for substances deemed banned or illicit under this guideline, the student will be suspended from participation. The student testing positive any third time for substance deemed banned or illicit under this guideline is banned from participation in all interscholastic athletics for their remaining years of athletic eligibility.

- A. Many college sports are regulated by the National Collegiate Athletic Association
- B. (NCAA) an organization founded in 1906 that establishes rules on eligibility, recruiting, and financial aid. The NCAA has three membership divisions- Division I, Division II, and Division III. Institutions are members in one or another division according to the size and scope of their athletic programs and whether they provide athletic scholarships. If you are planning to enroll in college as a freshman and you wish to participate in Division I or Division II sports you must be certified by the NCAA Initial- Eligibility Clearinghouse. The Clearinghouse will analyze your academic information to determine if you meet the NCAA's initial eligibility requirements.
- C. To be certified by the Clearinghouse you must: Graduate from high school. You should apply for certification after the completion of your junior year. If you appear to meet NCAA requirements, the Clearinghouse will issue a preliminary certificate report. After you graduate, the Clearinghouse will review your final transcript to make the final certification decision.

 - Your completed and signed Student Release Form and fee
 - Your official high school transcript
 - Your ACT or SAT scores

XII. ADDITION OF NEW SPORTS

In order to properly plan for the addition of new sports to the interscholastic athletic program under the direction of the middle or high school Principal and the Director of Athletics, the Athletic Department will require new sports to be organized as “club sports” for a minimum of two (2) years before they are fully recognized and funded by the school. A club team is defined as being: a sport new to the Athletic Department, being self-sponsored, and not considered to be a “formal” part of the Middle and/or High School Athletic Department.

The **procedure** of a club sport is as follows:

The coach(es) will be interviewed by the Director of Athletics and/or Building Principal, recommended to the Superintendent, and approved by the Board of Education (BOE). BCI background check, CPR and Coaches Certification, regular attendance at mandatory coaching meetings held by Director of Athletics and attendance at mandatory OHSAA rules interpretation meetings are all mandatory. 3. The Director of Athletics and/or the Building Principal will recommend a coach for the club sport using the using the steps of hiring a coach.
4. The Club sport coach and support group will cooperate with the AD to coordinate field and or gym usage at available times.

XIII. MEDICAL ISSUES WITH STUDENT-ATHLETES

If student athletes are experiencing musculoskeletal injuries/pains or head trauma, they should notify the coach and be evaluated by our District Athletic Trainers. These contracted Athletic Trainers are trained to prevent, evaluate, diagnose, and rehabilitate orthopedic injuries. This includes concussion diagnosis and management. This service is free of charge to student athletes, and the Athletic Trainers will be able to assist with communicating any limitations or modifications to the coaching staff.

If injuries are beyond the rehabilitation and modifications managed by the Athletic Trainers, we may recommend the student athlete be seen by a sports medicine doctor or family physician who may refer to an orthopedic specialist for additional tests, x-rays, or screenings.

Copies of any physician's orders must be provided to our Athletic Trainers to excuse or modify play. Our athletic program is required to follow all State law and OHSAA rules when clearing an athlete for returning to practice or play, so student athletes will still need to complete the mandatory return to play protocols as set forth by the state of Ohio even when cleared by a physician.

Concussion – Return to Practice (RTP) Progression (must be in order and include all steps)

- 1 – No activity
- 2 – Light Aerobic Activity
- 3 – Moderate Level Activity
- 4 – Heavy Non-Contact Activity
- 5 – Return to full practice
- 6 – Return to Full Competition

Our number one priority is the safety and wellbeing of our student athletes. While we are eager to have them return to play, we ask for your patience as we work through the entire evaluation, rehabilitation, and return process. If you have any questions or concerns about your student athlete's condition, please refer them to the District Athletic Trainer.

XV. MIDDLE SCHOOL PHILOSOPHY

It is the belief of the CW Athletic Department that middle school athletics are designed to be learning experience that prepares our student-athletes for the rigor of high school. Our programs are designed to help our young people in the following areas: Time management, organization, team work accountability.

We expect our student athletes to set the example in the classroom, on the field, and in the community. We want to encourage all middle school students to be a part of our programs knowing that we have high standards and expectations.

Athletes who participate will be expected to follow school rules and portray themselves in a positive manner outside the school as well. Our student-athletes represent Canal Winchester and we fully expect each one to carry themselves in a positive manner.

Middle School Sports Information:

- 1) All potential athletes must have a valid physical on file and have all online forms filled out via Parent OneView before being able to participate.
- 2) Once teams are set, each player must submit the pay to participate fee of \$ 100. This payment does not guarantee playing time.
- 3) Some sports will have cuts. Each sport carries a different number, and athletes not chosen will be done in a respectful manner.
- 4) Not all athletes will get to play in every game or have the same amount of playing time. Each coach has discretion in this area.
- 5) Winning is important, but not as important as winning the right way. We will follow all OHSSA, OCC, and CWLS rules as they pertain to each sport
- 6) We want our student athletes to have fun!! We want to encourage and embrace the enjoyment our young people get out of being a part of a team.

By celebrating our success and overcoming challenges, we can help prepare our young people for the field, the classroom, and life!
